## 1 Introduction

#### 1.1 Basic information

T

This Exemption Document has been prepared for the admission of New Shares to the 'Standard' category of BÉT Shares pursuant to Section 1(5)(f) of the Prospectus Regulation and the Implementing Regulation.

The New Shares were issued by the Issuer in view of the Merger of the Issuer as the acquiring company and Takarékbank as the merging companies on 30 April 2023. Further information on the Merger and its effect on the Issuer can be found in Chapters 2. and 4. of the Exemption Document.

The Exemption Document does not constitute a prospectus within the meaning of the Prospectus Regulation.

The Exemption Document has not been reviewed and approved by the relevant competent authority (i.e. the Magyar Nemzeti Bank) in accordance with Article 20 of the Prospectus Regulation.

The information contained in this Exemption Document does not constitute and should not be construed as an offer, recommendation or invitation to buy, hold or sell shares of the Issuer or to make any other investment decision. The Issuer shall not be liable for any distribution of the Exemption Document by third parties in any jurisdiction. This Exemption Document may not be distributed or disclosed in any form in the USA, Australia, Canada or Japan. In no event shall this Exemption Document or any other documents forming part of this Exemption Document be deemed or construed as a promise or commitment by the Issuer to operate successfully or to achieve a return on investment in the future. Please note, investors should be aware that shares are a risky investment. Investors should first and foremost use their own judgment when deciding whether to invest in the Issuer's shares and are advised to seek advice from external experts before making an investment decision. Investors are also advised to take into account their own situation and legal status, including, inter alia, tax issues relating to the purchase or sale of the Issuer's shares, and to seek independent expert advice in this regard.

This Exemption Document has been prepared with a simplified content pursuant to Section 2(2) of the Implementing Regulation, given that the shares issued in the course of the Acquisition by Merger and intended to be admitted to trading on the BSE as a regulated market may be substituted by shares already admitted to trading on a regulated market and that the proportion of such shares in relation to the shares already admitted to trading on a regulated market will not exceed 10%.

#### 1.2 Declaration of liability

The Issuer, i.e. MBH Bank Nyrt. (registered office: 1056 Budapest, Váci u. 38.; registered with the Company Court of the Metropolitan Court of Budapest under the company registration number Cg.01-10-040952) as the person responsible for the information contained in the Exemption Document declares in accordance with the Implementing Regulation that to the best of its knowledge the information contained in the Exemption Document is in accordance with the facts and that no facts have been omitted from the Exemption Document which could affect the conclusions to be drawn therefrom.

In preparing this Exemption Document, the Issuer has made reasonable efforts to ensure that the Exemption Document contains, in accordance with applicable legal requirements, the significant changes in the business and financial position of the Issuer and the Takarékbank since the end of the previous financial year, the information necessary for investors to make an informed assessment of the rights attached to the New Shares and the effects of the Merger and the Merger on the Issuer, and the Issuer's intentions for its future business. To the best of the best of the Issuer's knowledge, the data, data aggregations, statements and analyses contained in the Exemption Document are true and correct, which enable investors to make an informed assessment of the above. To the best of the Issuer's knowledge, the Exemption Document does not contain any misleading information, groupings or analyses capable of giving rise to erroneous conclusions, or omit any facts that would jeopardise the informed assessment of the foregoing by investors.

The Issuer is solely responsible for the content of the Exemption Document.

Budapest 24 July 2023

#### MBH Bank Nyrt.

Name: Marcell Tamás Takács

Name: Levente László Szabó

Position: Member of the Board of Directors

Position: Member of the Board of Directors

#### 1.3 Experts

(a) The independent auditor acting in connection with the Merger

In connection with the description of the Merger, the Exemption Document contains a reference to the merger plan (the "**Merger Plan**") prepared in connection with the Merger and approved by the supreme bodies of the Issuer and Takarékbank (the "**Merging Companies**"), which includes an independent auditor's report prepared in accordance with the provisions of Act CLXXVI of 2013 Transformation, Merger and Division of Certain Legal Persons (the "**Transformation Act**").

The independent auditor's report was prepared by MAZARS Könyvszakértő és Tanácsadói Kft. (registered office: 1139 Budapest, Fiastyúk utca 4-8, 2nd floor; registered with the Company Registry Court of Budapest-Capital Regional Court under company registration number Cg. 01-09-078412; MAZARS), personally responsible auditor: Gabriella Gábor, certified auditor.

Both MAZARS, acting as the independent auditor (registration number: 000220) and Gabriella Gábor (registration number: 007036) are members of the Hungarian Chamber of Auditors.

The business contact details of MAZARS, acting as independent auditors, are <u>www.mazars.hu</u>.

The independent auditor MAZARS has no interest in the Issuer.

The report of the independent auditors, MAZARS, was prepared at the Issuer's request and on the basis of the Issuer's mandate and the independent auditors' report is incorporated by reference into the Exemption Document in accordance with applicable law and with the Issuer's consent.

(b) Company valuation for the determination of exchange ratio

The Exemption Document does not contain, in connection with the description of the Merger, an extract from the company valuation reports prepared by an independent company valuer to determine the exchange ratio of the shares of the Merging Companies (Annex 1: "**Company Valuation Report**"), yet it may be accessed and studied at the premises. Due to the protection of sensitive information contained in the swap ratio measurement, public disclosure in the Exemption Document is not encouraged.

The Company Valuation Report has been prepared by Ernst & Young Tanácsadó Kft.. (registered office: 1132 Budapest, Váci út 20, Hungary; registered with the Company Registry Court of the Budapest-Capital Regional Court under company registration number Cg.01-09-699932).

The business contact details of Ernst & Young Tanácsadó Kft., acting as an independent company valuer: https://www.ey.com/hu\_hu..

Ernst & Young Tanácsadó Kft., acting as independent company valuers, has no interest in the Issuer.

The Company Valuation Report of Ernst & Young Tanácsadó Kft., acting as independent company valuers, was prepared at the Issuer's request and on the Issuer's behalf and the Company Valuation Report are accessible in accordance with the applicable laws and with the Issuer's consent.

#### 1.4 Information from third parties

The Issuer confirms that the information contained in the Exemption Document which has been obtained from third parties has been accurately received and, to the best of the Issuer's knowledge and belief, and to the extent that the Issuer has been able to ascertain from information disclosed by

the third party, the information received has not omitted any fact which would render it inaccurate or misleading.

Source of third party information: publicly available information.

Business review				

- (b) Business review
  - (i) Presentation of the Issuer

The Issuer is the classic bank of the Hungarian financial system. Thanks to the successful reorganisation of the Issuer between 2015 and 2019, the operation and structure of the financial institution complies with the European Union's conditions and expectations for banks. On 30 May 2019, the Issuer's shares were admitted to the

<sup>&</sup>lt;sup>1</sup> The information on this website does not form part of the Exemption Document unless the information is incorporated by reference into the Exemption Document.

"Standard" category of the BÉT. On 31 March 2022, the legal merger of Budapest Bank Zrt. and the Issuer and Magyar Takarék Bankholding Zrt. and the Issuer were completed. The new consolidation group created as a result of the acquisition by merger continued to operate temporarily under the name MKB Bank Nyrt.

As one of Hungary's leading universal banks, the Issuer creates lasting value for its clients through predictable and predictable partnerships. The bank is on a dynamic growth trajectory, with a strong digital foundation and strategy, and has a tradition of strong large corporate and private banking customer franchise, advisory and analytical capabilities. The core value of the financial institution is professional customer service based on prepared, supportive and honest professional work.

(ii) Main activities of the Issuer and its group

The Issuer and its subsidiaries conduct their business activities in Hungary, a breakdown of the main activities of the Issuer's group by business segment, including a presentation of the breakdown of the profit for the financial year 2022 between the business segments, is set out in clause 34 of the Issuer's audited consolidated financial statements for the financial year ended 31 December 2022, prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union pursuant to Regulation (EC) No 1606/2002 of the European Parliament and of the Council, are available at the following link: https://www.mbhbank.hu/sw/static/file/6\_MKB\_Bank\_Nyrt\_Konszolidalt\_penzugyi\_ki mutatasok\_2022. december 31 .pdf.

The Issuer Group's operations and activities have not changed significantly during the period from 31 December 2022 to 30 April 2023 and material events during this period are disclosed in clause 4.37 to the consolidated financial statements referred to above.

(c) Financial statements for the issuer's last closed financial year

The audited consolidated financial statements of the Issuer for the financial year ending 31 December 2022, prepared in accordance with IFRS, together with the auditor's report, are available at the following link: https://www.mbhbank.hu/sw/static/file/6\_MKB\_Bank\_Nyrt\_Konszolidalt\_penzugyi\_kimutatas ok 2022. december 31 .pdf.

- (d) Corporate governance (on 30 April 2023)
  - (i) Board of Directors of the Issuer

The management body of the Issuer is the Board of Directors. The members of the Board of Directors act as the legal representatives of the Issuer before third parties, courts and other authorities. The Board of Directors is responsible for the establishment and management of the Issuer's work organisation, and thus, pursuant to Section 150 of Act CCXXXVII of 2013 on Credit Institutions and Financial Enterprises ("Act"), it exercises the rights of employment over the executive officers (i.e. the Chairman and Chief Executive and the Deputy Chief Executives) under the Hpt, subject to the decision-making powers conferred to the exclusive competence of the General Meeting of Shareholders in the Issuer's Articles of Association. The Board of Directors decides on all matters which are referred to the exclusive competence of the Board of Directors by law, the Articles of Association of the Issuer or the internal rules adopted by the Board of Directors.

The Board of Directors shall report to the General Meeting at least once a year and to the Supervisory Board at least every three months on the management, the assets and liabilities of the Issuer and its business policy. The Board of Directors has the exclusive competence to formulate its position on the matters placed on the agenda of the General Meeting, to submit them to the Supervisory Board and to the General Meeting together with the opinion of the Supervisory Board.

From 30 April 2022, Magyar Bankholding Zrt. the Issuer is responsible for ensuring the consolidated prudential compliance of the business associations belonging to the same prudential group as the Issuer.

The Board of Directors consists of a minimum of three (3) and a maximum of nine (9) members. The members of the Board of Directors are elected by the General Meeting for a fixed term of up to five (5) years. At the time of the Merger, the Board of Directors of the Issuer consisted of the following members:

	MKB Bank Nyrt. – BOARD OF DIRECTORS

#### (ii) Supervisory Board of the Issuer

The Supervisory Board supervises the management of the Issuer in order to safeguard the Issuer's interests.

The Supervisory Board examines all regular and ad hoc reports prepared or discussed by the Board of Directors on which the Board of Directors has requested its opinion, in particular the quarterly reports on the Issuer's assets and liabilities and business policy, the quarterly risk reports, the quarterly and annual compliance reports on the prevention of money laundering and terrorist financing and compliance activities, and the internal audit reports, and performs all tasks assigned to it by the Issuer's Articles of Association or by law.

The Supervisory Board consists of at least three (3) and no more than nine (9) members and the members of the Issuer's 3-member Audit Committee shall be elected by the Issuer's General Meeting from among its independent members. The members of the Supervisory Board are elected by the General Meeting for a fixed term of up to five (5) years. The members of the Supervisory Board of the Issuer on 30 April 2023 were:

#### (iii) Other information related to corporate governance

The principal shareholder of the Issuer is Magyar Bankholding Zrt. (registered office: 1134 Budapest, Kassák Lajos utca 18; registered with the Company Registry Court of the Budapest-Capital Regional Court under company registration number Cg.01-10-140865). Prior to the Merger, Magyar Bankholding Zrt's ownership in the Issuer was 99.12%.

At the Extraordinary General Meeting of the Issuer held on 9 December 2022 decided in its General Meeting Resolution No. 57/2022 (9 December) on the merger of the Issuer and Takarékbank Zártkörűűen Műműdő Részvénytársaság by way of acquisition by merger, furthermore the Issuer has decided by General Meeting Resolution 63/2022 (9 December), on determining the proposed subscribed capital of the Issuer as a successor company, the proportion of the proposed registered capital to be allocated to its shareholders, and the share of the assets of persons not intending to become members of the Issuer as a successor company. The General Meeting declared that the subscribed capital of the Issuer as the Acquiring Company shall be increased to HUF 322,529,625,000, i.e. three hundred and twenty-two billion five hundred and twenty-nine million six hundred and twenty-five thousand forints. KELER Zrt is in the process of creating 830,667 new dematerialised ordinary shares of Series A with a face value of HUF 1,000 each, to be issued as a result of the merger. After the shares have been created and credited to the securities accounts of the shareholders, the shareholders may exercise their voting rights in respect of the newly issued shares from the date of entry in the share register.

The average number of employees of the Issuer in the financial year 2022 was 4737.6. As of 31 December 2022, the Issuer provided personal customer service in 123 branches nationwide.

#### 2.2 Takarékbank Zrt. - the Acquired Company

As a result of the Merger, Takarékbank ceased to exist as of 30 April 2023, and its general legal successor is the Issuer. Accordingly, the information provided in this clause in respect of Takarékbank relates to 30 April 2023 (unless a different date is expressly indicated in the context).

(a) General information

Official name of the Acquired Company:	Takarékbank Zártkörűen Működő Részvénytársaság; Takarékbank Zrt.

- (b) Business review
  - (i) Presentation of Takarékbank

<sup>&</sup>lt;sup>2</sup> The information on this website does not form part of the Exemption Document unless the information is incorporated by reference into the Exemption Document.

- (ii) Takarékbank was created by the merger of three cooperative credit institutions, Pannon Takarék Bank Zrt. and B3 Takarék Szövetkezet, which merged on 30 April 2019 into Mohácsi Takarék Bank Zrt., which changed its name to Takarékbank Zrt. On the same date, the central bank of the Takarék Group, MTB Magyar Takarékszövetkezeti Bank Zrt. ("MTB") transferred its corporate and retail account, deposit, loan and guarantee portfolios to the new Takarékbank. On 31 October 2019, the merger of 11 additional savings cooperatives and 2 banks completed the almost five-year process of creating a single, nationwide, universal commercial bank from the previous almost 120 savings cooperatives. The Takarék Group's nationwide universal commercial bank is Takarékbank, one of the largest Hungarian financial institutions, which operated the country's most extensive branch network, serving 1.1 million customers.
- (iii) Summary of the main activities performed by Takarékbank

Takarékbank conducted its business activities in Hungary. Takarékbank was striving to provide a full range of universal banking services of high quality and to achieve its business objectives. In order to achieve its business objectives and to serve its customer groups in a tailor-made manner, the activities were divided into retail (retail and micro enterprises), corporate (small and medium-sized enterprises, large corporate, project companies, municipalities) and agricultural (agriculture, food industry) segments and business lines, complemented by an independent team of experts.

The operations and activities of Takarékbank did not change significantly during the period from 31 December 2022 to 30 April 2023. The material events that occurred during this period in relation to Takarekbank are described in Clause 36 of the Takarekbank's individual accounts.

Takarékbank did not make any material investments during the period from 31 December 2022 to 30 April 2023.

(c) Financial statements for Takarékbank's last closed financial year

The audited individual financial statements of Takarékbank for the financial year ending 31 December 2022, prepared in accordance with IFRS, together with the auditor's report, are available at the following link: https://www.mbhbank.hu/sw/static/file/Tbank\_2022.\_december\_31.pdf.

- (d) Corporate governance (on 30 April 2023)
  - (i) Board of Directors of Takarékbank

Until 30 April 2023, i.e. the date of the Merger, the Board of Directors of Takarékbank performed the functions of the executive body of the Company. The competence of the Board of Directors included all matters which were referred to the exclusive competence of the Board of Directors by law, the Articles of Association of Takarékbank or the Internal Rules adopted by the Board of Directors. MKB Bank Nyrt. was responsible for ensuring the consolidated prudential compliance of Takarékbank and the business associations belonging to the same prudential group until the termination of Takarékbank on 30 April 2023.

The Board of Directors shall prepare a report at least annually to the General Meeting and at least quarterly to the Supervisory Board on the management, financial position and business policy of the Company.

According to the Articles of Association of Takarékbank, the Board of Directors could consist of a minimum of three (3) and a maximum of nine (9) members. The members are elected by the shareholders for a fixed term of up to five (5) years. On 30 April 2023, the number of members of the Board of Directors was six.

At the time of the Merger, the Board of Directors of Takarékbank consisted of the following members:

#### (ii) The Supervisory Board of Takarékbank

The Supervisory Board of Takarékbank supervised the management of Takarékbank in order to protect the interests of Takarékbank.

The Supervisory Board examined all regular and ad hoc reports prepared or discussed by the Board of Directors on which the Board of Directors has requested its opinion, in particular the quarterly reports on Budapest Bank's assets and liabilities and business policy, the quarterly risk reports, the quarterly and annual compliance report on the prevention of money laundering and terrorist financing and compliance activities, and the internal audit reports, and performed all tasks assigned to it by Takarékbank's Articles of Association or by law.

The Supervisory Board was composed of at least three (3) and up to nine (9) members and the members of the 3-member Audit Committee of Takarékbank were elected from among its independent members. The members of the Supervisory Board were elected by the shareholders for a fixed term of up to five (5) years.

At the time of the Merger, the Supervisory Board of Takarékbank consisted of the following members:

#### (iii) Other information related to corporate governance

The average number of employees of Takarékbank Zrt. in the financial year 2022 was 3,398.6. The branch network of Takarékbank consisted of 446 branches on 31 December 2022.

 $<sup>^{4}</sup>$  In brackets, the original expiry date of the legal relationship as determined at the time of election.

## **3** Presentation of the Merger

#### 3.1 Purpose and objectives of the Merger

As a significant milestone in the planned multi-step integration process, the Merger, i.e. the merger of the Issuer as the acquiring company and Takarékbank as the acquired company, took place on 30 April 2023.

The main purpose of the Merger is to exploit the main synergies expected to arise from the merger, as described below, and thereby to increase the value of the investments of the shareholders of the Merging Companies.

- (a) Business synergies: As a result of the Merger, the Issuer will be able to reach the customer base of the Merging Companies, thus achieving higher profitability per customer through cross-selling, while optimising the business's reserves commensurate with the size of the business (e.g. liquidity reserves, capital reserves, risk reserves), thereby ensuring a more efficient use of capital. Innovative customer relationship management IT improvements can enable new customers to be reached and sales channels to be streamlined.
- (b) IT synergies: The size and complexity of the IT structure required for the efficient operation of the Issuer is significantly smaller than the infrastructure currently used by the Merging Companies separately. The improvements brought about by the Merger will allow for the introduction of more efficient IT tools than is currently the case, both in terms of banking operations and customer relations.
- (c) Organisational synergies: As a result of the Merger, IT improvements and process standardisation will reduce the resources dedicated to customer activities, as well as the control and other service areas, with a scale of economy aspect.
- (d) Other cost synergies: Following the Merger, external professional, marketing and legal costs for the Issuer can be significantly reduced, and real estate costs can be rationalised due to a proportionately smaller organisation. The optimised sales network following the Merger may also have an impact on real estate and vehicle costs.
- (e) Corporate governance: From a legal point of view, the establishment of a unified corporate governance and the necessary internal rules and regulations at the Issuer could help to realise economic synergies in order to maximise shareholder value.

The Merger was completed on 30 April 2023. The above objectives to be achieved through the Merger can be realised during the course of the Issuer's operations. The risk factors associated with the Merger are set out in Section 5.3 of the Exemption Document.

- 3.2 Conditions of the Merger
  - (a) The Merger Plan

The terms and conditions of the merger of the Issuer and Takarékbank by way of Merger are set out in the Merger Plan and its annexes, adopted by the supreme bodies of the Merging Companies on 9 December 2022, which are available at https://www.mbhbank.hu/befektetoi/befektetoknek/kozzetetelek/rendkivuli-kozzetetelek. This Merger Plan is governed by the Hungarian law.

The said Merger Plan and its annexes contain the exchange ratio of the shares to be issued by the Issuer in exchange for the shares issued by Takarékbank in the context of the Merger, as well as the methodology for determining the exchange ratio and the related report prepared by the independent auditor in accordance with the provisions of the Transformation Act. The Company Valuation Report prepared by Ernst & Young Tanácsadó Kft. in connection with the determination of the exchange ratios is presented as 0 to the Exemption Document.

No contingent consideration has been determined in the Merger.

The individual definitive balance sheets and inventories of assets and liabilities of the Merging Companies prepared in accordance with the provisions of the Transformation Act and the related independent auditor's report are attached as 0 to the Exemption Document. The Issuer draws the attention of investors to the fact that the definitive balance sheets and inventories of the Merging Companies contain individual, i.e. non-consolidated, data.

(b) Description of the notification and clearance procedures relating to the Merger

The completion of the Merger was subject to the approval of Magyar Nemzeti Bank of the Merger and the registration of the Merger in the Company Register by the Company Court of the Metropolitan Court of Budapest.

(i) Authorisation procedures of the National Bank of Hungary

On 1 December 2022, the Merging Companies initiated the approval of the Merger before Magyar Nemzeti Bank.

Magyar Nemzeti Bank, by its Resolution No. H-EN-I-57/2023, issued on 28 January 2023:

- (A) authorised the merger of Takarékbanl into the Issuer with effect from 30 April 2023, as provided for in the Merger Agreement dated 9 December 2022.
- (B) authorised the amendment of the Issuer's Articles of Association;
- (C) determined which of the financial services defined in Section 3(1) of Act CCXXXVII of 2013 on Credit Institutions and Financial Enterprises (Hpt.) the Issuer is entitled to perform on a commercial basis;
- (D) determined which of the investment services and ancillary services defined in Section 5(1) of Act CXXXVIII of 2007 on Investment Firms and Commodity Dealers, and on the Regulations Governing their Activities (Bszt.) the Issuer is entitled to perform on a commercial basis (covering all financial instruments specified in Section 6 a)-k) of the Bszt.);
- (E) established that the Issuer may carry out the activity of dependent insurance intermediary under the conditions set out in Sections 383-394 of Act LXXXVIII of 2014 on the Business of Insurance (Bit.);
- (F) has established that the Issuer may pursue intermediary services pursuant to Sections 111-116 of the Bszt.;
- (G) established the Issuer's executive officers;

#### (ii) Company Court procedure

On 7 February 2023, Takarékbank applied to the Company Court of the Metropolitan Court of Budapest for its strike-off by legal succession. On the same day, the Issuer applied to the Company Court of the Metropolitan Court of Budapest for the registration of Takarékbank as the predecessor of the Issuer and for the registration of other changes that occurred during the Merger, including (i) the locations of the registered office of Takarékbank, (ii) the registration of the increase in the share capital of the Issuer resulting from the Merger and (iii) the registration of the details of the shares to be issued in respect of the increase in the share capital.

In its orders of 14 February 2023, the Company Court of the Metropolitan Court of Budapest fully granted the above requests, with the deletion of Takarékbank taking

effect on 30 April 2023 and the registration of the changes affecting the Issuer taking effect on 1 April 2023, in accordance with the provisions of the Transformation Act.

(c) Information necessary to understand the financing structure of the Merger

The Merger Plan and its annexes contain the exchange ratio of the shares to be issued by the Issuer in exchange for the shares issued by Takarékbank in the context of the Merger, as well as the methodology for determining the exchange ratio and the related report prepared by the independent auditor in accordance with the provisions of the Transformation Act, no additional monetary contribution was made.

(d) Schedule of Merger:

The Merger has been completed along the following key milestones:

Date	Event
30 October 2020	The shareholders of Magyar Bankholding Zrt. signed an Investment and Syndicate Agreement, which envisaged at a high level, inter alia, the merger of the banking subsidiaries of Magyar Bankholding Zrt.
August 2021	The target date was set for the merger of the Issuer, Budapest Bank and Magyar Takarék Bankholding at the end of the first quarter of 2022.
1 April 2022	The changes in the Issuer's corporate structure resulting from the first phase of the merger took effect, with Budapest Bank and Magyar Takarék Bankholding merging into the Issuer.
8 November 2022	Continuing the merger process, the Boards of Directors of the Issuer and Takarékbank submitted the merger documentation to the supreme bodies of the Merging Companies and initiated the decision of the supreme bodies on the Merger.
1 December 2022.	The Issuer has submitted an application to the National Bank of Hungary for approval of the Merger.
9 December 2022.	The general bodies of the Issuer and Takarékbank have decided on the Merger and approved the Merger Plan and its annexes.
	The representatives of the Issuer and Takarélbank have signed the Merger Agreement and the representatives of the Issuer have signed the Articles of Association of the Issuer, which will enter into force on 1 May 2023.
6 February, 2023	Magyar Nemzeti Bank has issued its authorisation H-EN-I-57/2023 for the Merger and the Acquisition of Control of the Issuer.
14 February 2023	The Company Court of the Metropolitan General Court has registered the Merger with effect from 1 May 2023.
30 April 2023	The Takarékbank has been deleted from the register of companies.
1 May 2023	The changes to the Issuer's corporate data as a result of the Merger became effective.
[ <mark>*</mark> ] June 2023	The New Shares were issued

(e) Absence of break-up and default fees

The Merger was registered with effect from 1 May 2023 by the Company Court of the Metropolitan Court of Budapest by its order dated 14 February 2023, thus, in accordance with the provisions of the Transformation Act, Takarékbank got struck-off with effect from 30 April 2023 and the changes affecting the Issuer as the Transferee Company became effective as of 1 May 2023. No break-up fees or other fees payable in the event of the Merger not being completed will or may be incurred.

(f) Declaration on conflict of interest

As the Merger was decided by the supreme body of each of the Merging Companies by unanimous resolution of more than 99% participation of those entitled to make a decision no conflicts of interest have arisen in relation to the Merger in relation to the Issuer, the Merging Companies or their shareholders.

### 4 Impact of the Merger on the Issuer, current situation of the Issuer

4.1 Impact of the Merger on the Issuer's business activities and prospects

With the completion of the Merger, a significant milestone in the integration of three universal commercial banking groups covering the full spectrum of financial services has been achieved, which will allow the Merging Companies and their groups, which have been operating successfully until the date of the Merger, to continue to deepen their aligned operation, building on their traditions, strengths and prominent market positions in certain segments, and to take advantage of the synergies that will arise. Accordingly, in view of the Merger, the Issuer does not plan to significantly change its future business activities, i.e. the main activities it carries out and the types of products or services it sells will not be significantly affected by the Merger.

- (a) The Issuer considers the following main strategic directions to be decisive for the group of companies resulting from the Merger:
  - (i) The Issuer aims to become a highly customer-focused bank in Hungary, offering a value proposition that is beneficial to all Hungarian citizens and businesses. The Issuer and its Group aim to serve the full market spectrum and all customer segments, with a particular focus on a new, modern range of products and services for retail, micro, small and medium enterprises and agricultural customers. The new group will aim to maintain its current strong market positions in the corporate, agri and leasing businesses in the new business model that will be developed in the future.
  - (ii) The Issuer aims to actively contribute to the development of the Hungarian economy by supporting segments of national economic importance, such as young people, SMEs and the agricultural sector, while maintaining its commitment to local communities.
  - (iii) The Issuer aims to create the most advanced banking technology platform and digital channels in the Central and Eastern European region.
  - (iv) The Issuer's objective is to maintain the largest branch network in Hungary also in the long-term, providing nationwide coverage, while at the same time contributing to quality, value-based customer service through efficient operations.
  - (v) The Issuer aims to build an innovative organisation and corporate culture, with a strong focus on people, continuous capability development and a state-of-the-art corporate culture.
  - (vi) The Issuer aims to continuously identify synergy opportunities (e.g. in the areas of operations, governance and IT systems) that will enable the Issuer and the resulting group to operate more efficiently in the future than the Merging Companies and their groups did prior to the Merger.
- (b) Presentation of any restructuring, reorganisation or investments, transactions and other circumstances which have a material effect on the business in the group resulting from the Merger as at the date of the Exemption Document:
  - (i) MBH Bank Nyrt. informed the capital market participants that on 2 May 2023, the Company Registry Court of Budapest-Capital Regional Court registered in the register of companies its newly founded subsidiary MBH DOMO Korlátolt Felelősségű Társaság, a 100% owned company with a subscribed capital of HUF 3,000,000.
  - (ii) Reserve requirement ratio: the Monetary Council has further tightened the impact of the reserve requirement on interbank liquidity by raising the reserve requirement ratio and restructuring its interest rate from 1 April 2023. The reserve requirement rate has been increased to 10 per cent and a phased interest rate system has been introduced for the reserve account.

- (iii) Interest rate freeze and amendment of the regulations on the extra profit tax on credit institutions: the interest rate freeze protecting households and SMEs will be extended until 31 December 2023, according to government decisions announced on 11 May 2023. From 1 July 2023, the extra profit tax for credit institutions will be based on 50% of the profit (loss) before taxation adjusted for special taxes, with a graduated rate. MBH Bank's recalculated extra profit tax liability is HUF 50.6 billion. According to the government's proposal, the extra profit tax will remain in place in 2024, but banks will have the opportunity to reduce the tax by up to 50% if they buy Hungarian government bonds.
- (iv) Increasing the weight of securities in investment funds: From 1 July 2023, bond funds, share funds and mixed funds must have a minimum 60% weighting of securities in their portfolios. The regulation aims to shift as much of the funds' investments as possible from bank deposits to government securities.
- (v) Social contribution tax payable on interest on bank deposits: in addition to the existing 15% interest tax, the government introduces a social contribution tax of 13% on certain savings, which will also apply to bank deposits after 30 June.
- (c) Other effects related to the Merger

The Merger will not materially affect any major contracts of the Issuer, including material contracts to which the Issuer has become a party as general successor in interest to Takarékbank.

The Issuer's working capital, even after the Merger, is sufficient for the Issuer's current needs.

Considering the fact that no significant gross change (change of more than 25% in one or more indicators of the size of the Issuer's business) has occurred in the Issuer's consolidated figures as a result of the Merger, no preliminary financial information is presented in this Exemption Document.

4.2 Corporate governance following the Merger

The Merger has not resulted in any material change in the corporate governance of the Issuer. The supreme decision-making body of the Issuer remains the General Meeting, with the Board of Directors as its highest governing body. The Supervisory Board is the body of the Issuer with supervisory powers, exercising ownership control pursuant to the Credit Institutions Act.

However, subject to the decision H-EN-I-267/2022 of the Magyar Nemzeti Bank, from 29 April 2022, the Issuer is responsible for ensuring the prudential compliance of the group of companies ("**MBH Group**") as defined in the relevant decision of the Magyar Nemzeti Bank on the subject of the companies under the supervision of the Issuer on a consolidated basis.

The Issuer shall perform its statutory governance, control and reporting duties in respect of the companies under its supervision on a consolidated basis. In order to ensure the consolidated compliance of the MBH Group, the Issuer shall, within the applicable legal framework, take governance, operational and financial decisions in respect of the group members controlled by the Issuer, including in particular the development, adoption and group-wide assurance of compliance with group-wide strategies, plans and policies, and the monitoring and enforcement of compliance of the members of the MBH Group at sub-consolidated and individual level.

To ensure the uniform professional and organisational functioning of the members of the MBH Group, the group members and the heads of the same professional/organisational units of the Issuer shall cooperate closely.

#### (a) Board of Directors

The Board of Directors shall report to the General Meeting at least once a year and to the Supervisory Board at least every three months on the management, the assets and liabilities

of the Issuer and its business policy. The Board of Directors has the exclusive competence to formulate its position on the matters placed on the agenda of the General Meeting, to submit them to the Supervisory Board and to the General Meeting together with the opinion of the Supervisory Board.

On the basis of the decisions of the General Meeting and in accordance with its own competence, the Board of Directors shall lay down further detailed rules for the operation of the Issuer, which shall be communicated to the Issuer's working organisation by the Chairman and CEO.

The lower level of management of the Issuer's work organisation beyond this is the responsibility of management employees. The Issuer has standing and ad hoc committees to support the work of the management bodies and the managing director(s) under the Credit Institutions Act. The rules for the functioning of such committees are laid down in the relevant internal rules of the Issuer and in the decisions of the management bodies.

Members of the Issuer's Board of Directors as of the date of the Exemption Document:

	MBH Bank Nyrt BOARD OF DIRECTORS					
Board of Directors	Function	Start of legal relationship	End of legal relationship	Contact details

No conflict of interest exists with respect to the members of the Board of Directors described above that could arise between their duties on behalf of the Issuer and their private interests or other duties.

The members of the Board of Directors described above do not, to the best of the information available to the Issuer, own any shares issued by the Issuer and have not entered into any agreements that would restrict their ability to dispose of their shares in the Issuer for a period of time.

(b) The Supervisory Board

The Supervisory Board supervises the management of the Issuer in order to safeguard the Issuer's interests. The powers, duties and operating procedures of the Supervisory Board are defined by the Civil Code, the Credit Institutions Act, the Issuer's Articles of Association and the applicable legislation.

The Supervisory Board controls the management of the Issuer in order to protect the interests of the Issuer, in the framework of which it may acquire information on the Issuer's matters and may request data on the Issuer's operation. As part of this task, the Supervisory Board may request reports or information from members of the Board of Directors and the Issuer's managers.

The Supervisory Board may review the Issuer's documents, accounting records and books, and may also review, or have reviewed by an expert, the Issuer's contracts, payment accounts, and stock of cash, securities and goods.

The Issuer allows the Supervisory Board to access information on the Issuer's risks, the risk control function, and external experts' opinions. The Supervisory Board can initiate the convocation of the Board of Directors and can make proposals for the items on the agenda.

Members of the Issuer's Supervisory Board as of the date of the Exemption Document:

representing the		
employees		

No conflict of interest exists with respect to the members of the Supervisory Board described above that could arise between their duties on behalf of the Issuer and their private interests or other duties.

The members of the Supervisory Board described above do not, to the best of the information available to the Issuer, own any shares issued by the Issuer and have not entered into any agreements that would restrict their ability to dispose of their shares in the Issuer for a period of time.

- 4.3 Effect of the Merger on the Shares
  - (a) The number of shares of the Issuer before and after the Merger, the voting rights and the share capital of the Issuer are set out in the table below:

	Before the Merger	After the Merger <sup>[1]</sup>
Number of shares	321,698,958	322,529,625
Voting rights	321,698,958 votes (each share entitles to one vote)	322,529,625 votes (each share entitles to one vote)
Share capital	HUF 321,698,958,000	HUF 322,529,625,000

(b) Ownership structure following the Merger and dilution to existing shareholders as a result of the Merger

As the holders of all New Shares to be issued as a result of the Merger are the shareholders of Takarékbank, the acquired company the shareholding and voting rights of Magyar Bankholding Zrt in the Issuer decreased from 99.12% to 98.87% as a result of the Merger and the shareholding and voting rights of the other shareholders of the Issuer increased proportionately from 0.88% to 1.13%

In line with the above, the ownership structure of the Issuer prior to the Merger and after the Merger, assuming the issuance of the New Shares, is illustrated in the table below:

Shareholder	Number of shares	Ownership share (%)
Magyar Bankholding Zrt.	318,868,007	99.12
Free float	2,830,951	0.88
Total	321,698,958	100

<sup>&</sup>lt;sup>[1]</sup> Assuming that the New Shares are issued.

Shareholder	Number of shares	Ownership share (%)
Magyar Bankholding Zrt.	318,883,966	98.87
Free float	3,645,659	1.13
Total	322,529,625	100

## 5 Risks

This section contains a description of the most important risk factors relating to the New Shares and the Merger by Acquisition and the Issuer.

In the view of the Issuer, the risk factors described in this Exemption Document constitute the material risks affecting the Issuer and the New Shares. Nevertheless, the Issuer's business activities, results of operations and financial position may be adversely affected by additional risk and uncertainty factors that are not currently known to the Issuer or, to the best of the Issuer's current knowledge, not considered to be material. The Issuer describes the force majeure type risks (Russian invasion of Ukraine) currently identified by it. It cannot be ruled out that a force majeure situation of a type not currently identified by the Issuer may occur, which could affect the share price. Should any of the risk factors identified below occur, it could adversely affect the Issuer's financial and economic position, competitiveness, business activities and prospects, which could result in a significant and long-term or permanent reduction in the price of the Issuer's shares (including the New Shares). The risk of a total loss of the assets invested in the Issuer's shares (including the New Shares) cannot be excluded.

Prior to adopting a decision to acquire shares in the Issuer, all persons and entities intending to invest are advised to consider the risks associated with the business environment and the Issuer, if appropriate, involving independent financial, legal, accounting or tax advisors, and to adopt their respective investment decision on the basis of a position elaborated by themselves, in consideration of the former. All potential investors should take into account that investing in the Issuer's shares involves certain risks. Obtaining a detailed knowledge of the risks is necessary for any person or entity possibly investing in the Issuer's shares, as only the knowledge of each of these risks will enable them to form an appropriate opinion of the Issuer and to assess the risks of investing in the Issuer's shares.

The disclosure of the Exemption Document shall not be deemed a promise that no adverse changes in the financial or other position of the Issuer or events will arise that could result in an adverse change following the disclosure of the Exemption Document.

- 5.1 Risks characteristic of the market and the industry
  - (a) Risks arising from developments in the economic environment

The Issuer is significantly exposed to global and domestic money market and financial processes. Risks arising from changes in the market and macroeconomic environment are considered risks beyond the Issuer's control. An economic crisis or financial crisis occurring in the future could, even along with careful corporate governance, cause unforeseeable damage to the Issuer's operations.

Due to its size and openness, the Hungarian economy is significantly affected by international, and in particular European, economic cycles. A fall in foreign demand could worsen the situation of the Hungarian economy, both in terms of growth rates and financial processes. A slowdown in the growth of the Hungarian economy may also negatively affect the operating environment and profitability of the credit institutions sector, including the Issuer.

International market trends can quickly and strongly translate into changes in domestic interest rates and margins. The Hungarian currency is significantly influenced by foreign investors' demand for forint assets and by the perception of credit risk in the Hungarian economy. If investor demand falls or risk perceptions deteriorate, the forint exchange rate could weaken and the interest rate and risk premium on forint assets could increase. These changes have a significant impact on the Issuer's ability to obtain financing and on the terms and conditions thereof.

Changes could occur in certain segments of the Hungarian economy that may require oneoff, large-scale measures to be adopted by the government and/or the central bank. Such measures could directly affect the regulation of the credit institution sector, but could also affect the position of other operators of the domestic economy. Any such government measure could have a significant impact on the operating environment and profitability of the Issuer. The Issuer's business activities are subject to the financial and investment banking services used by its customers. In particular, the demand for credit of the customer base is particularly dependent on the consumer confidence index, employment trends, economic circumstances and interest rates. Considering that the Issuer carries out its business activities in Hungary, it is highly dependent on the economic circumstances and the cyclical nature of Hungarian economic processes and, indirectly, on domestic and international economic and political events. There can be no assurance that the Issuer's business position will not deteriorate in the event of a possible deterioration in the Hungarian economic environment, including the effects of changes in the tax environment.

The operators in the Hungarian credit institutions sector are dependent on each other for their proper operation, stemming from the domestic market environment. If the reputation of a domestic credit institution operator is damaged or its day-to-day operations are jeopardised, it could have a significant impact on the operating environment and profitability of the Issuer or even on the confidence in the credit institution sector, thus, in particular in the Issuer.

A negative investor sentiment prevailing in the domestic or international financial and capital markets or a potentially developing panic situation could have a rapid and material negative impact on the Issuer's share price, even if no negative changes occur that directly affect the Issuer's business activities.

(b) Risks related to competition in the credit institutions sector

The Hungarian credit institutions market, of which the Issuer is a major operator, can be considered mature and saturated. As a consequence, new entrants to the credit institution market or the operators already present will need to take market share away from other credit institution operators in order to achieve growth. Due to the intense competition in the credit institution sector, the Issuer may not be able to retain its existing customers or to attract a sufficient number of new customers and could thus lose market share, which could result in a decrease in the Issuer's revenues and a deterioration of its financial position.

(c) Interest rate environment

At any time, changes in the interest rate environment present a risk to the Issuer's financial position and may have a material impact on it. If a low interest rate environment develops, the willingness of the public to save through bank deposits could decrease, which could result in significant difficulties for the Issuer to raise funds through retail deposits. Conversely, in the event of a sudden or significant increase in interest rates (or a rise in interest rate-environment), borrowers may prefer fixed rate products, which could affect and adversely affect the Issuer's business and operational capacity. Higher interest rates on floating rate loans to customers will increase interest income, but due to the higher payment burdens loans may become non-performing at a higher rate than expected at origination, which could adversely affect the Issuer's profitability and capital position. Higher interest rates on fixed rate loans may reduce the Issuer's profitability through increased expenses related to obtaining financing. A long-term high interest rate environment will reduce demand for credit products, thereby the Issuer's interest income could diminish.

(d) Russian military invasion of Ukraine

Russia's military invasion of Ukraine poses significant risks with respect to the Issuer. In many respects, the military conflict has a material adverse effect on the Issuer's operating environment, financial position and results of operations from a number of aspects. The direct negative economic effects include a slowdown in the growth rate of the Hungarian economy, accelerating inflation rates in Hungary and in Europe, a rapid increase in interest rates and funding expenses, and supply disruptions in domestic and international production chains.

The war will increase the risks specific to the Issuer, as described in section 5.4. A deteriorating macroeconomic environment may increase the credit risk of the Issuer, for example via an increased risk of default by customers or due to the increase of foreign exchange risk. (The Issuer's country risk vis-à-vis countries directly involved in a war conflict

and the Issuer's counterparty risk vis-à-vis Russian (Belarus) and Ukrainian counterparties are not significant.)

Due to the war, volatility in the money and capital markets could increase, which will increase the market risk assumed by the Issuer.

As a result of the war, the Issuer's reputational risk culd increase. The Issuer could suffer reputational damage as a result of any press release issued with a negative tone, even if based on misinformation, relating to the financing of any exposure involving Russia or the Russian state, which could have a direct impact on its share price.

The war conflict poses a direct risk on the safe and undisturbed functioning of the European and, in particular, the Hungarian financial infrastructure, which could increase the risk that the Issuer will not be able to meet its payment obligations in a timely manner or to carry out its various business activities due to the disruption of an external or internal IT system.

The war conflict increases the risk of the Issuer breaching an economic or financial sanction imposed, as described in section 5.4(i) taking into account the rapid changes in the political environment and international relations.

There is a risk that the military conflict could be prolonged or spread to other countries, which could increase the likelihood of the risks described above occurring and could have negative consequences on the Issuer's operating environment and financial situation. There is a risk that the military conflict could recur even in the event of a possible easing or cessation of the war conflict in Ukraine.

#### (e) Coronavirus epidemic

The spread of the infectious disease caused by the human coronavirus identified in 2019 (COVID-2019) was declared a pandemic by the World Health Organization on 11 March 2020, which has since subsequently appeared in several waves worldwide. The economies of many countries, including Hungary, have been severely affected by the different waves of the pandemic. At the time of preparing this Exemption Document, the spread of the pandemic has not ceased completely, but it has been significantly reduced both globally and in Hungary, and the World Health Organisation has lifted the international health emergency on 5 May 2023.

In order to mitigate the economic impact of the pandemic, a number of economic measures have been introduced in Hungary, which have a material impact on the Issuer's operations.

In order to mitigate the economic impact of the pandemic, the Government of Hungary has introduced a moratorium on payments and announced different phases of a moratorium on financing provided on a commercial basis between March 2020 and December 2022. During the payment moratorium, it had a negative impact on the credit risk costs of the Issuer. With the exception of the agricultural moratorium, the payment moratorium ended on 31 December 2022.

The Issuer has prepared in advance to deal with the negative impact of the lifting of the payment moratorium and the consequent possible higher default rate of customers by setting up adequate provisions, therefore it considers that the expiry of the moratorium does not pose a particular risk to it, taking into account the significant reduction in the number of customers participating in the moratorium.

The agricultural moratorium introduced by Government Decree 292/2022 (8 August) on the introduction of specific rules on the credit moratorium related to the state of emergency will remain in force until 31 December 2023.

As of 1 January 2022, the Government of Hungary introduced the institution of an interest rate freeze by Government Decree 782/2021 (24 December) on the different application of Act CLXII of 2009 on credit granted to consumers in the state of emergency, according to which, for mortgage credit contracts linked to the reference rate, from 1 January 2022 until 30 June 2022, the reference rate applied by the Bank for mortgage loan contracts concluded at the

reference rate may not be higher than the reference rate set in the contract as of 27 October 2021, notwithstanding the provisions of the law on credits to consumers. The rules should also apply mutatis mutandis to subsidised mortgage loan contracts for consumers that constitute state aid for housing. Government Decree 49/2022 (18 February) amending Government Decree 782/2021 (24 December) on the different application of Act CLXII of 2009 on credit granted to consumers in the state of emergency extended the rules of the interest rate freeze to financial leasing contracts for residential housing provided to consumers. Government Decree 390/2022 (14 October) amending Government Decree 782/2021. (24 December) on the different application of Act CLXII of 2009 on Consumer Loans in a state of danger extended the interest rate freeze until 1 June 2022 and extended it to non-interest-subsidised mortgage loan contracts with fixed interest rates for interest periods of up to five years from 1 January 2022.

The Government of Hungary has extended the institution of interest rate freeze for consumers in several steps until 31 December 2023.

The Government Decree 415/2022 (26 October) introduced the institution of the 'interest rate freeze' also in respect of HUF-based variable-rate credit and loan contracts (except for credit facility contracts related to payment accounts) and financial leasing contracts, which are commercially granted to debtors qualifying as SMEs under the Act on Small and Medium-Sized Enterprises and Support for their Development, and which are not covered by state aid. According to the provisions, the reference interest rate applied by the Bank to contracts linked to the reference interest rate may not be higher than the reference interest rate contractually fixed on 28 June 2022.

The Government of Hungary has extended the institution of interest rate freeze for SMEs until 31 December 2023.

The institution of the interest rate freeze has an adverse effect on the interest income and profitability of the Issuer. There is a risk of a sudden and large increase in the repayment rate of the loans concerned for customers in the event of the expiry or withdrawal of the interest rate freeze and a higher proportion of customers become defaulters, as a result of which the credit risk and credit risk costs of the Issuer may increase.

Taking into account the circumstances prevailing at the time of the preparation of this Exemption Document and the termination of the international health emergency by the World Health Organisation, the Issuer considers the risks arising from a possible recurrence of a pandemic or the emergence of new pandemic waves to be less severe than in the past, which, if it were to occur, could lead to a recurrence of the previous very negative economic effects and direct economic restrictive measures.

In the event of a new severe outbreak of the coronavirus, there is a risk that it would have a significant negative impact on the performance of the European economy, including the Hungarian economy, and on the immediate operational environment of the Issuer. If another wave of the pandemic were to occur, some sectors to which the Issuer is lending could again suffer direct restrictive measures, while supply chains in other sectors could be disrupted. Taking these risks into account, the impact of a renewed intensification of the pandemic could lead to an increase in the number of corporate bankruptcies and unemployment rates, and a decrease in the income realised by some economic agents, which would increase the credit risk of the Issuer. A sudden and severe resurgence of a coronavirus pandemic could lead to turbulence in the financial markets and the Issuer's market risk could be greatly increased. The impact of a coronavirus pandemic could force the Issuer to change its operational activities (e.g. security measures to limit infection, forced home-office type working), as a consequence of which its operational risk could increase. The risk exists that, in order to mitigate future economic damage caused by a possible recurrence of a pandemic, the Government could in the future introduce measures that could have a direct negative impact on the Issuer's financial position or increase the level of risk specific to the Issuer.

5.2 Risk factors relating to equity securities

#### (a) Equity market risk

The Hungarian equity market is highly dependent on international market developments due to its openness and relatively small size. The performance of the Hungarian equity market is affected by international, and in particular European, capital and financial market movements, which may result in exchange rate movements not related to the performance of the Issuer or the Hungarian economy. The development of the Issuer's share price could also be significantly influenced by the Hungarian country risk and investors' perception of the country.

(b) Risk of exchange rate movements

The price of the Issuer's shares on the BSE is driven by changes in market supply and demand and may therefore fluctuate in unpredictable directions and to unpredictable degrees. In the future, the share price could increase or decrease depending on changes in the market, the Issuer's performance, the Issuer's future growth prospects, the subjective perception of investors, the risk perception of Hungary and other factors.

(c) Risk of changes in tax rules

The laws concerning the taxation of foreign exchange rate gains, dividends and other income in respect of the Issuer's shares and transactions involving the shares, as well as the laws in force on the date of this Exemption Document may change in the future, even to the detriment of investors.

(d) Risk of dividend payment

The General Meeting determines the proportions to be allocated to the generation of retained earnings and to the payment of dividends of the Issuer's profits after tax disclosed for the year, the amount to be allocated from retained earnings to the payment of dividends and the amount of dividends payable. It cannot be excluded that, although the Issuer possesses assets available for distribution as dividends, the majority of shareholders will decide at the general meeting not to pay dividends. With regard to the payment of dividends (and the amount thereof), an additional risk is that legal, regulatory or other factors may come into force that would make it impossible to pay dividends or that, upon the payment of dividends, would jeopardise the ability of the Issuer or the bank group controlled by them to achieve its strategic growth plan.

(e) Lack of liquidity and of a secondary market.

There can be no assurance that secondary market trading will develop in the Issuer's shares following the listing of the New Shares on the BSE. There can also be no assurance that the secondary market trading that develops will provide adequate liquidity. In such a case, shareholders may have only limited opportunities to sell their shares or may be able to sell them on less favourable terms than comparable securities with adequate liquidity. A less liquid market may have an adverse effect on the price of the Issuer's shares. The emergence of larger sellers may cause a significant decline in the price, the number of sellers and buyers at a given time may be limited, the number of shares to be sold and purchased may be limited, and the volatility of the price may increase.

(f) Risk of the suspension of trading

T

The Issuer is required to disclose information and data that significantly affect the Issuer's activities and business in accordance with the applicable legal regulations, and the disclosure of such information or failure to comply with the disclosure obligations could result in the price of the Shares fluctuating more than as usual and in the suspension of trading in the Shares in the cases specified in Act CXX of 2001 on Capital Markets ("**Capital Markets Act**") and the General Terms and Conditions of the BSE.

(g) Risk of the lack of exchange rate stabilisation

In connection with the introduction of the New Shares on the BSE, there will be no organised stabilisation of trading in the Issuer's shares.

(h) Changes in legislation

The shares of the Issuer and the ownership rights that may be exercised in relation to the shares are governed by Hungarian laws in force at the time. Accordingly, it cannot be ruled out that following the date of signing this Exemption Document there will be a change in legislation that could affect the Issuer's shares and the ownership rights that may be exercised in relation to the shares.

(i) Regulation of investment in shares

Some investors may carry out their investment activities under legislation and other requirements and their such activities may be subject to control and supervision by certain authorities. All prospective shareholders are advised to consult their own legal advisers and to ensure clearly that their investment in shares complies with the laws and regulations applicable to their activities.

(j) Exit risk

Public companies listed on the BSE may be delisted from the BSE and converted into private limited companies in accordance with the legislation in force at the time. There can be no guarantee that in the future, one or more of the jointly controlling shareholders will not decide to de-list the Issuer's shares from the BSE. If the shares are de-listed, their turnover in the OTC market may be extremely limited.

(k) Shareholder dilution risk

In the event of a future capital increase, if the shareholder does not acquire any of the newly issued shares, his/her ownership interest in the Issuer will be reduced.

(I) Risk of control by shareholders possessing qualifying holdings

It cannot be excluded that the interests of a shareholder possessing a qualifying holding will not always coincide with those of the minority. The price of the Issuer's shares may be significantly affected by possible increased sales of shares by shareholders holding a controlling interest, either directly or through their affiliates.

(m) Lack of asset insurance

The price of the Issuer's shares is not covered by the National Deposit Insurance Fund (or other similar insurance, such as the Investor Protection Fund) and therefore no other third party can be relied on for indemnification in the event of a loss of price or other loss in relation to the shares. Shareholders may lose all or part of the value of their investments in the event of the Issuer's insolvency.

(n) Termination of the Issuer

Adverse situations may arise in the course of the Issuer's operation, which may lead to the termination of the Issuer. In such a case, investors may receive their share of the capital remaining after the discharge of obligations and the costs of termination for their investment.

(o) Risk of incorrect or delayed disclosure

The Board of Directors of the Issuer shall use its best endeavours to satisfy all of the Issuer's disclosure requirements, in compliance with all laws and recommendations from the authorities, taking into account those described in the relevant internal regulations of the Issuer. Due to human error or technical failure, these disclosures could be delayed, which could have a negative impact on investment decisions regarding the Issuer's shares.

#### 5.3 Risk factors relating to the transaction (i.e. the Merger by Acquisition)

In the Issuer's views, the main risk factors associated with the transaction, i.e. the Merger by Acquisition, arise primarily from the changes occurring in the Issuer's operations in the course of the merger process. During the merger process (i.e. the envisaged organisational and operational integration), the Issuer's operational and reputational risks may increase, which may result in a loss of customers, cause financial losses to the Issuer and lead to a decrease in its share price.

During the integration process following the Merger by Acquisition, the various processes and systems of the entities participating will be progressively integrated with those of the Issuer. The integration of some IT systems may require higher expertise, longer time or higher expenses on the part of the Issuer. The Issuer is of the view that the risk of inappropriate information flows may be increased during the systems integration processes. During the development of the integrated IT systems and during the initial period, there may be a higher risk that the Issuer is not able to perform certain business activities or may not be able to perform them properly due to the disruption or temporary failure of an IT system. This may result in loss of reputation, loss of customer satisfaction and loss of customers, which may cause the Issuer to incur losses and the share price to decline.

Throughout the merger process (i.e. the envisaged organisational and operational integration), the Issuer will be subject to increased media attention, which could also increase the Issuer's reputational risks. There is a risk that negative news reports on the Merger by Acquisition, based on factual or even untrue information, could have a material negative impact on the Issuer's share price. Operational risk events occurring in the course of the Merger by Acquisition may receive more than average media attention, and thus the damages suffered by the Issuer may be also higher.

The Issuer believes that stemming from the nature of the merger process uncertainty for customers and other stakeholders could increase. There is a risk of customer churn due to inadequate communication by the Issuer regarding the Merger by Acquisition.

The Merger by Acquisition will be closely and continuously monitored by the supervisory authorities, and in case of non-compliance, the National Bank of Hungary will use the tools at its disposal to address the situation and, if necessary, impose sanctions.

During the merger process, the employees of the Issuer and of the entities involved in the merger may face an increased workload, which could result in an increase in fluctuation There is a risk that the Issuer may lose certain key employees or human resources during the period of the Merger by Acquisition.

In addition to operational and reputation risks, the Issuer will also face other types of risks during the merger process.

As part of the merger process, the portfolio elements of the entities involved in the merger will become part of the Issuer's portfolio. There is a risk that the Issuer may not have the necessary prior expertise to manage certain portfolio elements requiring special expertise. Some of the Issuer's existing IT systems may temporarily be unable to properly manage certain Portfolio Items transferred. The risks associated with the transfer of portfolio items will be mitigated by the transfer to the Issuer of employees in senior management positions and employees of the entities involved in the Merger by Acquisition, and of valuable information relating to the transferred portfolios and customer relationships.

There is a risk that the costs of the Merger may exceed the level prospected and there is a risk that the cost synergies estimated in the merger process may not be realised at the time or to the extent proposed, which could adversely affect the Issuer's financial results and reduce its share price. During and as a result of the merger process, the Issuer intends to leverage its competitive advantages through a renewed business strategy. There is a risk that the business strategy designed in accordance with the merger process will not allow the full achievement of the business objectives.

The Issuer has prepared to manage the risks arising from the transaction by thoroughly preparing the merger process, involving the appropriate specific expertise and detailed planning, and manages the risks by continuously re-measuring the results and implementing the necessary corrections on an

ongoing basis. The Issuer has established the governance bodies and control functions that are capable of effectively managing the risks arising from the transaction. The Issuer has appropriate business continuity plans in place in the event of a disruption or failure of individual IT systems, which will act as a roadmap to overcome system failures.

#### 5.4 Risks specific to the Issuer

The Issuer shall conduct at least once a year a risk self-assessment in relation to its own risks and those of the bank group it manages. In that context, the Issuer identifies, structures and assesses the categories of risks that could threaten the achievement of its business objectives (Risk Map).

(a) Credit risk

Credit risk is the risk of losses affecting the profitability and capital position of the Issuer resulting from the non-performance (or performance not in compliance with the contractual terms) on the part of its contractual counterparties' payment obligations arising from loans, deferred financial performance or other credit-related legal relationships, i.e. from the failure to meet its obligations towards the Issuer.

Credit risk is the most significant type of risk in terms of volume with respect to the Issuer.

The Issuer's credit risk assumption policy is conservative, with long-term, stable, prudent and profitable operations in its focus.

The Issuer manages credit risk through measures, procedures and capital requirements. The Issuer's credit risk management strategy is implemented along the following basic processes:

- setting limits, setting credit approval limits,
- the use of credit risk mitigation techniques,
- debtor rating
- Decision on credit risk assumption setting up and compliance with an order of adopting decisions,
- Monitoring and reporting processes,
- Impairment processes,
- Recovery processes,
- Compliance with capital limits

The above measures and procedures serving credit risk management are described below.

(i) Limit scheme

Credit risk is managed by limiting the risks that may be assumed at the level of the customer and customer group. A limit is a maximum amount and a set of conditions of risk taking, which can apply to a single client or to a customer group consisting of two or more clients. The risk strategy comprises limits on the quality and composition of the portfolio, which shall be respected in order to keep the risks at the desired level.

(ii) Credit risk mitigation techniques and monitoring

The Issuer uses credit risk hedging to mitigate credit risk. Some of these may also be taken into account as a capital requirement reduction factor under the CRR. Comprehensive regulations for the eligibility, assessment as well as the periodic reassessment and enforcement of the various collaterals were developed in accordance with legislative and supervisory requirements, taking into account the economic situation and market characteristics.

(iii) Customer rating

Customer rating is carried out with respect to all customers, with respect to which the Issuer undertakes a risk, before a limit is set or a commitment decision is made. The Issuer uses external and internal ratings (rating, scoring) as part of its credit scoring and risk management system, and credit risk may only be taken if there is a valid limit and an appropriate customer rating.

(iv) Decision on taking credit risk

In order to manage risk appropriately, the Issuer assigns different risk-taking decision levels to different types of transactions, customers and to the various levels of risk-taking and coverage, which are set out in internal regulations. The principle of double control is applied in the approval process at all times.

(v) Monitoring processes

The monitoring activities of the Issuer shall include customer, transaction and collateral monitoring, resulting in the updating of the type of customer treatment. The issuer continuously monitors the performance of the credit portfolio, the behaviour of customers and the default rate.

(vi) Transaction rating and impairment processes

In order to set off losses expected from outstanding debt and off-balance sheet commitments, the Issuer sets up appropriate levels of impairment and provisions and accounts for impairment. The principles and procedures for provisioning are set out in accounting regulations.

(vii) Recovery activities

In order to minimise credit losses, the Issuer shall maintain early and past due (workout) recovery activities. Properly managed recovery activities increase the expected return and will thus reduce expected losses in the event of non-performance.

(viii) Capital requirement calculation

The Issuer determines the capital requirement for credit risk using the standardised approach regulated by the CRR.

Notwithstanding the credit risk mitigation and management methods applied by the Issuer, there is a risk of default on the part of contractual partners, which could have a negative impact on the Issuer's financial position. Adverse changes in the financial situation and creditworthiness of counterparties may adversely affect the quality of the credit portfolio and may require additional provisioning, which could have a negative impact on the Issuer's business performance.

A significant portion of the assets held by the Issuer represent credit risk exposure vis-à-vis the Hungarian State. Any deterioration in Hungary's debtor rating or any possible increase in the credit risk premiums taken into account in the market pricing of securities could have a material adverse effect on the Issuer's capital position.

The Issuer's financial position depends on the degree of concentration of its credit portfolio (e.g. concentration vis-à-vis a single customer/customer group, as well as concentration by industry, sector, geography, currency or product/product group). There is a risk that excessive concentration in the credit portfolio will result in losses for the Issuer.

The Issuer has primarily identified the additional credit risk sub-types described below in connection with its lending activities that may affect its financial position. The Issuer does not individually consider the credit risk sub-types listed below to be risks that could have a material effect on its financial position. The following risks are managed by the Issuer through appropriate procedures (e.g. limit system, internal processes, policies, regulations, rules of procedures) and the relevant risks are covered by capital under Credit Risk.

- (A) Participation Risk: The Issuer establishes its long-term investments representing ownership rights (participations), in order to achieve its strategic and business policy objectives, to support its activities and to ensure its longterm profitability, while taking into account and managing the relevant risks.
- (B) Other assets risk: Under other assets risks, the Issuer manages the risks arising from non-credit relevant receivables (mainly real estates, tangible assets, other receivables).
- (C) Counterparty risk and Credit Valuation Adjustment (CVA) risk: Counterparty risk is the risk of a potential loss arising from the failure of a counterparty to a transaction to meet its contractual obligations before the closing of the transaction (the final settlement of cash flows). This risk, as a type of credit risk, affects derivatives and repurchase and other securities financing transactions.

The credit valuation adjustment (CVA) is an adjustment to the mid-market value of the portfolio of transactions entered into with the counterparty. This adjustment reflects the current market value of the institution's credit risk exposure to the counterparty, but does not reflect the current market value of the counterparty's credit risk exposure to the institution.

- (D) Country risk Country risk is the risk of loss arising due to an event occurring in a given country, which is under the control of that country (its government) but beyond the control of the Issuer.
- (E) Dilution risk: Dilution risk is the risk that the recoverable amount of receivables could be reduced through cash or non-cash credits to the obligor;
- (F) Settlement risk: Settlement risk is the risk that a counterparty to a transaction fails to perform its delivery/payment obligation at the time of settlement or fails to perform as contractually agreed, which may result in a financial loss to the Issuer.
- (G) Open delivery risk: Open delivery risk arises with respect to sale and purchase transactions involving securities, foreign exchange, commodities or their derivative instruments when the Issuer irrevocably performs its contractual obligation with no performance yet on the part of the other party. In this case, the unilateral performance by the Issuer gives rise to a credit relationship where the defaulting party is the debtor.
- (H) Residual risk: Residual risk is the risk of a substantial devaluation or limited enforceability of the collateral underlying credit exposures. Residual risk is the risk that recognised credit risk mitigation techniques used by the Issuer prove less effective than expected.
- (I) Foreign currency lending risk: Foreign currency lending risk is the potential risk of loss arising from lending in a currency other than the legal tender of the country in which the Issuer is domiciled.
- (J) White label risk: A service contract where an investment service provider purchases a fully supported product from a third party and then sells it under its own brand. As no legal obligation is created between the customers and the third party, the positions of each customer are recorded in sub-accounts opened under a customer account in the name of the investment firm. The

investment firm is the customer of the third party service provider. The thirdparty service provider is able to segregate the positions and collaterals of the clients, but for open positions it manages the clients' assets eligible to serve as collateral together. As a consequence, if the negative balance of lossmaking clients is greater than the profit of gain-making clients, the third party service provider does not issue the profits of gain-making clients because of the combined collateral management, because it treats the negative balance of loss-making clients as a receivable vis-a-vis the investment service provider.

- (K) Model risk: Model risk is the risk that the models used by the Issuer for measuring risks and quantifying capital requirements underestimate the true extent of the risks and the actual capital requirements.
- (b) Market risk:

The Issuer is present and takes market risk through its business activities in many segments of the financial markets. A possible shock in the financial markets could result in a reduction in the ability and willingness of operators in the financial markets to enter into transactions, thereby widening market price quotations and reducing or in extreme cases, eliminating market liquidity, causing the Issuer to be unable to renew its existing transactions serving risk management or enter into additional transactions, which could have a material adverse effect on its profitability, liquidity and capital position.

(i) Interest rate risk

The objective of interest rate risk management activities is to minimise the adverse impact of changes in market interest rates on the Issuer's interest margin, net interest income and the market value of the portfolio. Even using the risk management techniques employed, there can be no absolute certainty that interest rate risk will not have an adverse effect on the Issuer's financial position in the future.

(ii) Exchange rate risk

The Issuer is exposed to foreign exchange rate risk with respect to financial instruments denominated in foreign currencies held by the Issuer. The objective of managing foreign exchange rate risk is to mitigate the adverse effect of fluctuations in foreign exchange rates on the market value of foreign currency denominated financial instruments. Nevertheless, even with the most prudent practices applied, there can be no guarantee that exchange rate risk will not have an adverse effect on the Issuer's financial position in the future.

(iii) Risk of raising financing through the issue of bonds

The Issuer may finance part of its financing requirements by issuing bonds. If the Issuer obtains financing through bond issues, there is a risk that a possible increase in the interest rate environment could increase the Issuer's financing expenses. This may have an adverse effect on its business activities and have a negative impact on its results of operations, which may result in a decrease in its share price.

(c) Liquidity risk:

Liquidity risk is the risk that cash flows are insufficient for financing operations or to meet obligations in a timely manner and on a cost-effective basis. The coordination of the maturities of assets and liabilities is an essential element of liquidity management. No assurance can be given that the effects of maturity mismatches will not have an adverse effect on the Issuer's financial position in the future.

#### (d) Operational risk

Operational risk is the risk of losses resulting from human error, system failure, inadequate or faulty internal processes, possible fraud or abuse on the part of bank employees, customers or third parties, or external events, and includes legal risk, business management risk, modelling risk, information and communication technology risk and reputation risk.

Operational risks can occur in any banking process. The Issuer has established appropriate procedures and controls to identify and manage operational risks in a timely manner.

Nevertheless, there is a risk that, for any reason (including fraud, abuse or external events), the procedures and controls employed by the Issuer could prove inadequate to identify or prevent an operational risk from occurring, which could have a material adverse effect on the Issuer's operations, financial condition and results of operations.

Ongoing merger processes involving the Issuer increase the likelihood of operational risks occurring.

(e) Information technology risk

The performance of the Issuer's activities is fundamentally dependent on the proper functioning of the information technology systems it uses. There is a risk that a disruption to any of the Issuer's IT systems in use could have a material adverse effect on the performance of its activities or render the same completely inoperable, thereby adversely affecting the Issuer's operations, financial situation and profitability.

(f) Risks arising from changes in the ownership structure

Significant changes in the ownership structure may affect the Issuer's business strategy and, through the implementation thereof, its normal course of business and operations, which may entail the risk of reduced profitability.

(g) Risks arising from changes in the governance structure and group structure

During the merger process under way in the MBH Group, the group structure is going through significant changes, which may also induce changes in the governance structure. Significant changes occurring in the group structure and governance structure may have an impact on the efficiency of the Issuer's management and decision-making processes, its business strategy and, through the implementation of this strategy, its normal course of business and operations, which may entail a risk of a reduction in profitability.

In order to mitigate the risks arising from changes in governance structure and group structure, the Issuer has elaborated a uniform governance system, which has resulted in a standardised committee, organisational and management structure at group management level.

The Issuer is subject to Act No. XXXVII of 2014 on the Further Development of the Institutional Framework Strengthening the Security of Certain Operators in the Financial Intermediation System (the "**Resolution Act**"). The National Bank of Hungary, acting in its capacity as resolution authority, is entitled to exercise the rights and authorities of the owners and senior executives of the institution under resolution under the Resolution Act (Section 84 (b)).

The share is the primary loss-bearing instrument, in the event that the Issuer faces a crisis situation or is subjected to resolution proceedings, losses incurred are primarily borne by the shareholders, in the event of insolvency proceedings, the instruments rank behind all other claims in the order of priority of the repayment of claims.

(h) Risk of changes in the regulatory environment

The risk arising from the change in the regulatory environment is the risk directly or indirectly affecting capital or profitability, arising from changes in existing legislation or rules imposed by

international or national authorities applicable to the Issuer or from the imposition of new regulations.

The Issuer manages the risk arising from changes in the regulatory environment by continuously monitoring and monitoring potential future changes in the regulatory environment and by quantifying the effects of potential changes where possible.

Nevertheless, changes in the regulatory environment or in the practice of the authorities in applying the law may occur that the Issuer has not previously identified or been able to prepare for sufficiently, and thus changes in the regulatory environment could have an adverse effect on the Issuer's financial position, profitability or business opportunities.

(i) Risks related to changes in tax rules

Within the risk of changes in the regulatory environment, the relevant risks identified are those related to changes in tax rules, which, if they were to occur, could have a material impact on the Issuer's financial position. The Issuer is subject to a variety of tax liabilities in the performance of its activities. It cannot be excluded that possible changes in tax legislation (e.g. the imposition of new tax types, increases in the rates of existing tax types, a reduction in the scope of a tax relief or changes in the interpretation of tax legislation) could prove to be detrimental to the Issuer. There can be no assurance that tax regulations will not change in the future in a less favourable direction which could adversely affect the Issuer's financial position. Of these, of particular importance to the Issuer are changes in the rate of corporate income tax, the introduction of potential new tax types, potential changes in the taxation of dividends received, changes in the accounting treatment of expenses recognised as interest, the taxation of foreign exchange gains, and changes in capital market transaction tax.

An adverse change in tax rules for the Issuer could have a material adverse effect on its operations, financial position and results of operations.

(ii) Risks related to changes in the capital adequacy requirements in force

Within the risk of changes in the regulatory environment, risks related to changes in capital adequacy requirements can be identified as a relevant risk. The Issuer identifies its risks in accordance with domestic and international legislation and regularly assesses these risks in its internal capital adequacy process. In identifying and managing risks, the Issuer complies with those set forth in Directive 2013/36/EU on access to the activity of credit institutions and the prudential supervision of credit institutions ("CRD"), the CRR and the Act on Credit Institutions, as well as the requirements of the National Bank of Hungary, and in its risk management it takes into account the guidelines of the HNB and the relevant European Banking Authority (EBA) guidelines. Nevertheless, there is a risk that regulatory authorities may in the future amend capital adequacy legislation or that regulators issue interpretations of such legislation that could have a material adverse effect on the Issuer's financial position and results of operations.

(iii) Political risks

As a Hungarian entity, the Issuer is exposed to domestic political risks. Political changes may, due to their secondary effects, cause significant changes in the business environment and thus in the Issuer's financial position.

(i) Risk of violation of legislation or economic or financial sanctions

The Issuer is required to comply with applicable laws at all times in the conduct of its business. In addition, the Issuer's activities may be restricted by economic or financial sanctions imposed by the Hungarian State or by other states, national or international authorities or certain international organisations on an entity or economic operator.

The Issuer is subject to regular supervisory control and is required to regularly provide data to the National Bank of Hungary as supervisory authority. The National Bank of Hungary, as the supervisory authority, may apply a wide array of legal consequences and sanctions, including the imposition of fines and, in serious cases, the suspension or revocation of the operating licence, in the event that the Issuer's operation is law-infringing or if it perceives a significant risk that the Issuer will not comply with its obligations.

There is a risk that, despite the internal policies, procedures and internal control functions in place, the Issuer or one of its stakeholders (e.g. shareholder, person in senior executive position, employee, business partner) may act in violation of applicable laws or economic and financial sanctions imposed, for which the Issuer may be held liable.

Legal proceedings or investigations by public authorities relating to actual or suspected breaches of applicable laws or economic and financial sanctions may result in the imposition of financial penalties, restrictions on business activities or even the withdrawal of the Issuer's licence, which may have a significant adverse effect on its reputation, business activities or financial position.

(i) Risks arising from litigation, claims and administrative proceedings

The Issuer is exposed to a number of legal proceedings that could arise from litigation, arbitration and administrative proceedings that are under way or to be commenced in the future. With respect to other proceedings, the Issuer does not expect that any pending litigation or administrative proceeding to which it is a party will have a material adverse effect on its financial position. However, no assurance can be given that any such litigation or administrative proceeding that has been or may be instituted in the future will not have an adverse effect on its financial position.

In the future, the possibility cannot be completely excluded that potential claims against the Issuer may be asserted by persons entitled to do so, even if on a non-contentious basis. In such a case, the Issuer may incur significant expenses related to the conduct of the proceedings and negotiations, and confidence in the Issuer could be weakened, which could have a negative impact on its operations and business.

(ii) Risk of financing activities related to money laundering or terrorism

The Issuer actively combats money laundering and terrorist financing and is involved in efforts to prevent, deter and detect economic crime, using the means at its disposal both on a domestic and international level.

The Issuer makes every effort, in elaborating and applying its internal processes, to identify and detect customers or transactions that may be connected in any way with any activity related to money laundering or terrorism. To this end, in the course of customer identification, the Issuer requests information from its customers in accordance with the law, in order to establish their true identity and their true intentions.

The issuer has an anti-money laundering and anti-terrorist financing policy in place, which sets out the mandatory guidelines and minimum standards to be followed at group level.

Despite the internal processes in place and the efforts to fully comply with the relevant legislation, the risk cannot be excluded that a customer may mislead the Issuer by providing misleading information and concealing its true activities, which could result in litigation or investigation by the authorities, the imposition of financial penalties, restrictions on business activities and even the withdrawal of the Issuer's licence. Violation of any of these rules may have serious legal and financial consequences and the suspicion of violation involves additional reputation risks.

(j) Risks inherent in the withdrawal of the authorisations necessary for the Issuer to operate.

Authorisations necessary for the Issuer's operation may be withdrawn by the competent supervisory authority in cases provided for by the relevant legislation, for example where the Issuer engages in activities prohibited by law or no longer complies with the legal requirements of prudent operation. The withdrawal of operating licenses for any reason may have a material adverse effect on the Issuer's business, results of operations or financial position, as, in the absence of such licenses, it may not be entitled to continue its activities subject to licensing.

(k) Risks related to new technologies

There can be no assurance that the Issuer will not suffer losses or competitive disadvantage in the future as a result of not adapting new technological solutions in a timely or appropriate manner. Potential changes in consumer habits could have a negative impact on commission income and liquidity, borrowing and savings through payment services. Changes in consumer habits concerning credit institutions may have a negative impact on profitability and liquidity through the potential weakening or loss of existing customer relationships and increased difficulties in building new customer relationships.

5.5 Risk management mechanisms of the Issuer

The mechanisms for managing the risks specific to the issuer are set out in section 5.4.

The Issuer operates a comprehensive risk assessment and risk control system in compliance with legislative requirements and supervisory expectations, over which there is multi-level control prevailing. The most important of these are:

- ultimate control on the level of the Board of Directors;
- independent control separate from the fields assuming risks; and
- appropriate measurement, diversification, monitoring and reporting of risks.

A framework approved by the executive board and reviewed regularly, ensures the adequacy of the risk management system, providing assurance that the risk management system in place is appropriate with respect to the Issuer's profile and strategy. Internal policies and limits ensure an appropriate diversification of risks, whereas processes are elaborated to create the conditions for effective risk measurement at transaction, client and portfolio level. The risk management system adequately serves the identification, measurement and effective management of risks in terms of the risk profile and the Risk Strategy.

The Board of Directors and the Supervisory Board are on the highest level of risk management from an organisational point of view. At the highest level, the Supervisory Board monitors the prudent operation of the Issuer. The Board of Directors is the management body of the Issuer, is responsible for tasks pertaining to the management of the Issuer and for the proper keeping of the books of the Issuer.

The risk management mechanisms are presented in the order of the main types of risks specific to the Issuer.

(a) Credit risk

The Issuer's Risk Control or Risk Management areas (collectively "RA"), which are independent of the Issuer's business areas, oversee all lending activities and manage the Issuer's overall credit exposure. RAs are responsible for the development of credit assessment policies, standards, limits and guidelines in order to determine, measure and monitor the extent of credit risk. They monitor and verify compliance with the limits established. They monitor major changes in the creditworthiness of customers and may propose changes to the Issuer's overall strategy and update credit risk management procedures and limits accordingly. All relationship managers involved in lending to customers are responsible for credit risk management focuses on assessing and monitoring the likelihood whether the client will be able to meet its obligations from the expected financial resources. This includes, in the case of collateralised transactions, checks whether the required level of collateralisation is

maintained. The Issuer monitors its credit transactions on a regular basis and decides on the necessary impairment provisioning accordingly.

(b) Market risk:

The Issuer's Asset - Liability Committee is responsible for elaborating and regularly reviewing the basic principles, the measurement methodology, the limit system of market risk management (including both trading and non-trading book market risks), the related authority and decision-making mechanisms, procedures for managing limits exceeded and for submitting proposals to the Board of Directors It continuously monitors the trends in market risks and limit utilisation through regular reporting and analysis, and determines the necessary measures in case limits are exceeded.

The Issuer's Risk Control function areas, as supporting areas of the Asset and Liability Committee, independent of the business areas, perform control functions at operational level and are responsible for risk control. They ensure the regular monitoring of compliance with statutory requirements, set up and monitor a system of limits that is binding for all risk-taking areas. The limits system established includes foreign exchange position limits, volume limits, Pillar 1 and Pillar 2 capital limits, banking book interest rate risk income limits, economic value limits and loss limits. In addition, the daily tasks of the area are the operation and development of the risk management system with a view to measure interest rate, foreign exchange and equity risk, and to identify and analyse on a daily basis extraordinary situations and quantify the impact of potential adverse market events (e.g. unusual exchange rate movements, illiquidity).

The Issuer's money and capital markets areas are responsible for the operational management of trading book market risk and foreign exchange risk, while the asset and liability management areas are responsible for the operational management of banking book interest rate risk.

(c) Liquidity risk:

Liquidity risk is the risk that the Issuer's cash flows are insufficient for financing its operations or for meeting its obligations on a timely and cost-effective basis. The coordination of the maturities of assets and liabilities is an essential element of liquidity management. The ability of the Issuer to generate cash inflows from liquid assets or other sources as guickly as possible is quantified in the liquidity coverage potential. The Issuer is required to cover the cumulative liquidity mismatches measured in the gap analysis with sufficient liquidity coverage potential (limit) over an appropriate period of time, assuming bank-specific, general market and combined stress scenarios, thus ensuring future liquidity. The Issuer seeks to balance its available resources and their use, while minimising market exposure through the setting and monitoring of various liquidity risk limits and early warning signals, as well as through other risk control mechanisms and product volume limits. The Issuer ensures compliance with external liquidity requirements (minimum reserve requirements, foreign currency adequacy ratio, foreign currency balance ratio, liquidity coverage ratio, net stable funding ratio, interbank funding ratio, mortgage funding adequacy ratio) by integrating external requirements into an internal limit system. Liquidity risk exposure is limited by the regulations elaborated by the Board of Directors, which impose limits on liquidity ratios and regulate the requirements for holding liquid assets. At the operational level, liquidity risk is managed by the Issuer's asset and liability management area. Liquidity requirements imposed by international and domestic regulations are closely monitored by the Issuer, liquidity ratios are regularly quantified and annual planning is performed taking into account the minimum requirements.

(d) Operational risk

The Issuer's fundamental objective is to create an operating environment that seeks to minimise the number of unexpected events and minimising operational risks. As a guiding principle, operational risk mitigation factors should be built into core business processes. It is a basic requirement that the cost of protection against operational risks should not exceed the size of the potential losses.

The Issuer operates a qualitative and quantitative operational risk management framework, the main tools of which are as follows:

- Decentralised internal loss data collection based on uniform rules and principles;
- Defining, collecting and monitoring key risk indicators (KRIs) that show changes in the level of risk;
- Regularly performed risk self-assessments with a view to identify activities involving high residual risk and to re-check the adequacy of the controls in place to allow the elaboration of risk mitigation measures;
- Scenario analysis in order to quantify rare but high impact loss events that have not yet been identified in the course of loss data collection but have the potential to occur in the future;
- Identification and analysis of process-related risks and controls and the improvement of process effectiveness (process-based risk management activity);
- Raising risk awareness through training and workshops held;
- Developing a product inventory to record the main product groups distributed; and
- Establishing a model inventory, which provides a comprehensive and clear picture of the models used and provides an opportunity to identify and mitigate potential operational risks that could cause losses to the Issuer in the future.

## 6 Documents available for inspection

The following documents are available for consultation by anyone at the web page <u>https://www.mbhbank.hu/befektetoi</u> for 12 months following the publication of the Exemption Document:

- (a) The Issuer's Articles of Association in force,
- (b) all reports, letters and other documents, historical financial information, valuations or statements prepared by experts at the request of the Issuer, parts of which are included or referred to in this Exemption Document;
- (c) all reports, letters and other documents, valuations or statements prepared in connection with the Merger by Acquisition in accordance with Directive 2004/25/EC or Directive (EU) 2017/1132, which are not covered by sub-paragraphs (a) or (b) of this paragraph or any other paragraph of this Annex.

## Annex 1- Business valuation report

MBH Bank Nyrt. shall ensure that the information contained in the Company Measurement Report is made available to those entitled to do so only in the form of on-site inspection, taking into account the protection of sensitive information contained in the swap ratio assessment. MBH Bank Nyrt. shall bear any costs associated with the inspection.

Site of inspection: 1117 Budapest, Magyar Tudósok körútja 9. Building G.

Time of inspection: between 09:00 and 15:00 hours on working days.

Appointment is required for inspection: investorrelations@mbhbank.hu

Annex 2– Individual final lists of assets and liabilities and property inventories prepared regarding the Merging Companies and the report prepared by independent auditor on the same

### **INDEPENDENT AUDITOR'S REPORT**

### To the shareholders of MBH Bank Nyrt. (formerly: MKB Bank Nyrt.)

#### Opinion

We have carried out the audit of the enclosed interim balance sheet as at 30 April 2023 of MBH Bank Nyrt. (the "Company") in which the matching grand total of the total assets and the total capital and liabilities is HUF 7,265,168 million and the comprehensive income during the entire period is a profit of HUF 26,826 million.

In our view the interim balance sheet has, in all relevant aspects been prepared in accordance with the provisions laid down in Section 21 and Section 114/A of Act C of 2000 on Accounting (hereinafter: "Accounting Act") in force in Hungary.

### The basis of the opinion

Our audit was carried out in accordance with the Hungarian National Audit Standards and the laws and other legal regulations on auditing in force in Hungary. Our responsibility under these standards is described in more detail under the heading "The auditor's responsibility for the audit of the interim balance sheet".

We are independent of the Company, in accordance with the applicable legal regulations in force in Hungary according to the Chamber of Hungarian Auditors' regulation "Code of conduct (ethics) of the auditor profession and its regulation on disciplinary proceedings" as well as, regarding matters not regulated in these, the "International Code of Ethics for Professional Accountants (including International Independence Standards)" (the IESBA Code) and we also comply with other rules of ethics specified in the same standards.

We are convinced that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### Other matters – The basis of the preparation of the opinion

The interim balance sheet was prepared exclusively in relation to the Company's transformation.

The interim balance sheet does not contain all of the financial statements contained in the International Financial Reporting Standards ("IFRS") adopted by the European Union and those prescribed in the supplementary requirements pertaining to annual reports prepared in accordance with the IFRS adopted by the EU, and no notes have been prepared regarding it. Consequently, the review of the interim balance sheet does not substitute the reading of the Company's audited financial statements as at 31 December 2022 or the knowledge of the accounting policy applied in the preparation of the interim balance sheet, described in its notes. The interim balance sheet does not, in itself, provide a reliable and true picture of the asset and financial position of MBH Bank Nyrt. as at 30 April 2023. Only financial statements containing all of the prescribed statements, with notes on the material accounting policies and explanations, may provide a reliable and true picture on the Company's asset and income position and cashflow in accordance with the IFRS adopted by the European Union ("EU") and only such statements can be prepared in all relevant aspects in accordance with the supplementary requirements of the Accounting Act pertaining to annual reports prepared in accordance with the IFRS adopted by the European Union.

### **Other matters – Limitation of use**

This report has been prepared exclusively for the shareholders of MBH Bank Nyrt. for the purpose specified in the "Other matters – The basis of the preparation of the opinion" section and shall not be used for any other purpose or by any other person.

# Responsibilities of management and persons in charge of governance for the interim balance sheet

The management is responsible for the preparation of the interim balance sheet in accordance with Sections 21 and 114/A of the Accounting Act and for an internal control function which it considers necessary for the preparation of an interim balance sheet that is free from material misstatements whether due to fraud or error.

In preparing the interim balance sheet, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and for using the going concern basis of accounting in preparing the accounting information, and the management is responsible for applying accounting practices based on the principle of going concern, unless the management intends to terminate the Company or its business activity or when there is no other realistic possibility.

Those in charge of governance are responsible for supervising the Company's financial reporting process.

### The auditor's responsibility for the audit of the interim balance sheet

Our objectives during the audit are to obtain reasonable assurance about whether the interim balance sheet as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high degree of assurance but it does not guarantee that an audit conducted in accordance with the Hungarian National Audit Standards always uncovers any specific existing material misstatement. Misstatements can arise from fraud or error, and they are considered material if, individually or in the aggregate, they could reasonably be expected to influence users' economic decisions made on the basis of the given interim balance sheet.

Due professional judgement and scepticism are exercised during the whole of the audit carried out in accordance with the Hungarian National Audit Standards. Moreover:

- We identify and assess the risks of material misstatements of the interim balance sheet, whether resulting from fraud or error, prepare and execute auditing procedures that are suitable for the management of such risks and we gather adequate and sufficient audit evidence for use as a basis of our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusions, forgery, intentional omissions, misrepresentations, or the override of internal control.
- We examine the internal control mechanism(s) of relevance to the audit in order to be able to design auditing procedures that are adequate in the given circumstances but not in order to express our opinion on the efficiency and effectiveness of the Company's internal control function.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Draw conclusions on the appropriateness of management's use of the going concern basis of accounting, and based on the audit evidence obtained, whether a material uncertainty exists in relation to events or conditions that may give rise to significant doubt regarding the Company's ability to continue as a going concern. In case we conclude that a material uncertainty exists, we are required to draw attention to it in the auditor's report or qualify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. Subsequent events or circumstances may, however, render the Company to be unable to continue its business operations.

• We evaluate the overall presentation, structure and content of the interim balance sheet and whether it presents the underlying transactions and events in accordance with the requirements of the Accounting Act.

To the persons in charge of governance we communicate, inter alia, the planned scope and schedule of the audit and its key findings and conclusions, including any material shortcoming, if any, we have identified in the organisation's internal control function applied by the Company.

# **Separate Business Report 2023**

Zsolt Barna, dr. Chairman of the Board of Directors Chairman Chief Executive Péter Krizsanovich CFO

Budapest, 6th July 2023

## 1. THE HISTORY OF TAKARÉKBANK LTD.

Takarékbank Ltd. is an universal commercial bank.

Takarékbank was formed through the fusion of three savings cooperatives, with Pannon Takarék Bank Ltd. and B3 Takarék Szövetkezet merging into Mohácsi Takarék Bank Ltd. on 30 April 2019, which then changed its name to Takarékbank Ltd. On the same date, the central bank of Takarék Group, MTB Magyar Takarékszövetkezeti Bank Ltd. ("MTB"), transferred its corporate and retail account, deposit, loan and guarantee portfolio to the new Takarékbank.

On 31 October 2019, with further 11 savings cooperatives and 2 banks legally merging, the nearly 5-year process ended, in the course of which almost 120 former savings cooperatives merged to create a single, universal commercial bank with nationwide coverage. All of the clients, employees, the whole branch network, deposit, loan and contract portfolio of every credit institution were taken over by Takarékbank Ltd.

The unified Takarékbank has one of the largest corporate and retail loan and deposit portfolios of the Hungarian banking market. According to the retail business policy, the bank offers complex, innovative financial solutions to families, younger and older residents and economic actors for the most typical life situations without geographical limitations. The Bank further strengthens its positions among micro-, small and mid-sized enterprises, with a key focus on agriculture. As a bank of the communities, it fosters the development of local initiatives and enterprises, their networking and cooperation, and the market entry of start-up businesses. With the largest branch network by far in the country, it continues providing personal consultation, contributes to creating equal opportunities and convergence of the rural regions.

On 15 December, 2020, Magyar Bankholding Ltd. commenced its operations as owner after the significant owners of Budapest Bank Ltd., MKB Bank Plc. and MTB Ltd., with the permission of the Central Bank of Hungary, transferred their shares in the bank to the common holding company. This led to the creation of the second largest banking group in Hungary, in which the Hungarian State has a share of 30.35% through Corvinus Nemzetközi Befektetési Ltd., the current direct owners of MKB have a share 31.96%, while the current direct owners of MKB have a share 31.96%, while the current direct owners of MKB have a share of MBH was appointed, and the development of the five-year strategy of the new group was initiated and, on 18 March 2021, adopted by the Board of Directors and the Supervisory Board.

On 15 December 2021, the supreme bodies of MKB Bank, Budapest Bank and Magyar Takarék Bankholding Zrt., which owns MTB, approved the first step of the merger timetable of Budapest Bank, MKB Bank and the MTB. According to the merger schedule, based on the relevant decisions of the supreme bodies and subject to the necessary regulatory permits, the two member banks of Magyar Bankholding Zrt., Budapest Bank Zrt. and MKB Bank Nyrt., as well as Magyar Takarék Bankholding Zrt. merged on 31 March 2022. As a result of the merger, Budapest Bank was merged into MKB Bank and MTB Bank Zrt. continues to operate as a subsidiary bank of the merged bank. The merged bank, created on 31 March, became the group leader and temporarily operates under the name MKB Bank Nyrt. In the second quarter of 2023 Takarékbank joined the bank merged in the spring of 2022.

Having obtained the necessary preliminary approvals exercised the option provided by law, on 1 April 2022 Takarékbank, as a company to be included in the consolidation of MKB Bank, withdrew from the Integration Organisation, the mandatory institution protection organisation of integrated credit institutions.

# **\* ΤΔΚΔ**ΡΕΚΒΔΝΚ

#### - BUSINESS REPORT 30.04.2023

The Board of Directors adopted the Bank's Strategic Plan for 2023-2027 on 14 September 2022. It confirmed the intention to merge MKB and Takarékbank, emphasised the solutionoriented digital IT system and process improvements, the merger process, and the further development of service quality and value proposition. The new strategy also took into account the rapidly changing economic and regulatory environment.

On 9 December 2022, the supreme bodies of MKB Bank and Takarékbank Zrt. adopted the proposals for the merger of the two member banks as part of the implementation of the second step of merger timetable. According to the decision of the General Meetings, the two member banks of the banking group, MKB Bank Nyrt. and Takarékbank Zrt. merged on 30 April 2023, or, and will then continue to operate under the name MBH Bank Nyrt. with a single brand name and image. On 6 February 2023, the MNB approved the merger of Takarékbank Zrt. into MKB Bank Nyrt. as of 30 April 2023, and the merger has been registered by the Court of Registration.

Upon request of Hungarian Bankholding the National Bank of Hungary with its decision nr. H-EN-I-119/2022. dated on 8 March 2022, revoked the licence issued to Hungarian Bankholding by decision nr. H-EN-I-358/2020. dated 12 June 2020 for operating as a financial holding company with effect from 29 April 2022, and MKB Bank took over the group management function over the banking group after 29 April 2022, based on a new group resolution issued by the National Bank.

Based on the authorisation of the General Meeting, the Board of Directors of Takarékbank decided on 9 December 2022 to increase the share capital of Takarékbank to HUF 186.96 billion. The share capital was increased by the issuance of 867 dematerialised ordinary shares of series 'C' with a nominal value of HUF 100 million each and an issue value of HUF 115,340,254. In the framework of the capital increase MKB Bank took over dematerialised ordinary shares of series of series 'C' with a total issue value of HUF 100,000,000,218, thus MKB Bank acquires a direct holding of 46.37% in Takarékbank, and, subject to the share sale and purchase agreement described in the next section, its share in Takarékbank is 85.72%.

A share sale and purchase agreement was concluded between MKB Bank as buyer and MTB Magyar Takarékszövetkezeti Bank Zrt. as seller, on the basis of which MKB Bank purchased 7,156 dematerialised ordinary shares of series 'A' with a nominal value and issue value of HUF 10 million and 200,000 dematerialised preference shares of series 'B' with a nominal value and issue value of HUF 10,000, including preference shares with dividend rights, issued by Takarékbank and owned by MTB. The share package represents 39.35% of the share capital of Takarékbank, subject to the share capital increase described in the previous section.

The legal merger of Takarékbank Zrt. and MKB Bank Nyrt. took place on 30 April 2023, followed by a groupwide rebranding: The merged bank has been operating under the name MBH Bank Nyrt. since 1st May 2023. With this step the triple bank merger was completed, resulting in Hungary's second largest bank in terms of total assets.

## 2. THE OPERATING (ECONOMIC) ENVIRONMENT OF TAKARÉKBANK

**Federal Reserve** continued the cycle of interest rate hikes in the first quarter of 2023, with a total increase of 50 basis points interest rates during the quarter (the Fed raised the US benchmark interest rate by 25-25 basis points at its meetings in February and March), bringing the US benchmark interest rate to between 4.75% and 5.00% by the end of the first quarter of 2023. In the week of 13th March, the globally reducing risk appetite (due to banking sector developments in US and Switzerland) questioned further Fed rate hikes. According to the Fed's communication, they prioritize achieving inflation target over financial stability, and added recent developments are likely to result in tighter credit conditions. Recent indicators point to modest growth and US economy gradually slowing (2023.Q1 US GDP growth was 1.1% from preceding period, at annual rates). Job creation has been strong (1 million new jobs added

# **«ΤΑΚΑ**ΡΈΚΒΑΝΚ

during Q1), and even though inflation has been decelerating (March 5.0% yoy), it's far from 2% inflation target. The Fed said some additional policy firming may be appropriate and they continue quantitative tightening.

The European Central Bank continued with interest rate hikes in the first quarter of 2023. Accordingly, in February and March the monetary conditions for the euro area were tightened by 50-50 basis points. The total increase of 100 basis points pushed up key refinancing operations rate to 3.50% by the end of the quarter. Inflation reached its peak (March 6.9% y/y) but is still too high and underlying price pressure (core inflation) remained elevated, therefore ECB stand ready to adjust its instruments to ensure that inflation returns to target. From March 2023 onwards, the ECB would no longer reinvest €15 bn per month from its traditional asset purchase program (APP) portfolio, thus also started quantitative tightening in the euro area. ECB said previous interest rate hikes have made their impact in the real economy (tighter credit conditions). As for the market turbulence in March, ECB stood ready to respond as necessary to preserve price stability and financial stability in the euro area, but emphasized its main mandate is to ensure that inflation returns to medium-term target.

The National Bank of Hungary (NBH) not changed monetary conditions in the first quarter of 2023. The Monetary Council kept the base rate at 13%, and the effective one-day deposit tender rate at 18% until the end of March. The HNB meanwhile made some changes in other instruments and decided that euro swap instrument will remain available until 31 March 2023, in line with decreasing energy prices and improving domestic energy balance. This instrument has contributed effectively to achieving stability in the foreign exchange market. As per its earlier communication, the Monetary Council raised the reserve requirement ratio to 10%, and in addition announced changing its interest rate structure (to a system of tiered interest rates) from 1 April. According to the central bank's communication, the Hungarian benchmark rate, which is outstandingly high even by international comparison, should remain stable until the country's risk perception shows a continuous improvement.

Inflation in Hungary peaked in January 2023, after reaching a record rate at 25.7%, inflation moderated slowly in February and March, respectively. However, these rates, headline inflation and core inflation above 25% are still considered to be elevated. Regarding inflation components, while fuel and processed food price inflation declined, alcoholic beverage and tobacco and service prices continued to rise, which is an unfavorable development from the point of view of price stability.

FX market: Until March, the forint continued to strengthen thanks to the fundamental factors and even fell below 375 against the euro. However, the American and Swiss banking developments in mid-March intensified risk aversion again and the regional currencies came under pressure, too. In the fundamental background of the strengthening (in addition to the protective domestic base interest level, which is also outstanding in the region), one of the most important factors was the drop in European energy prices, which was caused by the particularly mild winter weather throughout Europe. Furthermore, the high level of European gas reserves, and the volume of enormous LNG shipments arriving to Europe also played a substantial role. The current account deficit and the related concerns (fiscal stability) track the drop in energy prices with a delay of a few months - as can be seen from the positive foreign trade data. In addition, it is still important from the perspective of international investors that the war in Ukraine is taking place in a neighbouring country, so regional currencies may be characterized by high volatility even within emerging markets, due to the geographical proximity. Another negative factor is that the forint is fundamentally not helped by the fact that the real interest rates, which are closely monitored, are still negative due to high inflation although the forint is not alone with this phenomenon on the world market. However, the real interest rate may become positive by the end of the year, which may further stabilize the forint exchange rate.

**Public finances**: The deficit was HUF 2,090 bn in the central budget in Q1 2023, so 61% of this year's appropriation was fulfilled. This year's first quarter deficit figure was HUF 219 bn lower compared to the deficit in the first three months of 2022, which also included the tax refund and the half-yearly allowance for employees of the armed forces. The cash flow balance

# **ΧΤΔΚΔ**ΡΕΚΒΔΝΚ

#### - BUSINESS REPORT 30.04.2023

of the budget is worsened by the fact that in the first two months EU payments reached HUF 313 bn, while revenues from the Union were only HUF 208 bn. Without this the cash flow deficit would have been HUF 52 bn lower. As a result of the decreasing need for financing, former pre-financing, and substantially improving nominal growth, the government debt ratio started to fall again from last year, so the debt ratio fell to 76.8% in 2021, 73.3% in 2022, which may further decrease to close to 67% by the end of 2023.

**Wages and employment**: In the second month of the first quarter, regular wages increased by 17.3%, while the average wage showed an increase of 0,8%, but the latter figure is strongly distorted by last year's very high monthly base. In the examined month, the gross average salary was HUF 531,200 for full-time employees, while the average net salary was HUF 366,400. The net average wage calculated without tax benefits also increased by 0.8% taking into account the base effect, and net real wages showed a 7.8% decrease in the month - excluding the base effect -, strong inflationary environment leaves a clear mark on wage growth.

Employment remains close to its peak, 18,000 new jobs were created in the domestic primary labour market in one year, so the total number of employed persons was 4,696,000 on average between January and March. 67.0% of the population aged 15-74 was present on the labour market, compared to the 66.3% activity rate measured in the same month of last year and the 66.8% level measured in the previous month. The unemployment rate according to the international statistical methodology was 4.0% in March, after 4.0% in the previous month, and after the level of 3.6% measured in the same month of the previous year.

**GDP**: In the first quarter of 2023, domestic GDP decreased by 0.9%, although, adjusted for the effect of working days, the decline was 1.1%. Compared to the previous quarter, the performance of the economy decreased by 0.2%, much less than expected, but the economy still remained in a technical recession. Industry contributed the most to the decline in economic performance. At the same time, the decline was moderated by the favourable performance of agriculture and services. Healthcare services contributed the most to the growth of services. From the second quarter, with the end of the heating season and falling energy prices, a significant turnaround may occur, and the industrial and service units that were forced to stop temporarily due to energy prices may restart. The domestic economy has probably passed the bottom, and the technical recession may end in the second quarter. It is favourable that the order stock of the industry continues to show growth, and new manufacturing capacities can also contribute to the exceptionally low base in last year. For the time being, consumption is held back by falling real wages, but the extent of the deterioration will moderate during the year as inflation begins to fall.

## 3. THE PROFIT AND PROFITABILITY OF TAKARÉKBANK IN 2023

### Main financial indicators

Main figures in HUF million	30.04.2023	31.12.2022	Change %*	Change
Total assets	3,344,134	3,511,686	-4.8%	-167,552
Financial assets valued at amortized costs and financial	2,419,652	2,813,745	-14.0%	-394,093
assets mandatorily measured at fair value through profit/loss				
o/w net client loans	1,606,328	1,653,580	-2.9%	-47,252
Financial liabilities valued at amortized costs	3,007,130	3,228,520	-6.9%	-221,390
o/w client deposits	2,391,667	2,521,337	-5.1%	-129,670
Equity	262,024	226,838	15.5%	35,186
Profit/Loss before tax	38,281	34,247	11.8%	4,034
Profit/loss for the year	32,146	25,481	26.2%	6,665
Total comprehensive income	35,186	20,437	72.2%	14,749

\* The percentage of the change is not shown in the table above if it is mathematically meaning less or greater than 300% in absolute value.

The total assets of Takarékbank decreased by HUF 167.6 billion within four month and stood at HUF 3,344.1 billion at the end of April 2023. Profit before taxes exhibited a gain of HUF 38,281 million. In the first four month of 2023, total comprehensive income for the year concerned was at HUF 35,186 million.

The sale of claims and the settlement of impairment/provisions dragged profit down by HUF 5.7 billion, while modification loss amounted to HUF 11 million. Banking tax reduced profit by HUF 2.4 billion and extra profit tax by HUF 21.0 billion in 2023.

## 4. PERFORMANCE OF THE BANKING BUSINESS LINES

### **Retail clients**

In preparation for the merger of MKB Bank and Takarékbank in May 2023, a process of unification of products and the harmonisation of processes has started. The merger of MKB Bank and Budapest Bank took place on 1 April 2022. From then onwards, new account packages with uniform pricing were launched not only in the two former, already merged, member banks, but also in Takarékbank, the third member bank of Bank Group, paving the way for full integration. The new account packages cover a wide range of customer needs and are in line with Bank Group's future strategy.

In retail products, the first four month was mainly driven by acquisition promotions and crossselling initiatives to support the fulfilment of business plans.

The Bank's Partner Programme has been restructured, offering discounted products and offers to employees of the companies contracted with the Bank. Within the framework of the restructuring, a unified set of conditions has been established in MKB and Takarékbank, and the range of discounts has been extended.

Among savings and investment solutions, investment funds were particularly popular in the first four month of 2023. The Bank primarily met customer needs with the wide range of products offered by MKB Fund Manager, which was merged as a result of the merger of Budapest Fund Manager and MKB-Pannónia Fund Manager in 2022. Among investment

funds, short bond funds combining high return potential with flexible investment horizons were particularly popular, and their portfolio growth continued to be dynamic in the first four month of 2023. Within retail sovereign debts, longer-dated inflation-linked instruments were particularly popular.

In the field of housing loan products, the Bank continued the credit promotions related to the Baby Loan and market-rate mortgage products in the ECO Modernisation Programme. As regards the Qualified Consumer Friendly Home Loan product, the Green Interest Rate Rebate was introduced for new home purchase loans from 1 April 2023, in line with MNB's tender.

In the case of personal loans, seasonality was a feature of low new disbursements in the first month of the year, but by the end of the quarter the market had returned to forecast levels. The Bank maintained its 15% market share, with a significant increase in new volumes. The interest rate on personal loans was adjusted to changes in funding costs and market conditions, and the Bank's online campaigning activity was strengthened.

In first months of 2023, the Takarék GO and Takarék GO Platinum credit cards were introduced, and the Bank started offering them through 28 Takarékbank branches. More than 500 credit cards were issued in the first 3 months. Euronics and ÉnPostám credit card sales were outstanding also.

In the first four month of 2023, MBH Bank, in addition to the merger processes, also continued to renew its product range, further strengthening its market position in order to provide competitive offers to the financial market intermediaries cooperating with it in retail and small business lending. Intermediary sales continued to be strong, driven mainly by competitive product terms, lending processes and lending conditions. The Bank continues to work on improvements that will simplify and thereby facilitate partner collaboration in day-to-day operations.

In the first quarter of 2022, the member banks of Magyar Bankholding signed a strategic cooperation agreement with CIG Pannónia Group. Within the framework of this agreement, the merged banks have developed the range of insurance products for sale, which is based on the products of CIG Pannónia Insurance.

In the first quarter of 2023, compared to the same period of the previous year, the Banking Group realized a minimal decrease in group insurance, but within group insurance products, credit insurance increased by 10%.

In individual life insurance, the annual portfolio premiums rose to 216% of the previous year's first quarter result for regular premium insurance. The distribution of member banks in terms of sales volume was almost identical in Q1 2023 (MBH: 52%, Takarékbank 48%). For single premium life insurance, the Group realised an 11% increase compared to Q1 2022. In the first quarter of 2023, the member bank distribution in terms of annual portfolio fees will be similar to that for regular premium life insurance (MBH: 46%, Takarékbank 54%).

In terms of home insurance, the decline in the mortgage market is reflected in the number and volume of home insurance sales.

### **Branch network**

In the first four quarter of 2023, MBH Bank continued the developments started in 2022, with a strong emphasis on the physical layout of the branch network and on improving the quality of customer service.

The Bank ensured personal customer service with more than 400 branches nationwide, while the range of online services was also expanded.

In order to increase customer satisfaction and ensure high quality customer service and efficiency, a new internal information platform and standardised branch processes have been developed, in addition to continuous training of advisors and professional developments.

The Bank pays special attention to the continuous modernisation of its branches and the provision of related information, thus ensuring convenient and fast service for existing and prospective customers. Based on the results of regular representative online surveys of our own customer base, further improvement directions and actions will be identified, as increasing the customer experience is a constant priority.

#### Micro and small enterprise clients

In the first four month of 2023, demand for government-backed loans remained strong among Micro and Small Business customers, and the Széchenyi Card MAX+ scheme was the most popular. The vast majority of loan disbursement performed via these state-subsidized programs.

In the Széchenyi Programme MAX+ scheme, the share of investment loans further decreased. In the MAX+ programme, the share of investment loan transactions is only one fifth of the previous MAX programme. It is assumed that macroeconomic changes are not favourable for the development and investment appetite of enterprises.

#### **MFB** Points

In the first quarter of 2023, total loan disbursements in the branches dedicated as MFB Points amounted to more than HUF 44 billion. The loan portfolio related to MFB Points reached HUF 360 billion, the highest in the current period.

### **Corporate and institutional customers**

Relying on its traditional strengths, MBH Bank's strategic goal is to further develop and build a strong corporate business line. The business line focuses on local knowledge, professional service, consulting-based sales and the provision of innovative solutions.

Bank provides comprehensive business solutions and advice to its customers, sets up comprehensive loan schemes if necessary and satisfies special financial customer needs. Bank is able to provide efficient and unique solutions to all players in the corporate segment.

The focus of the first four month of 2023 was on preparing for the merger, creating the framework for joint operations.

In line with its strategy, MBH Bank continued to play a key role in the introduction of economic stimulus programs and their delivery to customers. The significantly rising interest rate environment generated more demand in Széchenyi Card Programs and Baross Gábor Reindustrialisation Loan Programme than ever before, there was particularly high demand for working capital and current account loans.

The Bank provided information and processes concerning the repayment moratorium to its customers on a regular basis, facilitating a temporary solution to any potential liquidity problem.

In 2023, the Bank continued to regard customers among small and medium-sized enterprises (SMEs) as a key segment and increasing product penetration played a central role here.

# **\* ΤΔΚΔ**ΡΕΚΒΔΝΚ

#### - BUSINESS REPORT 30.04.2023

Bank remained an active participant in the continually renewed Széchenyi Programme. The Bank has achieved a 37% market share in terms of contracted amount in Széchenyi MAX products by the end of March 2023. In the MAX+ programme which has been launched this year, MBH Group has a 40% market share of the number of loan applications.

MBH Group has traditionally maintained close ties with Eximbank to enable customers to benefit from EXIM financing sources. In the Baross Gábor Reindustrialisation Loan Programme, a total of HUF 1,000 bn loan has become available in euros as well as in forints at a fixed low interest rate. The majority of the facility was allocated to working capital loans. The Bank's customers also requested a significant amount of these products.

#### Private banking

The first phase of the merger of the Private Banking segment was successfully completed. A nationwide network has established. The Bank established dedicated private banking service centers in several locations in Budapest and in nearly twenty locations nationwide. In addition to easier personal contact, Private Banking continues to provide telephone administration covering all of its services.

Services provided to customers were further expanded: investment funds of a new, internationally recognized market player became available in the MBH Private Banking network.

In 2023, the Private Banking performed particularly well in the sales of investment funds, and also successfully participated in the issuance of certificates. In addition, the sale of inflation-tracking government securities is still popular with customers.

## Agricultural clients

Implementation of the sector-specific service model for the agricultural and food industry, (which was already developed and introduced earlier in the Takarékbank), has launched in 2022 for the entire MBH Group. Within this framework, the agri-food business line was established in the merged MKB Bank in parallel with the legal merger of Budapest Bank and MKB Bank, with a unified management structure. With this step, the Group has created a dedicated agri-food business line, which serves almost 40,000 customers, from the smallest farmers to large food companies and agricultural-integrators, has a market share of around 25 percent in financing the agri-food industry, and has disbursed almost a third of agricultural loans, approximately 30 percent.

In Takarékbank, the customers segmented to the Business Unit (farmers, food processing companies and other customers belonging to the agri-business) continued to be served in 2023 in the previously established organisational structure.

A unique feature of the agribusiness's service model is that farm sizes of up to 200 hectares or equivalent in the livestock sector - the service line assigns a dedicated agricultural advisor to its customers, who can also meet with customers at their premises as required.

The business line is organised into a separate organisational structure within a horizontal organisation, with a small central governing body, its main organisational unit is the agricultural region. Takarékbank's agri-food business line is represented by the Agri Centres in more than 40 locations in 8 regions across the country. In addition, large corporate agri-business customers are served by a specialised central unit. In addition, leasing and factor financing, advisory services on tenders and insurance activities play an important role in serving the agrifood customers, which the Bank provides to the customers through its partners.

In order to strengthen direct customer relationships and attract new customers, the Bank continued to hold regular regional agricultural meetings for customers.

Takarékbank continues to be a major financing partner for agricultural and food businesses: In 2023, the loan portfolio managed by Bank Group's agri-food business developed in line with the normal trend of agricultural seasonality.

### 5. INVESTMENT

#### Investments during the year

The gross carrying value of Takarékbank Ltd. subsidiaries and associates was HUF 5.27 billion as of 30 April 2023, with the net value being HUF 5.05 billion.

#### Takarékbank subsidiaries

Takarékbank subsidiaries predominantly include companies dealing with property management, maintenance and sale.

The property management concept adopted by the General Meeting of Takarékbank stated that subsidiaries dealing with property management, maintenance and sale that were transferred to the Takarékbank's portfolio during the merger process of the savings cooperatives will transfer their real estate portfolios to the two newly founded companies dealing with property management, maintenance and sale activities, after which the former will undergo voluntary liquidation.

### TIFOR Takarék Ingatlanforgalmazó Ltd.

TIFOR Takarék Ingatlanforgalmazó Ltd. was established by Takarékbank Ltd. on 4 October 2019 with a share capital of HUF 50 million, with the purpose of allocating the real properties of the cooperative integration not related to banking into this company, which, as its core function, would manage and sell these real properties to buyers outside the integration.

As result of multiple capital increases by way of transfers (of real estate), the share capital of TIFOR Takarék Zrt. reached by the end of 2022 HUF 6.45 billion.

TIFOR Zrt. was merged with TIHASZ Zrt. on 31 December 2022.

As of 31 December 2022, TIFOR Zrt. was merged into TIHASZ Zrt. together with two other MKB subsidiaries with real estate profiles.

#### TIHASZ Takarék Ingatlanhasznosító Ltd.

Takarékbank established TIHASZ Takarék Ingatlanhasznosító Ltd. on 4 October 2019 with a share capital of HUF 50 million with the purpose of allocating the real estate properties of the cooperative integration related to banking into this company, which, as its core function, would manage these real properties and lease them to Takarékbank Ltd.

As a result of multiple capital increases by way of transfers (of real estate), the share capital of TIHASZ Takarék Ltd. reached approximately HUF 25.8 billion during 2020, while by the end of 2022 it reached HUF 26.1 billion.

The equity capital of the merged TIHASZ Takarék Zrt. is HUF 32.77 billion on 30 April 2023, and Takarékbank's share is 11.726%.

# Property management, maintenance and trading company transferred from the savings cooperatives into the Takarékbank portfolio by way of a transfer:

# **\* ΤΔΚΔ**ΡΕΚΒΔΝΚ

The circle of Takarékbank Ltd.'s subsidiaries includes the below listed property managing, property maintenance and property trading subsidiaries of cooperative credit institutions merged into Takarékbank Ltd. which are mostly under voluntary liquidation: ANTAK 2000 Llc.; Szetak-Szolg Llc. "u.l."; F House Llc.; and Környei Tak-Ing Llc. "u.l.". The gross total carrying value of the 4 companies is HUF289.7 million, net value is HUF 233.8 million.

The TM1 fund of Diófa Alapkezelő Ltd. was recognised in the category of investment into subsidiaries in the carrying value of HUF 350 million. Moreover, Takarékbank Ltd. recognizes its shares in MTB Magyar Takarékszövetkezeti Bank Ltd. among financial assets measured at fair value through other comprehensive income, in a total carrying value of HUF 643.5 million.

#### Takarékbank associates:

The shares of two companies allocated to the Takarékbank Ltd. portfolio after the merger of the cooperative credit institutions, i.e. the shares of Euro Eco Pénzügyi Szolgáltató Ltd. "u.l." representing an ownership share of 22.5% and the shares of Humán Pénzügyi Mediátor Llc. "u.l." representing an ownership share of 48.7% were recognised among associates.

The shares of Garantiqa Hitelgarancia Ltd., the investment in Agrárvállalkozási Hitelgarancia Alapítvány investment and several other smaller value investments were recognised among Takarékbank's financial assets measured at fair value through other comprehensive income. VISA shares are recognised in the category of non-trading financial assets mandatorily measured at fair value through profit or loss.

## 6. THE FINANCIAL AND RISK SITUATION OF TAKARÉKBANK

## 6.1. Takarékbank's financial performance

The total assets of the Bank calculated according to International Financial Reporting Standards (IFRS) was HUF 3,344.1 billion as of 30 April 2023, a decrease of 4.8% (HUF - 167.6 billion) compared to the previous year's end figure. Drop of the asset side was caused primarily by the decreasing of loans and advances to banks. Compared to the previous year-end, the volume of loans and advances to customers at amortised cost decreased by HUF 6.1 billion, reaching HUF 1,647.5 billion by the end of the period. On the liabilities side, the four months change was mostly driven by decrease of client deposits (HUF -129.7 billion), and decline in intra-group, MNB-backed and other interbank financing (HUF -65.5 billion).

The value of the financial assets of the Bank measured at fair value through other comprehensive income at the end of April 2023 reached HUF 160.8 billion, compared to HUF 146.9 billion in the previous year. Within this, the volume of debt securities (typically government securities held for sale) is significant, while the proportion of equity type instruments is below 1%.

The changes in the volume of debt securities was characterised by the increase of government bonds.

**The value of financial assets measured at fair value through profit or** loss increased by HUF 12.6 billion in the year of 2023, at the end of April 2023 it was HUF 276.3 billion. Loans and advances to customers mandatorily at fair value through profit or loss increased to HUF 247.5 billion.

The value of financial assets measured at amortised cost decreased by HUF 394.1 billion during the four month, and reached HUF 2,419.7 billion by the end of the period.

The net volume of loans and advances to customers decreased by HUF 47.3 billion during the four month, was HUF 1,606.3 billion by the end of April 2023. Gross retail credit volume at the end of April 2023 was HUF 430.4 billion (2022: HUF 432.5 billion) and gross corporate credit volume (together with local governments) was HUF 1,259.8 billion (2022: HUF 1,303.3 billion). The volume of central bank and interbank deposits decreased from HUF 601.2 billion to HUF 308.5 billion by the end of April 2023.

Hedging instruments (unmarked items)

Income tax relating to items reclassified to profit or (-) loss

Financial liabilities at amortised costs comprise approximately 90.0% of the liabilities of Takarékbank. Their value was 6.9% lower than compared to the end of the year preceding the year in guestion and reached HUF 3,007.1 million by April 2023. The largest share in this liability is represented by the volume of deposits. The value of client deposits at the end of April 2023 was HUF 2,391.7 billion (retail deposit volume: HUF 1,158.7 billion, corporate, municipal deposit volume: HUF 1,124.5 billion, investments volume HUF 8.2 billion and interbank volume: HUF 185.8 billion), this figure is HUF 63.4 billion down on 2022.

The value of the share capital of the Bank as of 30 April 2023 was HUF 262.0 billion, increasing by HUF 35.2 billion compared to the end of 2022, due to increase in retained earnings of Takarékbank (as a result of the significant profit after tax).

Takarékbank is part of the MBH Group, but has to meet the capital adequacy ratio requirement at an individual level, which was firmly satisfied throughout the period, and at the end of April it reached 21.6%.

#### ANNUAL STATEMENT ACCORDING TO IFRS

#### - BUSINESS REPORT 30.04.2023

# **\*** ΤΔΚΔ<u></u>*RÉKBANK</u>*

Revaluation on debt securities measured at fair value through other comprehensive income	3,460	-6,666	-3.3%	10,126
Total Comprehensive Income for the year	35,186	20,437	-	14,749

\*A change of more than +/- 300% compared to the previous year cannot be interpreted, marked with "-".

In 2023, Takarékbank's **profit/loss before tax** exhibited HUF 38.3 billion in profit, which was a HUF 4.0 billion improvement compared to the profit of HUF 34.2 billion in the previous year. Profit after tax for the period was HUF 32.1 billion (2022: HUF 25.5 billion). Total comprehensive income in the first four month of 2023 amounted to HUF 35.2 billion.

The largest factor current year's profit in Takarékbank was the high net interest income achieved due to changes in the market environment and favourable net fee and commission income.

**Net interest income** in 2023 amounted to HUF 82.5 billion and it resulted from HUF 126.3 billion gross interest income and HUF 43.9 billion interest expense. Strong net interest income was driven by the significant portfolio of securities and favourable yield environment.

Takarékbank's **net fee and commission income** amounted to a profit of HUF 14.0 billion in the first four month of 2023, which resulted from the balance of the HUF 22.4 billion gross income from fees and commissions and HUF 8.4 billion in expenses. The payment-related net commissions showed an increase in a slowing economic environment.

**Results from financial instruments** were a profit of HUF 4.0 billion compared to a loss of HUF 20.7 billion last year. A significant part of the loss can be explained by the change in the fair value of the subsidised loan portfolio. The result was boosted by the result of foreign exchange operations (HUF +12.3 billion).

**Other income** amounted to HUF 213 million in the first four months of 2023, which includes the reimbursement of the OBA fee liability in amount of HUF 2.6 billion.

The operating costs of Takarékbank were HUF 56.8 billion in the first four month of 2023, the overall cost includes operating costs as well as taxes and other fees associated with operations, too. Of this, the operating costs that the bank has a direct influence on (salaries, IT, other material, depreciation) represent 39.8% of total accounted operating expenses. Of this, salaries and staff costs stand out at HUF 10.0 billion, general and administrative expenses at HUF 5.3 billion, and annual information technology expenses at HUF 5.1 billion. The change in other taxes and fees was due to the increase in tax payment costs due to the transaction fee and the extra profit tax, which was HUF 32.3 billion. Supervisory and regulatory fees amounted to HUF 1.9 billion.

Operating costs in HUF million	30.04.2023	2022	Change
Personnel costs	9,996	32,750	-22,754
Leasing fees	243	191	52
Depreciation of tangible assets	1,129	3,881	-2,752
Depreciation of intangible assets	218	797	-579
General administrative costs and auditor's fee	5,276	15,077	-9,801
Advertisements	436	1,070	-634
Consultancy fees	101	1,192	-1,091
IT costs	5,146	15,300	-10,154
Other taxes and fees	32,266	44,640	-12,374
Insurance costs	35	133	-98
Fees for supervisory and other prudential activities	1,891	7,189	-5,298
Other non-specified costs	36	92	-56
Total costs	56,773	122,312	-65,539

The net balance of impairment and provisioning was HUF 5.7 billion in the first four month of 2023. Furthermore, a modification loss of HUF 11 million is recognised due to the 2021 and 2022 impacts of the repayment moratorium and to a negative net present value effect expected for 2023.

## 6.2. The risk position of Takarékbank

Takarékbank's risk management is governed by the Hungarian and EU legislation in force and additional supervisory regulations. Takarékbank is a member of the MBH Group and must also comply with the internal regulations of the MBH banking group. Takarékbank considers prudent risk-taking to be a core value, and its risk management and risk control activities are performed in accordance with the principles laid down in the Risk Strategy. Takarékbank's risk management is subject to several levels of control, the most important of which are ultimate control at the level of the Board of Directors, independent control separate from the risk-taking areas, and appropriate measurement, diversification, monitoring and reporting of risks. Takarékbank continued to comply with the regulatory requirements throughout 2022.

### **Risk Strategy**

MBH's Group level Risk Strategy defines the scope of risks that Takarékbank can take and the risk management and measurement tools to be applied, as well as the general risk-taking principles and rules to be followed by Takarékbank.

In its operations, Takarékbank strives to maintain a risk culture that ensures the identification, measurement and management of emerging risks in accordance with the risk appetite. Internal policies, strategies, regulations and guidelines, communication and employee training are the primary means of ensuring a corresponding risk culture.

The primary objectives of Takarékbank's risk management activities are to protect the Bank's financial strength and reputation and to contribute to the use of capital for competitive business activities that enhance shareholder value.

The Bank's risk appetite should be consistent with the financial resources available to cover potential losses. In order to ensure this, the Bank calculates the current and future economic capital requirements for the quantifiable types of risk, as well as the capital requirements under Pillar 1.

Takarékbank is primarily exposed to credit, liquidity, market and operational risks.

In its risk appetite, MBH Group defines separate risk category targets in line with the respective business strategy, which describe the level of risk that can be assumed in a qualitative manner. The targets are broken down to different entity levels within the Group, including the level of Takarekbank. Regular back-testing of these targets ensures that risk appetite is monitored on an ongoing basis, results are evaluated and any necessary interventions are made on this basis to bring the Bank back on track.

## Credit risk

No significant change was in credit risk in 2023.

In line with the MNB's expectations and the uniform impairment calculation methodology at MBH banking group level, the staging logic for customers in the moratorium and leaving the moratorium was standardised.

For customers exiting the moratorium or not on a contracted repayment schedule, the measurement of traditional credit behaviour continues to be implemented. For retail customers, the Bank has reverted to the standard lifetime ECL calculation.

For corporate customers, the Bank continues to determine the level of impairment based on the rating and the monitoring result.

In addition to the above, the Bank has updated the macro parameters for the entire portfolio, using the latest parameters available in the MNB Inflation Report. The updated risk parameters have also been implemented in the lifetime ECL calculation.

Given that no new information on the paying capacity of customers has emerged during the moratorium period and that the repayment rates of customers affected by the interest rate freeze are lower than those in the contracts, it is necessary to take into account the uncertainties about the capacity and willingness of debtors to pay. In addition, MNB expects that the risk arising from modelling uncertainty needs to be mitigated.

The Bank has considered the following aspects in determining the management overlays:

- the rate at which the income of customers entering the moratorium4 has decreased compared to 18.03.2020,
- for customers entering the agricultural moratorium, the models are not aware of the agricultural moratorium and therefore the willingness and capacity to pay may contain a hidden high probability of default,
- the application of transitional staging rules alone does not always reflect the full increase in lifetime loss, even when macro parameters are updated.

In summary, the Bank's current modelling methodology, using the above information, provides the opportunity to develop risk profiles that are well-defined from a customer management perspective. The management overlays have been formed due to the uncertainties arising from the current economic situation, the expectations of the regulatory environment and the future volatility of the economic situation.

Up to April, a significant part of the increase in credit risk relates to only one counterparty, but even so, the stock of non-performing loans has fallen slightly due to the sale of receivables.

## Market risk

Market risks include interest rate risk and foreign exchange risk arising from all banking activities. Takarékbank keeps its market risks low by means of an appropriate limit system and in-process controls.

#### Interest rate risk:

Interest rate risk arises from the fact that changes in interest rates affect the value of a financial instrument. A credit institution is also exposed to interest rate risk if the amounts of its maturing or repricing assets, liabilities and off-balance sheet instruments are not consistent with each other in a given period. Takarékbank measures interest rate risk by performing sensitivity tests on an ongoing basis. In addition, the impact of adverse interest rate scenarios is continuously measured and limited through the application of stress tests. Interest rate risks are managed through an appropriate composition of the securities and derivatives portfolio and through the consistency of other assets and liabilities in the bank's books.

#### Management of currency risk

Takarékbank aims to keep its exposure to foreign exchange risk low by maintaining open foreign exchange positions up to the limit set in the banking book.

Foreign exchange risk arising in the course of core banking activities is managed by the Bank in the course of its operations, depending on market conditions. The Bank also performs VAR calculations and stress tests to measure foreign exchange risk.

## Liquidity and solvency risks

Takarékbank analyses liquidity risks with a number of indicators and mitigates them with limits, the most important of which are based on regulatory indicators (LCR, NSFR, required reserve ratio) and stress tests relevant to liquidity. In addition, Takarékbank operates an early warning system for the timely detection of liquidity disturbances, which is presented to the Asset and Liability Committee and to management without delay in the case of an alert and on a regular basis during normal operations.

**X TAKARÉKBANK** 

## **Operational risk**

Takarékbank continues to manage operational risk primarily through internal policies, rules of procedure and the operation of built-in control mechanisms in line with defined supervisory requirements. MBH's Group Level Operational Risk Management Policy and Operational Risk Management Rules set out the methodology for the operational risk management framework tools used by Takarékbank.

The operational risk loss data collection is based on uniform definitions and limits. The Bank promotes the recognition and identification of operational risks with internal training.

The adequacy of key risk indicators (KRIs) is reviewed by the Bank every year, new group level KRIs defined by MBH were introduced. As part of the annual KRI review, the Bank has identified the indicators that will be collected following the merger.

Takarékbank conducts operational risk self-assessments for its key activities, and uses scenario analysis to assess the impact of events that occur infrequently but could result in severe losses if they were to occur.

Takarékbank's operational risk events and the results of operational risk monitoring are reported on a quarterly basis.

With regard to operational risk, the Bank's management attaches great importance to feedback. An essential aspect is the implementation and monitoring of the effectiveness of the measures taken to eliminate operational risks.

## 7. THE ECONOMIC ENVIRONMENT AND THE FINANCIAL SECTOR

Taking into account both upside and downside risks, we expect GDP to expand by 0.8% in real terms in 2023. The protracted war in the neighbourhood, the negative impacts of energy price rises, the partial termination of preferential energy prices for households and losses associated with the severe drought led to a marked deterioration in last year's economic performance and continue to exert an impact in 2023 as well. Given the low basis last year, agriculture has a good chance to contribute to growth positively in 2023, provided the severe drought does not repeat itself. Still, the growth outlook continues to be blurred by the partial termination of preferential household energy prices, the high energy bills of the economy's other sectors like companies, state institutions and municipalities. Some sectors may experience transitional, but some also enduring reductions in production levels or even halts in production. These can partly be offset by subsidies and preferential loan schemes by the government, especially for actors in the most energy-intensive industrial branches. Further risks to growth are posed by supply chain disruptions caused either directly by the war in Ukraine or indirectly through the resulting sanctions, which culminate in a lack of or insufficient availability of base and raw materials and steeply rising costs. Purchasing power may be hit by lastingly strong inflation and the high costs of credit. External demand may also get weaker as purchasing power is also undermined in Hungary's main export destinations. The most

## **\*** ΤΔΚΔ<u></u>*RÉKBΔNK</u>*

#### - BUSINESS REPORT 30.04.2023

severe risk would be the complete stop of Russian gas and oil deliveries, but apart from minor incidences this has not yet taken place and there is small probability for such an event in the future. On the other hand, upside risks are also present in the form of new industrial capacities entering production phase, the easing of the lack or insufficient supply of electronic chips, semiconductors and other appliances, the outstanding level of the order book in the industrial sector, which may help the sector to overachieve current expectations. The recovery in international tourism may give a further boost to growth especially with the termination of Covid-related travel restrictions in China. Large scale investment projects announced more recently will also help economic growth accelerate to its previous pace on medium term; from the middle of this decade Hungary's GDP-growth may lastingly exceed 4%.

The termination of the price cap for fuels was only partially reflected in inflation figures in December, the full impact will emerge in January's figures, hence inflation may still accelerate slightly further in the first month of 2023. However, due to base effects we expect at first gradual, but later quite substantial moderations in inflation figures in the coming months. These base effects will be reinforced by a recent fall in international commodity and energy prices, hence no new piece hikes are on the horizon, and the Forint's expected correction (appreciation) should also dampen inflationary pressures. As for food prices, weaker demand will likely drive prices somewhat down, or at least prevent them from rising further. In the course of the last year higher excise taxes pushed tobacco and alcoholic beverage prices up, and the same was true for many processed food items that were subject to the rising of the public health product tax. These effects will, however, disappear from the annual rate of inflation this year. Yet, a wage-price spiral may be forming in some sectors, which can slightly reduce the pace of disinflation. This still won't prevent from inflation declining to below 10% by year-end, however, it will still be as high as 17.5% on annual average in 2023.

The current 18% effective policy rate (the rate on the quick deposit tender) is expected to be gradually cut from the middle of 2023, but from then on it may quite rapidly close the gap with the base rate at 13%. As the disinflation process speeds up, the last quarter may bring especially steep rate cuts from the central bank, hence the base rate may sink to as low as 9% by the end of the year. In the still high inflation environment the growth of budget revenues will definitely exceed that of expenditures, hence on accruals basis the budget deficit may improve by at least 2 percentage points compared to 2022, i.e. it may decline to 4% of GDP, while public debt may sink below 70% of GDP by year-end. Since improvements are likely in the terms of trade, the deficit of the current account may considerably narrow, and improve external balances may lend support to the Forint's exchange rate.

With respect to net interest revenues the banking system may experience a further improvement to last year's figures, but a marked slowdown in lending activity (mainly the disbursement of new housing loans will suffer a dramatic setback compared to 2022 figures) will curb the opportunities for improvement in net fee and commission revenues. As for operating and risk costs, a continued deterioration is well on the cards. The preceding years' fast growth in total assets as well as last year's sharp increase in fundamental operating revenues means that the tax base will be higher both for the special sectoral tax and the so-called extra profit tax, which will still be imposed upon the banking system in 2023, hence the tax burden continues to become even stricter. In addition, interest rate caps introduced in 2022 will involve substantial losses in the form of foregone revenues. All in all, the entire banking system may expect HUF 80 to 100 billion lower after-tax profit than it realized last year's for some aver's 7%.

## 8. PROTECTION OF THE ENVIRONMENT

Although Takarékbank has no business or non-profit activity connected to environmental protection, it strives to maintain environment friendly workplaces, it keeps up and nourishes

Chairman of the Supervisory Board:Béla HetzmannChairman of the Board:Levente László SzabóChairman of the Supervisory Board of the successor MBH Bank Plc:dr Andor NagyChairman of the Board of the successor MBH Bank Plc:dr Zsolt Barna

The Integration of Cooperative Credit Institution (hereinafter: Integration) was a cooperation of 16 privately owned cooperative credit institutions – savings bank, credit union, and smaller bank – in the beginning of the year 2019, then following the mergers completed on 30 April 2019 and 31 October 2019 the number of the cooperative credit institutions was reduced to two credit institutions, and the Takarék United Cooperative was established bringing together the small owners of Takarékbank Zrt.

On October 31, 2019, the fifth largest credit institution in the country entered the market following the national merger of Saving Cooperatives and Takarék Commercial Bank. As a result of the mergers, the number of customers of the nationwide Takarékbank has grown to more than 1.1 million, and it operates the largest nationwide branch networkwith 750 branches and 15 Takarék mobile bank branches.

With the merger of the 11 savings cooperatives and 2 banks, the almost five-year process has ended, during which the former nearly 120 savings cooperatives have now become one universal commercial bank with national coverage.

In the last merger (October 2019), the 3A Takarékszövetkezet, the Békés Takarék Szövetkezet, the CENTRÁL TAKARÉK Szövetkezet, the Dél TAKARÉK Szövetkezet, the Fókusz Takarékszövetkezet, the Hungária Takarék Takarékszövetkezet, the KORONA TAKARÉK Takarékszövetkezet, the M7 TAKARÉK Szövetkezet, the Nyugat Takarék Szövetkezet, the Pátria Takarékszövetkezet, the TISZÁNTÚLI TAKARÉK Takarékszövetkezet, Takarék

Commercial Bank Ltd. and Takarékbank Ltd., which has been operating regionally until now, participated. Takarékbank Ltd. took over the customers, employees, entire branch network, deposit-loan and contract portfolios of all credit institutions.

The Company's controlling owner - MTB Bank of Hungarian Savings Cooperatives Co. Ltd., MKB Bank Plc. and Budapest Credit and Development Bank Private Company Limited by Shares established Magyar Bankholding Ltd. (registration number: 01-10-140865; registered office: 1122 Budapest, Pethényi köz 10., hereinafter Magyar Bankholding Ltd.) on 26 May 2020 with 33.33% direct participation of MTB Bank of Hungarian Savings Cooperatives Co. Ltd. Based on the authorisation of the National Bank of Hungary, the Budapest-Capital Regional Court as Court of Registration registered Magyar Bankholding Ltd. in the company register with its resolution no. 01-10-140865/5.

On 30 October 2020, MTB Zrt. sold all of its shares representing its 33.33% shareholding in Magyar Bankholding Ltd. to Magyar Takarék Befektetési és Vagyongazdálkodási Zrt., the owner of 75.91% (99.99% voting rights) of the Bank's share package, and thus no longer holds any ownership stake in Magyar Bankholding Ltd.

Magyar Bankholding Ltd. commenced its effective operation on 15 December 2020, after MNB (acting as the central bank of Hungary) approved the merger of Budapest Bank Group, MKB Bank Plc. and Takarék Group, and the shares of the key owners were transferred to the joint holding company. By transferring the in-kind contributions, the second largest banking group in Hungary has been established, with the Hungarian State owning 30.35 percent of the shares through Corvinus International Investment Ltd..

Under the authorisation of its general meeting, the Board of Takarékbank decided on 28.03.2022 to increase the share capital of Takarékbank from HUF 100,260,000,000 to HUF 186,960,000,000 by HUF 86,700,000,000. The share capital was increased by the private placment of 867 pieces dematerialised ordinary shares of series "C" with a nominal value of HUF 100.000.000 and an issue value of HUF 115,340,254 each in the form of private placement. Within the framework of the capital increase, MKB Bank took over a total of 867 series "C" dematerialised ordinary shares with a nominal value of HUF 100,000,000 and an issue value of HUF 115,340,254 each, i.e., a total issue value of HUF 100,000,000,218, thus MKB Bank acquired a direct stake of 46.37% in Takarékbank.

On 31 March 2022, a share sale purchase agreement was concluded between MKB Bank as buyer and MTB Bank of Hungarian Savings Cooperatives Co. Ltd. (hereinafter: "MTB") as seller, under which MKB Bank purchased 7,156 pieces dematerialised ordinary shares of series "A" with a nominal value and issue value of HUF 10,000,000, and 200,000 pieces dematerialised preference shares – including dividend preference shares – of series "B" with a nominal value and issue value of HUF 10,000 issued by Takarékbank. The share package represented 39.35% of the share capital of Takarékbank. As a result of the two transactions, MKB Bank Plc. acquired a qualified majority stake of 85.72% in Takarékbank, while 1 ordinary share of series "A" left in the ownership of MTB.

The legal merger of the two member banks of Magyar Bankholding Ltd.: Budapest Bank Ltd. and MKB Bank Plc., as well as the merger of Hungarian Takarék Bankholding (as the direct owner of MTB) into MKB Bank Plc. were completed at midnight on 31 March 2022.

# **ΤΑΚΑΡΈΚΒΑΝΚ**

#### Notes to the Separate Financial Statements

Takarékbank as a company to be included in the consolidation as a subsidiary of MKB Bank left the mandatory institution protection organisation of integrated credit institutions, the Integration Organisation (Central Organisation of Integrated Credit Institutions,) with effect from 23 o'clock and 59 minutes on 1 April 2022 in possession of the necessary preliminary approvals and taking advantage of the opportunity granted by the law.

The the National Bank of Hungary ("MNB"), by its decision No. H-EN-I-119/2022 dated 8 March 2022, based on the request of Magyar Bankholding Zrt., revoked the licence to operate as a financial holding company granted to Magyar Bankholding Zrt. by its decision No. H-EN-I-358/2020 dated 12 June 2020, with effect from 29 April 2022, subject to the conditions set out in the decision. Given the withdrawal of the licence, MKB Bank took over the group management function of the banking group after 29 April 2022 based on the new group establishment decision issued by MNB.

Due to the fact that MKB Bank Plc. acquired a qualified majority influence in Takarékbank, pursuant to Section 3:324 of Act V of 2013 (Civil Code), an obligation to purchase arose for MKB Bank Plc. in respect of all shareholders who announced their intention to sell their shares within the limitation period. As a result of the transactions, MKB Bank Plc. increased its holding in Takarékbank further.

Based on the share transfer agreement concluded on 28.03.2022, then amended several times, MKB Bank Plc. acquired the share package of Magyar Posta Ltd. in Takarékbank consisting of 1,771 pieces dematerialised ordinary shares of series "A" with a nominal value of HUF 10,000,000 each, i.e. ten million Hungarian forints, a total nominal value and issue value of HUF 17,710,000,000, i.e., seventeen billion seven hundred and ten million Hungarian forints. By way of this transaction, MKB Bank Plc. increased its shareholding to 98.83%.

On 9 December 2022, the supreme bodies of MKB Bank and Takarékbank Zrt. adopted the proposals for the merger of the two member banks as part of the implementation of the second step of the merger schedule of Magyar Bankholding. According to the decisions of the General Meetings, the two member banks of the banking group, MKB Bank Nyrt. and Takarékbank Zrt., merged on 30 April 2023 and will then continue their operations under the name MBH Bank Plc, with a single brand name and image.

By decision H-EN-I-57/2023 dated 6 February 2023, the Magyar Nemzeti Bank authorised the merger of Takarékbank Zrt. into MKB Bank Plc. as of 30 April 2023, in accordance with the terms of the Merger Agreement dated 9 December 2022.

By order Cg.01-10-040952/3393 dated 14 February 2023, the Court of Registry of the Budapest Regional Court registered the merger of Takarekbank Zrt. into MKB Bank Nyrt. as of 30 April 2023.

Takarékbank Ltd., as the universal commercial bank, carries out the following activities in accordance with the provisions of the Act on Credit Institutions and Financial Enterprises (Hpt.) and the legislation related to financial services, within the framework thereof, with the permission of the Central Bank:

The separate financial statements of the Bank have been prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union (EU) and in all material respects in accordance with the provisions of the Hungarian Act C of 2000 on Accounting (the "Accounting Act") relevant to the entities preparing financial statements in accordance with IFRS as adopted by the EU. Bank shall prensent consolidated financial statements, expect if it meets the criteria of IFRS 10 (4). The parent company of the Bank -MKB Bank Plc. - prepare the consolidated financial statements so the Bank shall present the separate financial statements.

Given the expected merger of Takarékbank Zrt. into MKB Bank Nyrt., Takarékbank Zrt.( into MBH Bank Nyrt. from 01 May 2023). will ceased to exist as a legal entity, so the principle of going concern could not be applied. At the same time, since the Bank's activities has continued within MBH Bank Plc. after the merger, the Bank has prepared its financial statements with full consideration of IFRS standards.

### 2.2 Functional and presentation currency

The separate financial statements are presented in Hungarian forint (HUF), that is the functional and presentation currency used by Bank. The figures are rounded to the nearest million, except if indicated otherwise.

#### 2.3 Basis of measurement

The separate financial statements have been prepared on a historical cost basis,- in accordance with permitted assessment methods - except for financial assets and liabilities held for trading, financial assets mandatorily at fair value through profit or loss (FVTPL) and financial assets at fair value through other comprehensive income (FVOCI), that are recorded at fair value in the financial statements.

# 2.4 Change in accounting policies

2.4.1 Initial application of new amendments to the existing standards effective for the current reporting period

The following amendments to the existing standards issued by the International Accounting Standards Board (IASB) and adopted by the EU are effective for the current reporting period:

- IFRS 17 "Insurance Contracts" (issued on 18 May 2017 and effective for annual periods beginning on or after 1 January 2023),
- Amendments to IFRS 17 and an amendment to IFRS 4 (issued on 25 June 2020 and effective for annual periods beginning on or after 1 January 2023),
- Amendments to IAS 1 "Presentation of Financial Statements" and IFRS Practice Statement 2 - Disclosure of Accounting policies (issued on 12 February 2021 and effective for annual periods beginning on or after 1 January 2023). IAS 1 was amended to require

VKVBEK

companies to disclose their material accounting policy information rather than their significant accounting policies.

- Amendments to IAS 8 "Accounting policies, Changes in Accounting Estimates and Errors" Definition of Accounting Estimates (issued on 12 February 2021 and effective for annual periods beginning on or after 1 January 2023). The amendment to IAS 8 clarified how companies should distinguish changes in accounting policies from changes in accounting estimates.
- Amendments to IAS 12 "Income Taxes" Deferred Tax related to Assets and Liabilities arising from a Single Transaction (issued on 7 May 2021 and effective for annual periods beginning on or after 1 January 2023),
- Amendments to IFRS 17 "Insurance contracts" Transition option to insurers applying IFRS 17 and IFRS 9 Comparative Information (issued on 9 December 2021 and effective for annual periods beginning on or after 1 January 2023),

The adoption of these amendments to the existing standards has not led to any material changes in the successor Bank's financial statements.

# 2.4.2 New standards and amendments to the existing standards issued by IASB but not yet adopted by the EU

At present, IFRS as adopted by the EU do not significantly differ from regulations adopted by the International Accounting Standards Board (IASB) except for the following new standards and amendments to the existing standards, which were not endorsed for use in EU as at 1 January 2023 (the effective dates stated below is for IFRS as issued by IASB):

- Amendments to IAS 1 "Presentation of Financial Statements" Classification of Liabilities as Current or Non-Current (originally issued on 23 January 2020 and subsequently amended on 15 July 2020 and 31 October 2022, ultimately effective for annual periods beginning on or after 1 January 2024),
- Amendments to IFRS 10 "Consolidated Financial Statements" and IAS 28 "Investments in Associates and Joint Ventures" - Sale or Contribution of Assets between an Investor and its Associate or Joint Venture and further amendments (issued on 11 September 2014 and effective for annual periods beginning on or after a date to be determined by the IASB)
- **IFRS 14 "Regulatory Deferral Accounts"** (issued on 30 January 2014 and effective for annual periods beginning on or after 1 January 2016) the European Commission has decided not to launch the endorsement process of this interim standard and to wait for the final standard.
- Amendments to IFRS 16 Leases: Lease Liability in a Sale and Leaseback (issued on 22 September 2022 and effective for annual periods beginning on or after 1 January 2024).

**ΤΔΚΔΡΕΚΒΔΝΚ** 

Notes to the Separate Financial Statements

- Amendments to IAS 7 Statement of Cash Flows and IFRS 7 Financial Instruments: Disclosures: Supplier Finance Arrangements (issued on 25 May 2023 and effective for annual periods beginning on or after 1 January 2024).
- Amendments to IAS 12 Income taxes: International Tax Reform Pillar Two Model Rules (issued on 23 May 2023 and effective for annual periods beginning on or after 1 January 2023).

The Bank anticipates that the adoption of these new standards and amendments to the existing standards will have no material impact on the financial statements of the successor Bank in the period of initial application.

# 3. SIGNIFICANT ACCOUNTING POLICIES

#### **3.1 Categories of financial instruments**

The Bank groups the recognised financial assets as follows:

- Cash and cash equivalents
- Financial assets held for trading
  - Derivatives financial assets
- Non-trading financial assets mandatorily at fair value through profit or loss
  - Loans at fair value
  - Open-ended units, stock exchange shares
  - Financial assets measured at fair value through other comprehensive income
    - Securities measured at fair value through other comprehensive income
- Financial assets at amortised cost:
  - Due from bank
  - Loans and advances to customers at amortised cost
  - Securities valued at amortised costs
  - Repurchase assets
  - Subordinated liabilities
- Hedging derivative assets

-

The Bank groups the recognised financial liabilities as follows:

- Financial liabilities held for trading
  - Derivative financial liabilities
- Financial liabilities at amortised cost (other financial liabilities):
  - Due to banks
  - Deposits from customers
  - Repurchase liabilities
- Hedging derivative liabilities

#### 3.2 Cash and cash equivalents

For the purpose of the Separate Statement of Cash Flows, cash and cash equivalents include cash at hand, receivables from the National Bank of Hungary, and receivables from banks with an original maturity of not more than 90 days.

Cash and cash equivalents are presented in the statement of financial position at amortised cost.

#### 3.3 Financial assets at fair value through profit or loss

Securities at fair value through profit or loss are held within a business model whose objective is not to hold securities in order to collect contractual cash flows or not to hold securities both collecting contractual cash flows and selling securities. Securities at fair value through profit or loss are recorded in the statement of financial position at fair value. Changes in fair value are recognised in 'Results from financial instruments measured at fair value through profit and loss . Interest income is recorded in 'Interest and similar income', dividend income is recorded in "dividend income" according to the terms of the contract, or when the right to the payment has been established.

Included in this classification are debt securities that have been acquired principally for the purpose of selling or repurchasing in the near term depending on the market price.

#### 3.4 Derivatives

A derivative transaction is a financial contract between two parties where payments are dependent upon movements in rice in one or more underlying financial instrument, reference yield or index, it is settled in a future date and there is no or low initial investment. Derivatives are recorded at fair value and carried as assets when their fair value is positive or as liabilities when their fair value is negative. Changes in the fair value of derivatives are included in 'Result from financial instruments measured at fair value through profit or loss'. The resulting gain or loss is recognised immediately in 'Result from financial instruments measured at fair value through profit or loss' the interest effects are recorded among other interest income or other interest expense.

Derivatives include forwards, futures, swaps and options.

#### 3.5 Hedge transactions IFRS 9

The Bank makes use of derivative instruments to manage exposures to interest rate, foreign currency and credit risk, including exposures arising from forecast transactions and firm commitments. In order to manage particular risks, the Bank applies hedge accounting for transactions which meet specified criteria.

Upon concluding the hedge contract the Bank drafts the hedge document that sets forth the relationship between the transaction and the instrument hedged. The document describes the nature of risk as well as the risk management goals and strategies. The document also sets monthly the method of measuring hedge effectiveness.

For the purposes of hedge accounting, hedges are classified into two categories:

- a) Fair value hedges which hedge the exposure to changes in the fair value of a recognized asset or liability; and
- b) Cash flow hedges which hedge exposure to variability in cash flows that is either attributable to a particular risk associated with a recognized asset or liability or a forecasted transaction.

There are no net investment hedges in foreign operations.

Changes in the fair value of derivatives that are designated and qualify as fair value hedges and that prove to be highly effective in relation to the hedged risk, are recorded in the Separate Statement of Profit or Loss along with the corresponding change in fair value of the hedged asset or liability that is attributable to the specific hedged risk.

# **ΤΑΚΑΡΕΚΒΑΝΚ**

# Notes to the Separate Financial Statements

In relation to cash flow hedges, which meet the conditions for hedge accounting, the portion of the gain or loss on the hedging instrument that is determined to be an effective hedge is recognized initially in the other comprehensive income item.

The following lines in the profit or loss statement contain the gains or losses in connection with the hedging instruments of hedges (swaps):

- i. Interest income or interest expense
- ii. Exchange differences result
- iii. Results from financial instruments measured at fair value through profit and loss.

For hedges, which do not qualify for hedge accounting (economic hedges), any gains or losses arising from changes in the fair value of the hedging instrument are taken directly to the statement of profit or loss for the period. The Bank has recorded only fair value hedge during 2023.

# 3.6 Securities at fair value through other comprehensive income

Securities at fair value through other comprehensive income (FVTOCI) are held within a business model whose objective is achieved by both collecting of contractual cash flows and selling securities, and the contractual terms of these securities give rise on specified dates to cash flows that are solely payment of principal and interest on the principal amount outstanding. Investments in securities are accounted for on a settlement date basis and are initially measured at fair value. Securities at fair value through other comprehensive income are measured at subsequent reporting dates at fair value.

Unrealized gains and losses (Fair value difference) on securities at fair value through other comprehensive income are recognized directly in other comprehensive income, interest and foreign exchange gains/losses on this items are recognized separate statement of profit or loss. All investments in equity instruments that are not held for trading are classified as at equity instruments measured at fair value through other comprehensive income. The expected credit loss on secrurities at fair value through other comrehensive income are recorded in separate statement of profit or loss. The Bank shall make an irrevocably election to measure the investments in equity instruments at initial recognition on a share-by-share basis. Equity instruments at fair value are presented in other comprehensive income. Amounts presented in other comprehensive income. The investment were sold. The dividends earned on equity instruments are recognised in separate statement of profit or loss.

# 3.7 Financial instruments mandatorily at fair value through profit or loss

The financial instruments mantatorily at fair value throng profit or loss those instruments which are not meet the criteria for valuation at amortised cost or against other comprehensive income.

The Bank shall, in contrast to the result, assess at fair value the financial resources which are not held for trading purposes and result in the payment of interest on capital and outstanding principal amounts not recovered on the basis of the characteristics of the cash flow.

#### 3.8 Loans and advances to customers, due from banks securities at amortised cost

The Bank measures at amortised cost those loans and placements with other banks securities, which are held to collect contractual cash flows, and contractual terms of these assets give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Loans and advances to customers and securities measured at amortized cost are initially recognized at fair value at the date of settlement by Bank, increased or decreased by transaction costs that are directly attributable to the acquisition or origination of the receivables. Loans and placements with other banks and securities are measured at amortised cost, stated at the principal amounts outstanding including accrued interest, expected credit loss for loan or placement losses, respectively.

#### 3.9 Restructuring of loans

In cases of default the Bank favours renegotiating the loans to customers instead of foreclosure wherever possible. Renegotiated loans may be restructured by extending of the loan term and/or agreeing on new conditions. The Bank doesn't measure any significant gain or losses on the restructuring loans.

The Bank management keeps track of renegotiated loans to ensure all terms and conditions are met and to secure future cash payments. Provision for impairment of restructured loans is set up on an individual as well as on a portfolio basis and with the application of the original effective interest rate of the loan.

In case of renegotiated loans, the classification of the clients (and eventually the impairment) may improve if the clients start to pay their instalments as scheduled.

When the contractual cash flows of a financial asset are renegotiated or otherwise modified and the renegotiation or modification does not result in the derecognition of that financial asset, Bank shall recalculate the gross carrying amount of the financial asset and shall recognise a modification gain or loss among 'Modification gain or loss on financial instrument', if it is connected for stage 2, or stage 3 financial asset. Bank presents the modificiation loss of stage 1 financial assets among the "Interest and similar income" The gross carrying amount of the financial asset shall be recalculated as the present value of the renegotiated or modified contractual cash flows that are discounted at the financial asset's original effective interest rate.

When the contractual terms of a financial asset are modified and the modification does not result in derecognition, the Bank determines if the financial asset's credit risk has increased significantly since initial recognition. If the credit risk remains significantly higher than what was expected at initial recognition the loss allowance will continue to be measured at an amount equal to lifetime ECL. The loss allowance on restructured loans will generally only be measured based on 12-month ECL when there is evidence of the borrower's improved repayment behaviour following modification leading to a reversal of the previous significant in-crease in credit risk.

#### 3.10 Impairment losses on loans

Impairment losses on loans and placements with other banks and securities are recognised by the Bank based on the expected credit loss model in accordance with IFRS 9. Based on the three stage model allowance for impairment is recognised at an amount equal to 12-month

# **\* TAKARÉKBANK**

# Notes to the Separate Financial Statements

expected credit loss from the initial recognition, unless purchased or originated credit impaired (POCI). On financial assets with significantly increased credit risk or credit impaired financial assets (based on objective evidences) impairment is recognised in amount of lifetime expected credit loss. An asset that meet the definition of default criteria step into the third stage.

Purchased or originated credit-impaired (POCI) assets are financial assets that are credit-impaired on initial recognition in accordance with IFRS 9 (they meet the definition of default). For purchased or originated credit-impaired (POCI) assets shall apply the credit-adjusted effective interest rate to the amortised cost of the financial asset from initial recognition. At each reporting date, an entity shall recognise in profit or loss the amount of the change in lifetime expected credit.

#### 3.11 Investment in subsidiaries and associates

Investments in subsidiaries and associates are measured at cost by the Bank.

Subsidiaries are entities controlled by the Bank. Control exists when the Bank is exposed, or has rights, to variable returns from its involvement with the subsidiary and has the ability to affect those returns through its power over the subsidiary. In assessing control, substantive potential voting rights are also taken into account.

Where the Bank is a party to a contractual arrangement whereby, the parties that have joint control of the arrangement have rights to the net assets of the arrangement, the Bank classifies its interest in the venture as a joint venture.

Bank classifies investments in entities over which it has significant influence, and that are neither subsidiaries nor joint ventures, as associates. For the purpose of determining this classification, control is considered to be the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

#### 3.12 Tangible and intangible assets

Tangible (fixed) and intangible assets are presented at cost, less accumulated depreciation, and less impairment if any.

The cost of an item of tangible and intangible asset includes the following elements:

- a) its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and quantitative discount;
- b) any costs directly attributable for the assets to be ready their intended use:
  - costs of employee benefits,
  - costs of site preparation,
  - delivery and handling costs,
  - insurance fees,
  - installation and assembly costs,
  - costs of testing,
  - professional fees,
  - costs of parts and maintenance.
- c) the initial estimate of the costs of dismantling and removing the item.

Following elements of costs that are not costs of an item of tangible asset are: - costs of opening a new facility,

- costs of introducing a new product or service,
- costs of conducting business in a new location or with a new class of customer,
- administration and other general overhead costs

Recognition of costs in the carrying amount of an item ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management. Therefore, costs that incurred while an item capable of his intended operating has yet to be brought into use or is operated at less than full capacity are not included in the carrying amount. Furthermore, neither initial operating losses nor costs of relocating or reorganising the Bank's operations are not included.

Depreciation is charged to the statement of profit or loss in the period to which it relates. The useful lives are reviewed annually.

Depreciation is computed using the straight-line method over the estimated useful lives of the assets considering residual value, as follows:

Property	0-2%
Non-owned leasehold improvement	6% - 14.7%
Equipment and furniture	9% - 33%
Software	5% - 50%
Rights representing assets	3.5% - 25%
Hardware	33% - 50%
Vehicles	10% - 33%
Other fixed assets	7% - 50%

Intangible assets have a definite useful life, excluding goodwill.

#### 3.13 Leases

The Bank assessed all lease contracts entered into or modified after the date of 1 January 2018 under IFRS 16 whether a contract is, or contains, a lease.

Determination of whether an agreement is a lease agreement or contains a lease transaction is based on its contents. The Bank analyses agreements to decide whether delivery under the agreement involves the use of a specific asset or assets and transfers the right to use such assets.

An agreement transfers the rights to control the use of an identified asset, if:

- An agreement contains identified asset. An asset can also be identified by being explicitly or implicitly specified in a contract. An asset has to be physically distinct or it represents substantially all of the capacity of the asset. Even if an asset is specified, a customer does not have the right to use an identified asset if the supplier has the substantive right to substitute the asset throughout the period of use.
- The customer has the right to obtain substantially all of the economic benefits from use of the identified asset throughout the period of use.
- The customer has the right to direct the use of the identified asset throughout the period of use. The lessee has this right if, within the scope of its right of use defined in the contract, the customer has the right to direct how and for what purpose the asset is used throughout the period of use.

# **ΤΔΚΔΡΕΚΒΔΝΚ**

# Notes to the Separate Financial Statements

In that case, the relevant decisions about how and for what purpose the asset is used are predetermined, the customer has the right to direct the use of that asset following one of:

- the customer has the right to operate the asset throughout the period of use; or
- the customer designed the asset in a way that predetermines how and for what purpose the asset will be used throughout the period of use.

The Bank shall reassess whether a contract is, or contains, a lease only if the terms and conditions of the contract are changed.

The Bank elect not to apply the requirements of IFRS 16 Leases to intangible assets.

#### The Bank as a lessee

The Bank as lessee shall recognise a right-of-use asset and a lease liability at the commencement date of the lease agreement. Right-of-use assets are initially measured at cost. The cost of a right-of-use asset comprises:

- the amount of the initial measurement of lease liabilities;
- any lease payments made at or before the commencement date;
- any initial direct costs incurred by the lessee; and
- estimates of costs to be incurred by the lessee as a result of an obligation to disassemble and remove an underlying asset or to carry out restoration
- less any lease incentives received.

After the commencement date, the Bank shall measure the right-of-use asset applying a cost model. The Bank depreciates the right-of-use asset using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The determination of the useful life of the right-of-use assets are presented similar to owned property, plant, equipment and vehicles. The Bank applies IAS 36 Impairment of Assets standard to determine whether the right-of-use asset is impaired, and to recognise any impairment loss identified in accordance with the standard.

The Bank shall measure the lease liability at the present value of lease payments that are not paid as at the date of commencement. The lease payments shall be discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Bank use the lessee's incremental borrowing rate. Typically, the Bank use its own incremental borrowing rate to recognise lease liabilities.

At their date of initial re-cognition, lease payments contained in the measurement of lease liabilities comprise the following types of payments for the right to use the underlying asset for the life of the lease:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate (initially measured using the index or rate as at the commencement date);
- amounts expected to be payable by the Bank under residual value guarantees;
- the exercise price of a purchase option if the Bank is reasonably certain to exercise that option;
- payments of contractual penalties for terminating the lease, if the lease period reflects that the Bank used the option of terminating the lease;
- less any lease incentives receivable.

After the commencement date, the Bank shall measure the lease liability by:

- increasing the carrying amount to reflect interest on the lease liability;
- reducing the carrying amount to reflect the lease payments made; and

# **ΤΔΚΔΡΕΚΒΔΝΚ**

#### Notes to the Separate Financial Statements

• remeasuring the carrying amount to reflect any reassessment or lease modifications, or to reflect revised in-substance fixed lease payments.

The Bank shall remeasure the lease liability, if either:

- there is a change in the lease term; or
- there is a change in the assessment of an option to purchase the underlying asset; or
- there is a change in the amounts expected to be payable under a residual value guarantee; or
- there is a change in future lease payments resulting from a change in an index or a rate used to determine those payments.

The Bank shall recognise the amount of the remeasurement of the lease payments as an adjustment to the right-of-use asset. However, if the carrying amount of the right-of-use asset is reduced to zero and there is a further reduction in the measurement of the lease liability, the Bank shall recognise any remaining amount of the remeasurement in profit or loss.

The Bank did not present the right-of-use assets separately in the statement of financial position that does not meet the definition of investment property include right-of-use assets within the same line item as that within which the corresponding underlying assets would be presented if they were owned. The Bank are presented lease liabilities in the statement of financial position as Financial liabilities measured at amortised cost. The interest expense is presented among "Other interest expense".

The Bank has elected not to apply the requirements for short-term leases and to leases for which the underlying asset is of low-value. These types of lease payments will be recognised in the statement of profit or loss as costs using the straight-line method during the life of the lease.

The Bank does not have right-of-use assets that meet the definition of investment property. In the statement of cash flows are classified cash payments for the principal portion of the lease liability within financing activities and short-term lease payments, payments for leases of low-value assets and variable lease payments not included in the measurement of the lea-se liability within operating activities. Cash payments for the interest portion of the lease liability are classified applying the requirements in IAS 7 Statement of Cash Flows for interest paid.

The Bank as a lessee has typically property and company car lease agreements.

#### The Bank as a lessor

The Bank as a lessor shall classify the leases as finance or operating leases. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership of an underlying asset. When a contract includes both lease and non-lease components, the Bank applies IFRS 15 to allocate the consideration under the contract to each component. The Bank shall recognise lease payments from operating leases as income in profit or loss on a straight-line basis. The Bank does not have sublease, sale and leaseback transactions.

#### 3.14 Non-current assets held for sale

The Bank classifies a non-current asset (or a disposal group) as held for sale, if its carrying amount will be recovered principally through a sale transaction, rather than through continuing use. The asset (or disposal group) must be available for immediate sale in its present condition and the sale must be highly probable. The Bank must be committed to the sale which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

The Bank measures a non-current asset (or disposal group) classified as held for sale at the lower of its carrying amount and fair value less cost to sell on initial recognition at the date of classification as held for sale.

An entity shall not depreciate (or amortise) a non-current asset while it is classified as held for sale or while it is part of a disposal group classified as held for sale.

#### 3.15 Impairment of non-financial assets

On the balance sheet date the Bank assesses if there is any indication of impairment. If there is, or in cases where an annual impairment test is required the Bank estimates the recoverable amount of the asset. Recoverable amount is the fair value of the asset net of the costs of sale, or the value in use, whichever is higher. Where the carrying amount of an asset exceeds its recoverable amount, the Bank recognises impairment on the asset, by this the carrying amount is written down to the recoverable amount. When determining value in use the estimated future cash flows are discounted to their present value considering current market assessment of the time value of money and the risks specific to the asset. The appropriate valuation method is applied for the determining fair value net of cost of sales. Several assessments are used to underpin these calculations such as listed share prices or other available fair value indicators.

Each impaired asset is assessed annually, when any indication of a reversal or reduction of earlier impairment is performed. If there is such an indication the Bank estimates the recoverable value of the asset. Reversal of previously entered impairment is only done in cases where there has been a change in the estimates applied for determining the asset's recoverable value since the last reporting of impairment.

The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceeds the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss. Impairment losses relating to goodwill cannot be reversed in future periods.

#### 3.16 Current tax

Current taxes include the corporate income tax, local business tax and innovation contribution payable and refundable amounts and are measured at the amount expected to be recovered from or paid to the tax authorities. The Bank's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period. The tax rates and tax laws in effect at the balance sheet date are used to determine the current tax liability.

# **X TAKARÉKBANK** Notes to the Separate Financial Statements

# 3.17 Deferred taxes

Deferred tax is provided on temporary differences at the balance sheet date between the tax basis of assets and liabilities and their carrying amounts for financial reporting purposes. All important deferred tax liabilities are recognized. Deferred tax assets are recognized only to the extent that it is probable that taxable profit will be available against which it can be utilized. Deferred tax assets and liabilities are measured at the enacted tax rates that are expected to apply in the year when the asset is realized or the liability is settled. Deferred tax assets and liabilities are offset if a legally enforceable right exists to set off current tax assets against current taxes liabilities and the deferred tax relate to the same company and the same tax authority.

### 3.18 Classification into financial liabilities or shareholders' equity

Financial liability is any liability that is:

- a) a contractual obligation:
  - i. to deliver cash or another financial asset to another entity; or
  - ii. to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavourable to the entity; or
- b) a contract that will or may be settled in the entity's own equity instruments and is:
  - i. a non-derivative for which the entity is or may be obliged to deliver a variable number of the entity's own equity instruments; or
  - ii. a derivative that will or may be settled other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of the entity's own equity instruments.

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

#### 3.19 Financial liabilities carried at amortised cost

Financial liabilities, which are not designated at fair value through profit or loss, are classified as financial liabilities carried at amortised cost. At initial measurement, they are recognized at fair value plus transaction fees and charges should adjust the carrying amount at initial recognition that is directly attributable to the acquisition or issue of the financial liability.

The Bank has the following financial liabilities to finance its business: loans from the Hungarian state, interbank loans and customer deposits.

The bank shall classify in this category its non-trading bonds and other non-trading financial liabilities (for example accounts payable, bail/cash deposit).

Financial liabilities that are designated at amortised cost are measured subsequently at amortised cost using the effective interest method.

#### 3.20 Financial guarantee contracts

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due in accordance with the terms of a debt instrument.

Financial guarantee contracts are initially recognised in the financial statements as financial liabilities and measured at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee.

Subsequently, the liability is measured at the amount recognised less cumulative amortisation, and the best estimate of expense required to settle any financial obligation arising as a result of the guarantee.

The financial guarantee fee received is recognised in the statement of profit or loss in 'Fee and commission income' on a straight line basis over the lifetime of the guarantee. Any increase in the liability relating to financial guarantees is recorded in the statement of profit or loss in 'Credit loss expense'. Bank has not a significant amount of non financial guarantee contracts.

#### 3.21 Derecognition of financial instruments

#### 3.21.1 Derecognition of financial assets

The Bank derecognises a financial asset at fair value on the settlement date. The settlement date is the date that an asset is delivered by the Bank or the asset is terminated or expired.

A financial asset (or a part of a financial asset or a group of financial assets) is derecognised when:

- the rights under contract related to the cash flows from the financial asset cease; or
- the rights under contract related to the cash flows from the financial asset are transferred; or an obligation is undertaken by virtue of a transfer agreement to pay the cash flows from the financial asset to third parties; and
- the Bank has transferred substantially all risks and rewards of the asset, or
- the Bank has not retained nor transferred substantially all risks and rewards associated with the asset but has transferred control of the asset.

If the Bank has not retained nor transferred substantially all risks and rewards associated with the asset but has retained control of the financial asset, it continues to recognize the transferred asset in proportion to its continuing involvement. The rate of continuing involvement in a transferred asset is the Bank's rate of exposure to the risks associated with changes in the value of the transferred asset.

When the Bank continues to report the transferred asset in proportion to its continuing involvement it also reports an associated liability.

On derecognition of a financial asset, the difference between the asset's carrying amount and the sum of the consideration received and receivable shall be recognised in profit or loss. On derecognition of an investment in a debt instrument classified as at FVTOCI, the cumulative gain or loss previously accumulated in the investments revaluation reserve is reclassified to profit or loss. In contrast, on derecognition of an investment in an equity instrument which the Bank has elected on initial recognition to measure at FVTOCI, the cumulative gain or loss previously accumulated in the investments revaluation reserve is not reclassified to profit or loss, but is transferred to retained earnings.

3.21.2 Derecognition of financial liabilities

A financial liability (or a part of a financial liability) is derecognised when it ceases, is executed or matured. Exchange or partial exchange of existing financial liabilities or a part thereof with significantly different terms and conditions or significant modification of its terms and conditions is also considered as cessation of the financial liability and is reported as a new financial liability, taking the relevant part of IFRS 9. The difference between the book value of, and the consideration paid for financial liabilities (or a part thereof) that ceased or have been transferred to third parties is reported in the profit or loss.

### 3.22 Provisions

Provisions are recognized when the Bank has present obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Expense relating to lending provision is a part of provision for impairment losses on loan expense. On provision for contingent liabilities related to business combinations is recognized in provisions.

### 3.23 Employee benefits

#### 3.23.1 Short-term employee benefits

Short-term employee benefits, such as wages, salaries and social security contributions, paid annual leave and paid sick leave are settled in the period in which the employees render the related service. Under the Bank's policy, the employer must grant employees their paid leave in the period the leave is earned, except for the paid leave emerges during maternity leave. Deferment of the expected cost of leave is applicable to the Bank and its subsidiaries, but this cost is recognized only if it is material.

#### 3.23.2 Long-term employee benefits

The Bank has a defined jubilee benefit plan for all employees of the Group. The employees receive jubilee benefit only if they remain with the entity for a specified period and benefits are determined by the length of their service. The authority for jubilee benefit, its condition and the benefit are regulated in the Bank's policy.

In the normal course of business, the Bank pays fixed contributions into the Hungarian State and private pension funds on its employees, which is recognized in social security contributions and which cannot be considered as employee benefit plan. The Bank itself does not offer a pension scheme or post-retirement benefit plan, and consequently has no legal or contractual obligation to make further contributions.

#### 3.23.3 Information on Employee share system

From 2022 MKB manages the settlements of the variable pays as regulated by ESP's Remuneration Policy for Takarekbank Plc, because the Bank is the part of MKB Group,. Eligible

# **X TAKARÉKBANK** Notes to the Separate Financial Statements

employees submit a participation declaration, become participants and subject to the relevant regulations.

In order to settle the variable payments of the participants ESP subscribes bonds and buys options. The timing of the bonds that cover the cash part of the variable pay and of the options that cover for the instrument part of the variably pay are aligned with the cycles of the deferred payments. The participants will not become owners, it is the ESP, but they will have a participants' share. They will be entitled for the financial settlement as regulated by the ESP Remuneration Policy, including the deferred payment periods. The settlements and the payments are based on the participants' approved variably pay in line with the deferred periods after the financial instruments are converted to cash.

This share system has not got a significant effect to the separate profit or loss statement of TakarekbankPlc.

# 3.24 Interest and similar income expense

Interest income and interest expense (the interest subsidy received from the Hungarian State or from the client) are recognized time-proportionately using the effective interest rate method. Interest income and interest expense include the amortization of discount or premium on securities.

The effective interest rate is the rate that exactly discounts the estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the carrying amount of the financial asset or liability. The calculation takes into account all contractual terms of the financial instrument (for example prepayment options) and includes any fees or incremental costs that are directly attributable to the instrument and are an integral part of the effective interest rate, but not future credit losses. The carrying amount of the financial asset or financial liability is adjusted if the Bank revises its estimates of payments or receipts. The adjusted carrying amount is calculated based on the original effective interest rate and the change in carrying amount is recorded as interest income or expense. Bank has recorded the modification loss of stage 1 financial asset among the interest income.

Interest income and expenses related to financial instruments are separated by the Bank based on each financial instruments category.

Interest income and interest expenses are accounted on a gross basis by the Bank. "Interest income using effective interest rate method" includes interest income on financial assets measured at amortised cost and financial assets measured at fair value through other comprehensive income. In addition, "Other interest income" includes interest income on financial assets held for trading, financial assets not held for trading that are required to be measured at fair value through profit or loss, derivatives, other assets and financial liabilities. "Interest expense using effective interest rate method" includes interest expense on financial liabilities measured at amortised cost, while "Other interest expense" includes interest expense on financial liabilities held for trading, financial liabilities designated as at fair value through profit or loss, derivatives, other liabilities and financial receivables.

# 3.25 Fees and commission income and expenses

This group shall include fees and commission income and expenses that are not involved in the amortised cost model. Fees and commissions when they relate and have to be included in the amortised cost model shall immediately recognised in profit or loss.

# **X TAKARÉKBANK** Notes to the Separate Financial Statements

Fees and commission incomes can be typically account transaction fees, cash payment fees, portfolio management fees.

# 3.26 Contingent liabilities / contingent assets

The Bank has recorded into off-balance sheet their contingent liabilities, they are not recognised in the financial statements. The contingent liabilities are presented in the Notes. This offbalance sheet items such as guarantees and similar obligations, commitments to extend credit, accepted value of non-balance sheet assets serving as collateral for third party debt. Contingent liabilities are reported in the balance sheet when it becomes probable.

The Bank has recorded into off-balance sheet their contingent assets, they are not recognised in the financial statements. The contingent assets are disclosed in the Notes where an inflow of economic benefits is probable (more than 50%).

This off-balance sheet items such as write-off uncollected debts, received guarantees and bailment.

# 3.27 Post balance sheet events

Events after the balance sheet date are those events that occur between the balance sheet date and the date when the financial statements are authorised by management (Board of Directors, Supervisory Board) for issue.

The Bank is identified adjusting events after the balance sheet date and non-adjusting events after the balance sheet date. Adjusting events after the balance sheet date are incidences that provide evidence of conditions that existed at the balance sheet date, but information is received after the balance sheet date. The Bank shall adjust the amounts recognised in its financial statements to reflect adjusting events after the balance sheet date. Non-adjusting events after the balance sheet date are incidences that are indicative of conditions that arose after the balance sheet date. The Bank shall not adjust the amounts recognised in its financial statements to reflect non-adjusting events after the balance sheet date. The Bank shall not adjust the amounts recognised in its financial statements to reflect non-adjusting events after the balance sheet date. The Bank shall not adjust the amounts recognised in its financial statements to reflect non-adjusting events after the balance sheet date. The Bank shall not adjust the amounts recognised in its financial statements to reflect non-adjusting events after the balance sheet date, but its expected effects are disclosed in the Notes when material.

# 3.28 Offsetting

The Bank does not offset financial assets and financial liabilities, incomes and expenses unless required or permitted by a standard or an interpretation. (For example year-end not realized foreign exchange gains and losses, or exceptional financial instruments and cash-flow statements.). Usually the Bank use offsetting if the economic events are the same or similar and gains and losses arising from similar transactions are not material or their separation is not material, when offsetting reflects the economic content better.

# 3.29 Foreign currency translation

Items included in the financial statements in foreign currencies are translated to the respective functional currencies of the Bank. Transactions in foreign currencies are like transactions that set in foreign currencies or have/had to paid in foreign currencies.

At initial recognition the Bank are translated transactions in foreign currencies to the respective functional currency at the valid NBH rate on the date of the transaction. At the end of the reporting periods:

• monetary assets and liabilities denominated in foreign currencies are translated to the functional currency at the exchange rate on the balance sheet date;

# **ΧΤΔΚΔ**ΡΕΚΒΔΝΚ

### Notes to the Separate Financial Statements

- non-monetary items reported at amortised cost are converted at the exchange rate on the initial day of the transaction; furthermore
- non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are translated to the functional currency at the exchange rate at the date that the fair value was determined.

## 3.30 Trade date and settlement date accounting

A regular purchase or sale of a financial asset is recognized on the settlement date. Exemptions are derivatives where recognition of purchase is done on the day when the deal is contracted. The date of settlement is the day on which the Bank takes possession of the asset. A regular sale or purchase transaction is a transaction where the asset sold and purchased must be delivered within a set interval prescribed by law or as customary in the market.

### 3.31 Bank tax

Since 2010, credit institutions in Hungary have been obliged to pay a so-called bank tax on financial institutions. From 2017, the basis for calculating bank tax is the balance sheet total according to the year-end financial statements two years before the tax year. Given that the bank tax is based on non-net income values, it does not meet the conditions for corporate income tax under IFRS, therefore the Bank recognises it as an operating expense in the profit and loss account. Credit institutions and financial enterprises are subject to extra-profit tax in 2022 and 2023. The tax liability was based on the net sales revenue calculated on the basis of the annual accounts of the previous tax year, i.e. net sales revenue in 2021 for 2022. The tax liability had to be paid in two equal installments during the year.

Regarding the determination of the tax base for 2023, an amendment has been published, according to which the amount of the tax base for the first half of the year is 50% of net sales according to the Act on Tax of 2022, while the part of the tax base for the second half of the year is determined on the basis of the annual report of the tax year preceding the tax year, adjusted in accordance with the regulation. The Bank recognised the total annual amount of the extra-profit tax as an expense, including the above adjustment. The amount of the 2023 extra profit tax was paid by the legal successor on May 30, 2023. Liabilities for 2022 and 2023 are presented under bank operating expenses in note 10.

# 3.32 Critical accounting estimates and assumptions

The preparation of financial statements in conformity with IFRS requires using of estimates and assumptions that affect the amounts reported in the financial statements and notes thereto. Although these estimates are based on management's best knowledge of current event and actions the actual results may differ from those estimates. Estimates are applied in the following areas.

#### **Going concern**

The Bank's management assessed the Bank's capabilities to continue operation and found that the Bank has the resources necessary for continued operation after the merge to MKB Bank Plc. Furthermore, the management is not aware of any significant uncertainty that might raise serious doubts in respect of the Bank's ability to exist as a going concern.

# **ΤΑΚΑΡΕ΄ΚΒΑΝΚ**

# Notes to the Separate Financial Statements

Given the expected merger of Takarékbank Zrt. into MKB Bank Nyrt., Takarékbank Zrt. was cease to exist as a legal entity, so the principle of going concern could not be applied. At the same time, since the Bank's activities has continued within MBH Bank Nyrt. after the merger, the Bank has prepared its financial statements with full consideration of IFRS standards.

#### Fair value of financial instruments

In cases where the fair value of financial assets and liabilities are not measured at marked to market, other kind of assessment model is necessary to be used to determine fair value. Wherever possible, the input of these models is observable market data. Where such data are not available the Bank uses valuation model to determine fair value. (Note 25)

#### **Deferred tax assets**

Deferred tax assets are recognized in respect of tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilized. Judgment is required to determine the amount of deferred tax asset that can be recognized, based upon the likely timing and level of future taxable profits, together with future tax planning strategies. (Note 12)

#### Loan impairment test and its result

The Bank assesses whether it is necessary to set up provisions for impairment of loans and advances to customers. The management makes the relevant decision in view of estimations of amounts and future cash flows. When estimating future cash flows the Bank makes judgments regarding the debtor's financial situation and the net sales price of the collateral. For the loans and advances that have been assessed individually and found not to be impaired as well as for individually insignificant loans and advances, impairment is also assessed on a portfolio basis, if necessary, taking into consideration the type and classification of loan into homogeneous categories based on clearly defined transaction risks, non-performance history and losses. (Note 30)

#### Impairment of non-financial assets

The Bank assesses the existence of possible impairment of assets. The Bank estimates the recoverable value of the asset. Recoverable value is the fair value of the asset net of the costs of sale, or the value in use, whichever higher.

When determining value in use expected cash is discounted in consideration of the time value of cash and asset-specific risks.

Each asset is assessed annually (except stated otherwise), when any indication of a reversal or reduction of earlier impairment is assessed. If there is such an indication the Bank estimates the recoverable value of the asset.

# 3.33 Reclassification and error

After the balance sheet date of the 2022 separate financial statements, no errors have been identified that would materially affect users' decisions based on the separate financial statements closing activities as of April 30 2023. In the separate financial statements closing activities as at 30 April 2023, 31 December 2022 has been reclassified. Of the items shown under the line liabilities to customers, HUF 117,364 million is payable to credit institutions. This reclassification occurred within the main line financial liabilities measured at amortised cost.

# 3.34 Changes in the legal and regulatory environment and its effect on the separate financial statements

Due to the Russian-Ukrainian armed conflict in the territory of Ukraine and the resulting humanitarian catastrophe, the below government decrees and other legal instruments adopted in the state of emergency declared with Act XLII of 2022 influenced the Bank's activity:

- Gov. Decree 197/2022. (VI.4.) on extra profit taxes, amended by Gov. Decree 144/2023. (IV.24.) (Note 10)
- Client effected by payment relief program in 2022 (Note 30)

#### 3.35 Change in estimates

There were no areas where there was a significant change in estimates, except in relation to changes in fair value of loans to credit risk and loans to customers measured at fair value through mandatory profit or loss. (Notes 29 and 30).

# 4. INTEREST AND SIMILAR INCOME AND EXPENSE

	1 January 2023 - 30 April 2023	1 January 2022 - 31 December 2022
Interest income		
Financial assets at amortised cost	95,260	187,748
Financial assets at fair value through other compre- hensive income	3,105	8,615
Interest income calculated using the effective in- terest method	98,365	196,363
Financial assets held for trading	12,427	16,337
Non-trading financial assets mandatorily at fair value through profit or loss	5,020	11,315
Derivatives – Hedge accounting, interest rate risk	4,568	6,601
Other assets/sight deoposit	5,913	6,771
Interest income on financial liabilities	48	102
Income similar to interest income	27,976	41,126
Interest income and similar to interest income	126,341	237,489

\*From the Modification (loss) / gain on financial instruments in case of the stage1 financial instruments the Company recognizes the impact in the line "Interest incomeit was not significant in 2023 (HUF 2,541 million in 2022).

Interest and similar income increased in line with the general market environment.

# 

	1 January 2023 - 30 April 2023	1 January 2022 - 31 December 2022
Interest expense		
Financial liabilities measured at amortised cost	34,265	53,640
Interest expense calculated using the effective interest method	34,265	53,640
Financial liabilities held for trading	8,471	14,519
Derivatives — Hedging accounts, interest rate risk / Hedging derivatives	1,153	3,229
Interest expense on financial assets	(8)	179
Other interest expense	9,616	17,927
Interest expense and expense similar to inte- rest expense	43,881	71,567

Interest and similar income increased in line with the general market environment.

**ΤΑΚΑΡΕΚΒΛΝΚ** 

#### Notes to the Separate Financial Statements

# 5. FEE AND COMMISSION INCOME AND EXPENSE

	1 January 2023 - 30 April 2023	1 January 2022 - 31 December 2022
Fee and commission income		
Account management fees	14,815	46,080
Fee and commission income related to bank cards	4,121	12,766
Lending fees income	767	2,702
Agency fee income	2,704	6,473
Other	25	51
Total	22,432	68,072

### The following fee and commission income is recorded in accordance with IFRS 15:

Fee income related to account management

The Bank provides account management services to its retail and business clientele. The main types of service are: opening an account, monitoring the balance, arranging transactions within and outside the bank on the basis of a customer order/provision, arranging deposit transactions in relation to the account, cash flow, closing of accounts. Depending on the regularity of the service, their service fee and jute receipts will be charged to customer accounts on a daily, monthly (or more regular basis) or on a case-by-case basis.

In the case of continuous services (e.g. monthly fee for account management, monthly fee for sms services, etc.), fee receipts are recorded monthly on the last day of the month. These fees are typically fixed fees.

In the case of transaction-based services (e.g. remittance orders, direct debits, cash payments, etc.), transaction fees are settled at the same time as the transaction or by collecting monthly transaction fees. Fees are determined on the basis of the amount of the transaction, in % or in combination with a fixed and % combination.

Credit card fee and commission income

Credit card fees are typically fixed fees because card transactions are free of charge. Fixed fees are related to the maintenance of the card (annual card fee), card re-manufacture and replacement.

Fee income related to lending

Non-interest charges related to credit transactions are regular monitoring fees, fees for validation, verification, review and administration fees. These fees are recorded when the service is incurred or, in the case of a continuous service, monthly, ex post.

Agent fees

The Bank provides brokerage services to other banks, insurers, investment service providers, factor companies. The fees for these services are charged monthly, depending on the volume and value of the customers, transactions, transactions, usually monthly, sold or served on the order.

**X TAKARÉKBANK** Notes to the Separate Financial Statements

	1 January 2023 - 30 April 2023	1 January 2022 - 31 December 2022
Fee and commission expense		
Account management fees	1,930	5,363
Fee and commission expense related to bank cards	2,393	5,278
Lending fees expenses	3,734	8,044
Agency fee expense	354	1,119
Other	22	82
Total	8,433	19,886

\*Lending fees increased proportionally compared to th previous year due to an increase in turnover.

#### **The following fee and commission expenses are recorded in accordance with IFRS 15:** Fee expenses related to account management

The fees paid for ancillary services related to account management services provided to customers are typically fees incurred in connection with the payment of account management fees (nostro) to other banks, the sending of statements, cash logistics, cash processing, postal cash transfers, postal payments, postal payments incurred in order to serve the account management of customers. They are usually monthly and regularly in line with continuous account management.

Fee and commission expense related to bank cards In connection with the provision of bank card services, the Bank pays the transaction and production and distribution fees of the bank card to the parent company who is the bank card provider. The amount of these fees depends on the number, volume and value of card transactions, so there are variable rates, but there are also fixed monthly fees. They are accounted for on a monthly basis. Lending fees

#### Fees and commissions incurred in connection with the lending of the Bank's clients to other banks and refinancing institutuions are recorded (one-off disbursement fees for refinancing loans, verification fees, etc.). They shall be accounted for on a regular basis and may be subject to variable remuneration depending on the refinancing facility or transactions, but may also be fixed remuneration. They shall be accounted for on a monthly basis or on a case-bycase basis for one-offs.

Fees paid to other entities in connection with client loans are also incurred if they are not part of the effective calculation of interest, e.g. notarial fees, valuation fees, national or other central database usage fees, if they have been re-invoiced to the customer. They are accounted for on a monthly basis on a case-by-case basis or on a continuous basis.

Agent's fee

The Bank also sells its products through agents, so its payments for brokering are typically made on a monthly basis, depending on the volumes sold. Typically used broker services include currency exchange by currency exchange agents, etc.

# 6. RESULTS FROM HEDGE ACCOUNTING, NET

	1 January 2023 - 30 April 2023	1 January 2022 - 31 December 2022

Damages	116	196
Other	44	264
Total	2,611	1,562

\*According to the Bank's internal regulations, subsidy from bank tax.

# **10.OPERATING EXPENSES**

	1 January 2023 - 30 April 2023	1 January 2022 - 31 December 2022
Staff costs	9,996	32,750
Rental fee	243	191
Depreciation of tangible assets	1,129	3,881
Depreciation of intangible assets	218	797
General administrative costs and auditors fee*	5,276	15,077
Marketing and advertising	436	1,070
Consultancy fees	101	1,192
IT costs	5,146	15,300
Other taxes and contributions **	32,266	44,640
Insurance fees	35	133
Supervisory, authority fees***	1,891	7,189
Other	36	92
Total	56,773	122,312

\*Cost allocations resulting from SLA-based settlement agreements concluded between the banks of the Bank Group, which include wage, material, IT services and depreciation. The auditor's fee for the Individual Financial Statements closing the activity accounted for for 2023 was HUF 57,750 million (+ VAT).

\*\*In 2023, the amount of costs according to the amended legislation due to the extra profit special tax is HUF 21 billion. (HUF 14.2 billion in 2022.)

\*\*\*Obligation to pay fees to OBA. HUF 1,462 million (HUF 5,262 million in 2022)

# **11.STAFF COSTS**

	1 January 2023 - 30 April 2023	1 January 2022 - 31 December 2022
Wages and salaries	7,793	25,848
Social contribution	1,314	4,070
Other personnel related payments	855	2,831
Jubilee benefit obligation	34	1
Total	9,996	32,750

Wages contribution is payable by the Bank based on gross wages and salaries paid to employees. The full-time headcount of the Bank at the end of the reporting period was 3,304. The average annual full-time headcount in 2022 was 3,399.

# **12.INCOME TAX**

Income tax expense recognized in the Statement of Profit or Loss and Other Comprehensive Income

# 

	2023	2022
Current tax expense	1,493	1,386
Corporate tax charge – on current year profit	1,493	1,386
Deffered tax (income) / expense	1,624	1,295
Origination (reversal) of temporary differences	64	(334)
Origination (reversal) of non-temporary diffe- rences	1,560	1,629
Local tax	2,625	5,292
Innovation fee	393	793
Income tax (income) / expense	6,135	8,766

Both in the reporting period and in 2022 9% current income tax rate was applied on taxable profit in Hungary. Due to this, 9% rate was applied both for current income tax and deferred tax purposes.

#### Reconciliation of effective tax rate

	2023		2022	
	%	HUF million	%	HUF million
Profit before income tax		38,281		34,247
Income tax using the domestic corporation tax rate	9.00%	3,445	9.00%	3,082
Local tax	6.86%	2,625	15.45%	5,292
Innovation fee	1.03%	393	2.32%	793
Non-temporary difference	-	-	1.68%	576
Re-assessment of unrecognised tax losses carryforwards	(0.60%)	(230)	(1.48%)	(507)
Difference due to Corporate tax group	(0.24%)	(90)	-	-
Other tax effect	(0.02%)	(8)	(1.37%)	(470)
Income tax (income) / expense	16.03%	6,135	25.60%	8,766

The Bank relied on its available business plans for calculating the amount of tax losses that can be offset against future tax bases after the merge. Tax losses can be offset against up to 50% of future tax bases.

On 30 April 2023, the Bank had unused tax losses amounting to HUF 34,031 million (2022: HUF 51,363 million) with the following maturity (the following amount is usable by MBH Bank Nyrt. too)

	2023	2022
Maturity up to 2023	-	3,067
Maturity up to 2024	12,926	18,733
Maturity up to 2025	18,196	18,196
Maturity up to 2026	2,909	2,909
Maturity up to 2030	-	8,458
Tax loss carryforwards	34,031	51,363

In 2015, the rules of utilization of tax losses carried forward have changed in Hungary: tax losses arising in 2015 and in following years, can be utilized solely in the subsequent five years following the tax year in which they were generated. Tax losses incurred before 2015 can be utilized until 2030. The unused tax loss is available only the end of the maturity, after the date of maturity the amount of unused tax loss is not part of the deferred tax calculation.

The following table presents the main factors of change in deferred tax:

2023 P/L-effective and neutral effects on deffered tax as- sets (DTA) and deffered tax liabilities (DTL)	Opening balance DTA/DTL	P/L-ef- fective movement of DTA/DTL	FVO CI move ment of DTA/ DTL	Closing ba- lance DTA/DTL
Deffered Tax Assets - due to taxable temporary differences				
Assets				
Impairment on receivables	3	(2)	-	1
Securities	910	-	(395)	515
Intangible assets	3	(3)	-	-
Tangible assets	45	(45)	-	-
<b>Liabilities</b>				
Provision	283	(13)	-	270

Increase	-	-	-	-
Decrease	-	-	-	-
Closing balance	-	-	-	-
Net value	1,368	1,613	684	3,665

The tables contain the tangible assets of the Bank expected the right-of-use assets.

Tangible assets of the separate financial statement contain the right-of-use assets under IFRS 16. The net carrying amount of the right-of-use assets was HUF 6,956 million as at 30 April 2023 and HUF 4,695 million as at 31 December 2022. The reason for the increase was the extension of the leas of the Bank's one of the office building.

The right-of-use assets under IFRS 16 have been reported in Note 22.

The Bank estimates the recoverable amount of the tangible asset. Recoverable amount is the fair value of the asset net of the costs of sale, or the value in use, whichever is higher. Where the carrying amount of an asset exceeds its recoverable amount, the Bank recognises impairment on the asset, by this the carrying amount is written down to the recoverable amount. The Bank had not been recognised impairment on tangible assets in 2023, as the use of the assets continues in the successor MBH Bank Plc.

# .

# 21.INTANGIBLE ASSETS

30 April 2023	Intangible assets	Total
Gross value		
Opening balance	2,079	2,079
Increase	418	418
Decrease	(17)	(17)
Closing balance	2,480	2,480
Depreciation		
Opening balance	945	945
Annual depreciation	218	218
Decrease	(17)	(17)
Closing balance	1,146	1,146
Impairment		
Opening balance	-	-
Increase	-	-
Reversal		
Closing balance	-	-
Net value	1,334	1,334

The Bank uses software, licenses, trademarks, telephone line locks, ISDN connection fees and utility development contributions purchased as intangible assets.

The Bank carried out an estimate of the rate of return on intangible assets. Based on this, there were no assets at the Bank where recoverable amount was lower than the carrying amount of the asset, so no impairment was recognised for intangible assets in 2023, as the use of the intangible assets continues in the successor MBH Bank Plc.

# **INTANGIBLE ASSETS (CONTINUING)**

# 

# 22.IFRS 16 LEASES

#### **Right-of-use and tangible assets**

	30 April 2023	<b>31 December 2022</b>
Owned property, plant and equipment	3,436	3,665
Right-of-use assets, except investment properties	6,956	4,695
Total property, plant and equipment	10,392	8,360

#### Lease liabilities

Lease liabilities presented in the statement of financial position

	30 April 2023	31 December 2022
Short term	2,355	2,003
Long term	4,720	2,919
Total lease liabilities	7,075	4,922

#### Maturity analysis - undiscounted contractual payments

	30 April 2023	31 December 2022
Up to 1 year	2,567	2,108
1 year to 5 years	4,968	3,018
Over 5 years	6	11
Total undiscounted lease liabilities	7,541	5,137

#### **Right-of-use assets**

	Property	Company car	Total
Opening balance at 1 January 2022	5,833	1,153	6,986
Increase	2,180	269	2,449
Amortization for the year	(2,225)	(524)	(2,749)
Decrease	(1,955)	(36)	(1,991)
Balance at 31 December 2022	3,833	862	4,695
Increase	3,313	28	3,341
Amortization for the year	(696)	(154)	(850)
Decrease	(229)	(1)	(230)
Balance at 30 April 2023	6,221	735	6,956

The reason for the increase in the right of use asset was the extension of the lease of one of the Bank's central buildings.

#### **Total cash outflow for leases**

	30 April 2023	31 December 2022
Total cash outflow for leases	(2,404)	(2,427)

#### Items related to lease liabilities presented in profit or loss

	30 April 2023	31 December 2022
Interest expense on the lease liabilities	(47)	(125)
Total	(47)	(125)

#### Items presented in the statement of cash flows

	30 April 2023	31 December 2022
Interest expense on the lease liabilities	(47)	(125)
Financing cash flow	(2,404)	(2,427)

The Bank, as the lessee, did not apply the practical solution under the lease payment modifications resulting from the lease relief to any of the lease agreements, as it was not provided with lease relief as a direct consequence of the Covid19 pandemic.

# 23. OTHER ASSETS

	30 April 2023	31 December 2022
Accrued income and prepaid expenses*	3,675	3,562
Reclaimable taxes	114	221

Accrued amount of fair value difference at initial re- cognition of loans under Funding for Growth Scheme	313	405
Other	38	23
Total	4,334	4,405

\*Accruals are mainly related to accruals for credit card services, MFB point accruals and OBA fee accruals.

**X TAKAREKBANK** Notes to the Separate Financial Statements

# 24. FINANCIAL LIABILITIES MEASURED AT AMORTISED COST

	<b>30 April 2023</b>	<b>31 December 2022</b>
Deposits	2,391,667	2,521,337
Amounts due to other banks*	579,728	645,221
Repurchased liabilities	-	30,283
Subordinated liabilities**	25,552	23,947
Other financial liabilities	10,183	7,732
Total	3,007,130	3,228,520

\*This line shows the stock of refinanced loans disbursed under the Funding for Growth Scheme (NHP).

\*\* Subordinated liabilities include subordinated loans granted by MKB Plc, qualifying as additional capital instruments under Article 63 of the CRR, amounting to HUF 22 billion. The original maturity of the loan capital is 2 July 2029. The transaction interest rate is 1 month BUBOR + 4.9%, while the interest period is 1 month. The loan capital was settled with MKB Bank Plc. during the merger of Takarékbank Zrt.

# **25. PROVISIONS**

Provisions are set up mainly for current and contractual obligation. Provision is also set up for a pending lawsuit. The changes in provisions are accounted for in credit loss expense or in other operating expense.

2023	Credit risk provision	Provision for reorga- nization	Provision for amounts relating to accrued va- cation pay	Other provision	Provision for pending lawsuit	Total
Opening balance at 1 January 2023	5,116	2,299	419	394	39	8,267
Increase in the pe- riod	3,780	-	389	-	121	4,290
Use of provision in the period	-	-	-	(34)	(24)	(58)
Derecognition of provision in the pe- riod	(3,829)	(168)	(419)	(7)	(8)	(4,431)
Closing balance at 30 April 2023	5,067	2,131	389	353	128	8,068

The net balance of provisions and expenses for 2023 was HUF -199 million, of which HUF -101 million was recognised under provisions in the income statement, while HUF -64 million was recognised under bank operating expenses. In relation to under-balance sheet exposures denominated in foreign currency, the annual revaluation difference of provisions recognised in the currency of the exposures amounts to HUF 34 million, which is reflected in the profit or loss of the exchange difference in the profit and loss account.

2022	Credit risk pro- vision	Provision for reorga- nization*	Provision for amounts relating to accrued va- cation pay	Other provision	Provision for pending lawsuit	Total
Opening balance at 1 January 2022	4,567	-	657	240	170	5,634
Increase in the period	17,438	2,576	419	900	414	21,747
Use of provision in the period	-	-	-	(1)	(492)	(493)
Derecognition of provision in the pe- riod	(16,889)	(277)	(657)	(745)	(54)	(18,622)
Closing balance at 31 December 2022	5,116	2,299	419	394	39	8,267

\*The provision was made in connection with liabilities related to lending activities, remuneration programs, restructuring and severance payments.

# **26.OTHER LIABILITIES**

	30 April 2023	31 December 2022
Taxes payable	25,939	3,930
Suppliers	-	-
Accrued expenses*	16,325	19,370
Accrued part of disbursed liabilities under Funding for Growth Scheme	551	694
Other	136	89
Total	42,951	24,083

\*In 2023, the amount of tax payment costs due to the extra profit special tax is HUF 21 billion.

\*\*A significant proportion of the accruals represent the amount of accruals due to cost divisions accounted for as a result of the SLA settlement agreement between the banks of the Banking Group. (SLA see note 10)

# **27. SHARE CAPITAL**

### 27.1 Ownership structure

The table shows the structure of the shares as follows:

Type of shares	Number	of shares	Face value ( I	HUF/pieces)	Total face value (million HUF)		
	30.04.2023	31.12.2022	30.04.2023	31.12.2022	30.04.2023	31.12.2022	
Ordinary shares (Series "A")	9,826	9,826	10,000,000	10,000,000	98,260	98,260	
Ordinary shares (Series "C")	867	867	100,000,000	100,000,000	86,700	86,700	
Priority shares (Se- ries"B")	200,000	200,000	10,000	10,000	2,000	2,000	
Total	210,693	210,693	-	-	186,960	186,960	

Ordinary shares (Series "A") and ordinary shares (Series "C") embody general shareholder rights.

Priority shares (divident preference shares) (Series "B")

The owners of the Company's dividend preference shares of series 'B' shall jointly be entitled to 12.5% (twelve point five percent) of the after-tax profit for the previous financial year, or of the after-tax profit supplemented with available profit reserves from the current year that is available for distribution to the benefit of members, and has been ordered for distribution by the supreme body, in proportion of the nominal value of their respective shares. Voting rights shall be linked to the Company's dividend preference shares of series 'B' irrespective of dividend payment.

# 

Notes to the Separate Financial Statements

The parent company of the MKB Bank Plc. is the Magyar Bankholding Zrt., beyond that, the ultimate owner cannot be identified.

### 27.2. Other reserves

	30 April 2023	31 December 2022
General reserve	5,763	2,548
Other retained earnings	919	919
Closing balances	6,682	3,467

### 27.2.1 General reserve

In accordance with statutory requirements, the Bank is required to set up a non-distributable general reserve equal to 10% of statutory profit after tax. Increases in the general risk reserve are separated from retained earnings, as calculated under Hungarian regulatory rules, and thus are not charged against income. According to the Section 13 (8) of the Government Decree No. 250/2000 (XII.24.) on the specifics of the annual reporting and bookkeeping tasks of investment companies are required to release the general reserve when loss after tax deduction occurs. In 2023, HUF 3,215 million general reserve was booked.

### 27.3 Cumulated other comprehensive income

	30 April 2023	31 December 2022
Opening balance	(9,473)	(4,429)
Cumulated other comprehensive income	3,040	(5,044)
Items that will not be reclassified to profit or loss	-	25
Fair value changes of equity instruments measured at fair value through other comprehensive income	-	25
Items that may be reclassified to profit or loss	3,040	(5,069)
Hedging Instruments (unmarked items)	(25)	687
Debt instruments at fair value through other compre- hensive income	3,460	(6,666)
Income tax relating to items that may be reclassified to profit or (-) loss	(395)	910
Other reclassification	10	-
Closing balance	(6,423)	(9,473)

# **28. CONTINGENT LIABILITIES**

To meet the financial needs of customers, the Bank enters into various irrevocable commitments and contingent liabilities. Even though these obligations may not be recognised on the separate statement of financial position, they do contain credit risk and are therefore part of the overall risk of the bank.

Off-balance sheet commitments comprise of loans not drawn and other contracted future payments to suppliers of the Bank:

	30 April 2023	31 December 2022
Guarantees	62,041	47,122
Loan commitments	371,483	358,568
Contingents liabilities from litigation	488	463
Total	434,012	406,153

# 29. FAIR VALUE OF FINANCIAL INSTRUMENTS

The following methods and assumptions were used to estimate the fair value of the on- and offbalance sheet financial assets and liabilities:

Financial instruments stated at amortized cost: due to short-term maturity profiles, the carrying values of certain financial assets and liabilities were assumed to approximate their fair values. These include cash and due from banks and with the National Bank of Hungary as well as deposits.

Securities at fair value through other comprehensive income: Securities at fair value through other comprehensive income held for liquidity purposes are marked to market. For investments traded in organised financial markets, fair value is determined by reference to Stock Exchange quoted market bid prices at the close of business on the balance sheet date. For investments where there is no quoted market price, a reasonable estimate of the fair value is determined by reference to the current market value of another instrument which is substantially the same or is based on the expected discounted cash flows.

#### 29.1 Financial assets at amortised cost

The Bank calculates the fair value (level 3) of loans and advances to customers and refinanced loans at amortized cost on an individual basis.

The applied valuation model takes into account the following:

- The scheduled and calculated repayments, with certain restrictions.
- In case of loan repricing events the model recalculates the interest cash flow.
- In case of loans where amortized cost is calculated with simplified approach no FV correction is applied.

The cash flow series calculated in this way are discounted with the yield curve applied in the Bank's evaluation, which contains the following components:

- Relevant market yield curve
- Spread implied by the annual risk cost
- Premium implied by annual risk costs
- Spread implied by the capital allocated to the loans (regulatory minimum requirement and all addons)
- Allocated operational costs

The net value of assets, i.e. the fair value of the total portfolio of loans is determined by combining and exchanging to HUF the FX values.

Under IFRS 13 a fair value measurement requires during the selection of appropriate valuation techniques an entity to determine all the following:

- all information what is reasonably available for the Bank;
- current and expected market conditions;
- the investment timeline and the type of investment (for example in measuring the fair value of short-term financial investment the current market sentiment to be better reflected some valuation technique than others);
- an entity's lifecycle of an equity instruments (the fair value of the investments in different life cycles is better reflected by some valuation models than by others);
- pro- and counter-cyclicality of an entity's business activity; and
- there are entity-specific factors, in which the entity operates.

All figures in tables are in HUF million except otherwise noted

The Notes comprising a summary of significant accounting policies and other explanatory information form an integral part of the Financial Statements

In case of illiquid quoted equity instruments are applied 180 days weighted average price in accordance with the market practice for measuring fair value by the Bank.

When a quoted price of an equity instrument is not available the Bank shall measure during the selection of appropriate valuation techniques that primarily takes into account the future cash flows that a market participant would expect to receive from holding the equity instruments. Dividend and cash flow expectations are available from market reporting agent (Bloomberg, Refiniti), business reports, management letter of intent, etc.

The fair value of financial assets at amortized cost is shown in the table below:

	30 April 2023		31 December 2022	
	Net book value	Fair value	Net book value	Fair value
Fair value of financial assets at amortized cost	2,419,653	2,202,428	2,813,745	2,533,356

### 29.2 Fair value of other items in the statement of financial position

No estimation is made in respect of the fair value of assets and liabilities that are not considered to be financial instruments, such as fixed assets and other assets and liabilities. Given the use of subjective judgement and uncertainties, the fair values should not be interpreted as being realisable in an immediate settlement of the instruments.

#### 29.3 Fair value of derivative transactions

Swap transactions are contracts between two parties to swap the differences of interests or exchange rates for a fixed amount. In case of interest rate swap (IRS) transactions, parties usually swap the fixed and variable interest payments of a given currency. In FXS, they swap fixed payments and given amounts of different currencies. CCIRSs are swap transactions where parties swap fix amounts in different currencies as well as fixed and variable interest payments.

	Fair	value	Notional amount	
	30 April 2023	<b>31 December 2022</b>	30 April 2023	<b>31 December 2022</b>
Swap deals	-	131	-	32,020
IRS deals	12,197	18,043	150,582	196,582
MIRS	8,214	10,024	33,870	35,472

Total derivative financial assets	42,060	55,914	274,004	385,483

# **ΤΑΚΑΡΈΚΒΑΝΚ**

### Notes to the Separate Financial Statements

	Fair	value	Notional amount		
	30 April 2023	<b>31 December 2022</b>	30 April 2023	31 December 2022	
Swap deals	435	1,916	164,776	122,330	
IRS deals	15,546	15,859	105,542	38,941	
State bonds forward deals	3,003	1,264	5,693	5,693	
Other derivatives	1	-	351	-	
Total trading derivate liabilities	18,985	19,039	276,362	166,964	
Hedge derivative deals	300	522	4,000	4,051	
Total derivative financial liabilities	19,285	19,561	280,362	171,015	

The fair value of derivative deals is also calculated based on a cash flow basis by the Bank, the derivatives are broken down to elementary cash flows and the present value is calculated. The present value of the future cash flows of fixed interest rate deals is calculated by the Bank using the zero-coupon swap yield curve corresponding to the appropriate currency. The fair value of swap deals is the difference of the present value of the two series of cash flows not yet due (incoming and outgoing).

In the case of floating rate deals the expected interest rates are estimated on a forward basis including interest premium. The interest cash flow calculated and the principal payments are discounted to present value using the multi-level yield curve (forward yield curve, and discounting curve). The fair value of the deal is the aggregate of the present values.

For the Bank's existing derivative contracts designated as fair value hedges, the purpose of the transaction is to exchange fixed interest rate contracts for floating rate transactions and to hedge the resulting fair value risk. The parameters of the hedging instrument (maturity, amount, currency, interest rate, etc.) and thus its cash flow are the same as the hedged security's cash flow of capital and interest.

In the valuation of hedging transactions, the Bank establishes a so-called hypothetical swap and measures its efficiency accordingly.

The Bank reported hedge for swap transactions in the separate IFRS financial statements of Bank. The effect of this is shown in the table on 30 April 2023.

					30 April 2023
Hedging type	Hedged transac- tion type	Fair value of hedging	Fair value of a hedged contract	Hedging gain/loss	Loss/gain on a hedged transaction

Bank employs repurchase agreements and master netting agreements as a means of reducing credit risk of derivative and financing transactions. They qualify as potential offsetting agreements. Master netting agreements are relevant for counterparties with multiple derivative contracts. They provide for the net settlement of all the contracts in the event of default of any counterparty. For derivatives transactions the values of assets and liabilities that would be set off as a

# **ΧΤΔΚΔΡΕΚΒΔΝΚ**

Notes to the Separate Financial Statements

result of master netting agreements are presented in the column 'Financial instruments'. If the net position is further secured by cash collateral or non-cash financial collaterals the effects are disclosed in columns 'Cash collateral received / pledged' and 'Non-cash financial collateral received / pledged' respectively.

Repurchase agreements are primarily financing transactions. They are structured as a sale and subsequent repurchase of securities at a pre-agreed price and time. This ensures that the securities remain in the hands of the lender as collateral in case the borrower defaults on fulfilling any of its obligations. Offsetting effects from repurchase agreements are disclosed in the column 'Non-cash financial collateral received / pledged' respectively. Collateral is presented at the fair value of the transferred securities. However, if the fair value of collateral exceeds the carrying amount of the receivable/liability from the repo transaction the value is capped at the level of the carrying amount. Remaining position may be secured by cash collateral. Cash and non-cash financial collateral involved in these transactions is restricted from being used it by the transferor during the time of the pledge.

# 29.5 Fair value of financial instruments carried at fair value

The Bank uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities;

Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly; and

Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

The Bank calculates the fair value of non-trading financial assets mandatorily at fair value through profit or loss on an individual basis.

The applied valuation model takes into account the following:

- The scheduled and calculated repayments, with certain restrictions.
- In case of loan repricing events the model recalculates the interest cash flow
- In case of loans where amortized cost is calculated with simplified approach no FV correction is applied

The cash flow series calculated in this way are discounted with the yield curve applied in the Bank's evaluation, which contains the following components:

- Relevant market yield curve
- Spread implied by the annual risk cost
- Spread implied by the capital allocated to the loans (regulatory minimum requirement and all addons)
- Allocated operational costs

The net value of assets, i.e. the fair value of the total portfolio of loans is determined by combining and exchanging to HUF the FX values.

Under IFRS 13 a fair value measurement requires during the selection of appropriate valuation techniques an entity to determine all the following:

- all information what is reasonably available for the Bank;
- current and expected market conditions;

**ΤΑΚΑΡΕΚΒΑΝΚ** 

#### Notes to the Separate Financial Statements

- the investment timeline and the type of investment (for example in measuring the fair value of short-term financial investment the current market sentiment to be better reflected some valuation technique than others);
- an entity's lifecycle of an equity instruments (the fair value of the investments in different life cycles is better reflected by some valuation models than by others);
- pro- and counter-cyclicality of an entity's business activity; and
- there are entity-specific factors, in which the entity operates.

In case of illiquid quoted equity instruments are applied 180 days weighted average price in accordance with the market practice for measuring fair value by the Bank.

When a quoted price of an equity instrument is not available the Bank shall measure during the selection of appropriate valuation techniques that primarily takes into account the future cash flows that a market participant would expect to receive from holding the equity instruments. Dividend and cash flow expectations are available from market reporting agent (Bloomberg,Refinitiv), business reports, management letter of intent, etc.

Closing balance at 30 April 2023	247,502	96

\*There was not transfer among the fair value hierarchy levels in 2023.

Based on the experience of the past period, the auditor has proposed several changes to improve the model, which increase the confidence level of the model.

- Updating statistical data in the cash flow amortization model
- Changes to the methodology for calculating the cost of capital
- Direct incorporation of the credit spread into the discounting through shifting the yield curve, while at the same time removing the credit spread from the T-Motor
- Annual review of other spreads on discount factor (operating costs, liquidity premium)

By processing the parameters obtained and applying them to the Fair Value methodology, the following effects were identified on stocks 04.30.

- The increase of **operating expenses** from 1.1% to 1.2% would decrease the profit or loss by HUF 1.07 billion (HUF -6.248 billion vs HUF -7.318 billion).
- The cost of capital under the current methodology is excluded, but in agreement with the auditor, the cost of capital under the new methodology is taken into account, which is 0.16% per month, taking into account the expected annual ROE of 16% for 2023 and the

ΤΔΚΔΡΕΚΒΔΝΚ

maximum level 80% of interest rate risk coverage for banking book. This effect must also be passed through to **the cost of capital**, which is reduced by 8bp to 0.16%. The effect is **a profit of HUF 0,849 billion**.

- We recommend adding 3.6bp (value calculated by Gáborék Gelencsér) to the **Credit Risk Spread** when shifting the SWAP yield curve, which has a negative effect of HUF 0.384 billion on profit or loss. In the case of the Takarék Group, there is no qualified capital for the reversal of the credit risk effect outside the current model.
- The observation frequency of unborn children in two categories decreased from 6% to 5% which would **worsen the profit or loss by HUF 0.118 billion.**
- The sum of the four effects is -1,07+0,849-0,384-0,118 = HUF 0,723 billion.

# **X TAKARÉKBANK** Notes to the Separate Financial Statements

# **30. RISK MANAGEMENT**

#### 30.1 Overview

On 15 December 2020, Magyar Bankholding Zrt. started its actual operations, after the dominant owners of MTB Zrt., the majority owner of Budapest Bank Plc., MKB Bank Plc. and Takarékbank, the majority owner of the National Bank of Hungary, transferred their bank shares to the joint holding company. Following the contribution, the financial holding company performed prudential control and group governance functions over the three banking groups until the end of April 2022.

Significant changes affecting the governance of Takarékbank in 2022:

- Takarékbank Shitv. terminated its integration membership at the end of March,

- the main owner of Takarékbank is MKB Bank Plc. from 01.04.2022,
- Magyar Bankholding Zrt.'s role as group manager was terminated at the end of April 2022,

- Takarékbank will be managed by MKB Bank Plc., which has also taken over the role of group manager since May 2022.

MKB Bank Plc., as group leader, issues group-level risk regulations, which must either be implemented without modification by group members or applied after implementation taking into account the characteristics of the group member.

At the time of reporting, Takarékbank Zrt. is an institution under the prudential supervision of MKB Bank (member of MKB Group).

Takarékbank's risk appetite should be in line with the financial resources available to cover potential losses. To this end, it calculates the current and future Economic Capital Requirement and the Capital Requirement under Pillar 1 for quantifiable risk types.

Takarékbank considers prudent risk-taking to be a fundamental value. To this end, the risk management organisation measures and analyses risk exposures, processes the information obtained, formulates underwriting rules and operates risk management systems.

MKB's Risk Strategy, which directly covers group members, is based on the following main pillars:

- applying the best approaches and methods accepted in market practice during risk man agement,
- exploration and continuous monitoring of the risk and return profile of business lines, prod ucts and risk positions,

• taking risks into account in business decisions, separation of the risk management entity from the business area,

- the importance of all stages of the risk management process,
- the risk management process is part of the overall management system,
- its aspects are integrated into the strategic and annual planning.

Exposure is essentially to credit, liquidity, market and operational risks.

The Notes comprising a summary of significant accounting policies and other explanatory information form an integral part of the Financial Statements

#### 30.2 Risk management structure

MKB Group operates a unified management concept, according to which the Group Manager (MKB Bank) Chief Risk Management Officer (CRO), Managing Director of Risk Management Division director-level managers hold the same position as member institutions of credit institutions. Another pillar of the single management concept is that committees with unified powers started their operations at group and member institution level, which are on the same day and in person They meet in composition, decide in several roles, issuing decisions at the appropriate level.

#### **Board of Directors**

The Boards of Directors are responsible for the Bank's risk management policy and strategy. The Boards of Directors approve the basic framework rules for risk management and guidelines of applicable methodologies.

Based on regular risk exposure reports, the Boards of Directors evaluate the risk management activities and the level of exposure of the banks. If the level of exposure undertaken by the banks does not correspond to the strategy the Board takes measures to contain risks.

#### **Risk Taking-Risk Management Committee**

The members of the Committee are members of the Board of Directors who are not employed by Takarékbank Ltd. The Committee shall in particular:

- a) preparing an expert opinion for senior executives on Bank's current and future risk-taking strategy and risk appetite,
- b) supporting the Board of Directors in supervising the implementation of the risk-taking strategy,
- c) an examination of the consistency between the pricing principles and Bank's business model and risk-taking strategy; and
- an examination of the remuneration policy in terms of whether the incentive elements of the remuneration system established take into account Takarékbank's risks, capital and liquidity position, and the probability and timing of incomes.

#### Supervisory Board

The Supervisory Boards of the Takarékbank are responsible for monitoring the overall risk and risk management processes within the Bank. In this context they supervise and monitor the suitability of methods and systems applied by the Takarékbank in order to ensure compliance with the statutory capital adequacy requirements.

#### Assets and Liabilities Committee (ALCO)

Assets and Liabilities Committee is exercised its authority relating to the asset and liability management, planning/controlling management, pricing and sales, developing, liquidity risk management, market risk management, credit and counterparty risk, concentration risks, operational risk, risk policy / risk strategy, capital management and categories defined in the internal policies for the Committee.

# **ΤΔΚΔΡΕΚΒΔΝΚ**

### Notes to the Separate Financial Statements

The ALCO has the right make decisions according to the defined categories. The committee determines the strategic and development orientations for the business management related to Takarékbank interest bearing assets and liabilities. The committee has different tasks related to the asset and liability management (ensuring liquidity, interest rate risk, exchange rate risk, capital adequacy, interest margin and funding risk management). Continuously monitors the Takarékbank makes suggestion for the interest policy. In order to ensure the prudential requirements, the Bank shall establish and maintained the conformity between income and liquidity.

#### Lending Committee (HB)

The Commission decides on matters delegated to the Commission in the internal regulations, decides on matters referred to it by the Credit Regulation (Decision Competence Order Annex)

### Methodology Committee (MB)

The competence of the Methodology Committee is exercised at the individual level of the Bank. The Methodology Committee performs all the tasks required by law or supervisory recommendations from a risk control, a risk methodology, an operational risk management and

an NPL committee in the areas specified in the Rules of Procedure of the Standing Committees. In detail:

- Defining risk strategy, risk self-assessment, risk appetite and related limits proposing to the Board of Directors, allocating limits to group members
- Setting concentration and country risk limits, approving risk management principles, allocating and re-measuring limits
- Approval of changes in risk parameters affecting risk appetite, including risk methodological proposals related to product development
- Approval of risk regulations
- Regular and adhoc risk reports (credit risk, operational risk, large exposures, internal credit, other risks, except market and liquidity, which is the responsibility of the EFB)
- ICAAP-SREP methodological changes, parameters, credit ratings, etc. approval (Pillar 1 and Pillar 2, including market risk topics), monitoring, supervisory control
- Develop and monitor an SREP action plan
- Modeling framework changes, model validation system approval

**Department of Risk Management** is responsible for determining the requirements necessary for the prudent operation. They develop the risk guidelines and manage credit, liquidity, market and operational risk.

#### **Internal Audit**

The elements of the internal control system (management control and management information system incorporated in processes, and an independent internal control unit function) cover the Takarékbank's all organizational units and are incorporated in day-to-day operation. They are traceable and provide feedback to the appropriate levels of management and control. Risk management processes are audited regularly by the internal audit organization that examines both the adequacy of the procedures and the compliance with the procedures. Internal Audit reports its findings to the Takarékbank's Supervisory Board and the Management of the Takarékbank.

#### Risk evaluation and reporting system

Takarékbank is measured the risk exposure in accordance with the methods defined in laws and integration policies.

In terms of liquidity as well as interest, shares and exchange rate risks, risks are essentially monitored and controlled by means of setting up limits of acceptable exposure. The limits reflect the willingness to undertake risks, and the market environment. Takarékbank collects and analyses data about events and losses related to risk from operation. As a result of risk assessment the Bank determines the level of capital justified by the level of acceptable exposure.

Risk Taking-Risk Management Committee, The Boards of Directors and The Supervisory Board evaluate the reports on risks of the Takarékbank on a quarterly basis.

### 30.3 Risk mitigation

### Interest rate and exchange rate risks

To minimize the risk of interest- and foreign exchange rate risks Takarékbank manage their asset and liability structure.

### <u>Credit risk</u>

Credit risk is the risk of the Bank suffering losses because the borrowers (clients or partners) fail to meet their contractual obligation to the Takarékbank.

Risk-taking for retail customers was carried out using standardized loan facilities and lending processes, which resulted in a high number of customers, a low amount of individual loans, diversification and thus the spraying of risks.

There are also standardized product deliveries for micro and small businesses. Risk-taking against medium-sized and large companies is based on individual analysis and decisions, and continuous monitoring is given great emphasis.

Takarékbank applies strict regulations to determine the scope of eligible collaterals, their valuation method and the coverage ratio.

The majority of the credit insurance value of real estate collateral is determined by Takarék Ingatlan, which belongs to the Takarék Group, while the Credit Collateral Value is approved by Takarékbank's Collateral Management team.

### **Credit risk**

### 30.4.1 Credit risk

### Impairment

The impairment requirements of IFRS 9 apply to all debt instruments that are measured at amortized cost or FVOCI, and to off balance sheet lending commitments such as loan commitments and financial guarantees (hereafter collectively referred to as "Financial Assets"). Under IFRS 9 the bank uses all reasonable and supportable information available without undue cost and effort, the Bank first evaluates individually the Financial Assets whether objective evidence of impairment exists for loans that are individually significant. It then collectively assesses loans that are not individually significant and loans which are significant but for which there is no objective evidence of impairment available under the individual assessment.

### Staged Approach to the Determination of Expected Credit Losses

IFRS 9 introduces a three stage approach to impairment for Financial Assets that are performing at the date of origination or purchase. This approach is summarised as follows.

### Stage 1:

Takarékbank recognizes a credit loss allowance at an amount equal to 12-month expected credit losses. This represents the portion of lifetime expected credit losses from default events that are expected within 12 months of the reporting date, assuming that credit risk has not increased significantly after initial recognition.

### Stage 2:

Takarékbank recognizes a credit loss allowance at an amount equal to lifetime expected credit losses (LTECL) for those Financial Assets which are considered to have experienced a significant increase in credit risk since initial recognition. This requires the computation of ECL based on lifetime probability of default (LTPD) that represents the probability of default occurring over the remaining lifetime of the Financial Asset. Allowance for credit losses are higher in this stage because of an increase in credit risk and the impact of a longer time horizon being considered to 12 months in Stage 1.

### Stage 3:

Takarékbank recognizes a loss allowance at an amount equal to lifetime expected credit losses, reflecting a Probability of Default (PD) of 100 %, via the recoverable cash flows for the asset, for those Financial Assets that are credit-impaired. The Bank definition of default is aligned with the regulatory definition.

Financial Assets that are credit impaired upon initial recognition are categorised purchased or originated credit-impaired (POCI) with a carrying value already reflecting the lifetime expected credit losses. The accounting treatment for these (POCI) assets is discussed further below.

### Significant Increase in Credit Risk

Under IFRS 9, when determining whether the credit risk (i.e., risk of default) of a Financial Asset has increased significantly since initial recognition, Takarékbank considers reasonable and sup-

## **ΤΔΚΔΡΕΚΒΔΝΚ**

### Notes to the Separate Financial Statements

portable information that is relevant and available without undue cost or effort. This includes quantitative and qualitative information based on the Bank historical experience, credit risk assessment and forward-looking information (including macro-economic factors). The assessment of significant credit deterioration is key in determining when to move from measuring an allowance based on 12-month ECLs to one that is based on lifetime ECLs (i.e., Stage 1 to Stage 2). The Bank's framework aligns with the internal Credit Risk Management process and covers rating related and process related indicators which are discussed further in the section below on Model Descriptions.

### **Credit Impaired Financial Assets in Stage 3**

Takarékbank has aligned its definition of credit impaired under IFRS 9 to when a Financial Asset has defaulted for regulatory purposes, according to the Capital Requirements Regulation (CRR) under Art. 178.

The determination of whether a Financial Asset is credit impaired focusses exclusively on default risk, without taking into consideration the effects of credit risk mitigates such as collateral or guarantees. Specifically, a Financial Asset is credit impaired and in Stage 3 when:

- The Takarékbank considers the obligor is unlikely to pay its credit obligations. Determination may include forbearance actions, where a concession has been granted to the borrower or economic or legal reasons that are qualitative indicators of credit impairment; or
- Contractual payments of either principal or interest by the obligor are past due by more than 90 days.

For Financial Assets considered to be credit impaired, the ECL allowance covers the amount of loss the Bank is expected to suffer. The estimation of ECLs is done on a case-by-case basis for non-homogeneous portfolios, or by applying portfolio based parameters to individual Financial Assets in these portfolios via the Bank's ECL model for homogeneous portfolios.

Forecasts of future economic conditions when calculating ECLs are considered. The lifetime expected losses are estimated based on the probability-weighted present value of the difference between 1) the contractual cash flows that are due to the Bank under the contract; and 2) the cash flows that the Group expects to receive.

### Default

The Savings Bank classiest and treats clients and exposures as defaults in accordance with Article 178(1) of the CRR. A customer's default shall be deemed to have occurred if one or both of the following occurs:

(a) the Institution considers that the client is unlikely to fully meet its credit obligations (UTP) to the institution, its parent company or a subsidiary company unless the institution seeks a return in order to draw down the collateral;

(b) the customer's significant credit obligation to the Institution, the parent company or any of its subsidiaries is delayed by more than 90 days

### **Purchased or Originated Credit Impaired Financial Assets**

A Financial Asset is considered purchased or originated credit-impaired if there is objective evidence of impairment at the time of initial recognition (i.e., rated in default by Credit Risk Management). Such defaulted Financial Assets are termed POCI Financial Assets. Typically, the

## **ΤΑΚΑΡΈΚΒΑΝΚ**

### Notes to the Separate Financial Statements

purchase price or fair value at origination embeds expectations of lifetime expected credit losses and therefore no separate credit loss allowance is recognised on initial recognition. Subsequently, POCI Financial Assets are measured to reflect lifetime expected credit losses, and all subsequent changes in lifetime expected credit losses, whether positive or negative, are recognised in the income statement as a component of the provision for credit losses.

### Write-off

Loans and debt securities are written off when the Bank has no reasonable expectations of recovering the financial asset (either in its entirely or a portion of it). This is the case when the Bank determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. A write-off constitutes a derecognition event. The Bank may apply enforcement activities to financial assets written off. Recoveries resulting from the Bank's enforcement activities will result in impairment gains, which will be presented in Provision for impairment losses in the separate statement of Profit or Loss.

### 30.4.2 Model Descriptions - Expected Credit Loss

### **Stage determination**

At initial recognition, Financial Assets which are not POCI are reflected in Stage 1. If there is a significant increase in credit risk, the Financial Asset is transferred to Stage 2. Significant increase in credit risk is determined by using rating-related and process- related indicators as discussed below. In contrast, the assignment of a financial instrument to Stage 3 is based on the status of the obligor being in default.

### Rating-Related Indicators:

Based on a dynamic change in counterparty PDs that is linked to all transactions with the counter- party, the Bank compares lifetime PD at the reporting date, with expectations at the date of initial recognition. Based on historically observed migration behaviour and available forwardlooking information, an expected forward rating distribution is obtained. A quantile of this distribution, which is defined for each counterparty class, is chosen as the threshold. If for the remaining lifetime the PD of a transaction given current expectations exceeds the PD of the relevant threshold rating, the Financial Asset is considered as significantly deteriorated. The thresholds used to determine Stage 2 indicators are determined using expert judgment and validated annually.

### Process-Related Indicators:

Process-related indicators are derived via usage of existing risk management indicators, which allow the Bank to identify whether the credit risk of Financial Assets has significantly increased. These include obligors being added mandatorily to a credit watchlist, being mandatorily transferred to workout status, payments being 30 days or more overdue or in forbearance.

## **ΤΑΚΑΡΈΚΒΑΝΚ**

### Notes to the Separate Financial Statements

On an ongoing basis, as long as the condition for one or more of the indicators is fulfilled and the Financial Asset is not recognized as defaulted, the asset will remain in Stage 2. If none of the indicator conditions is any longer fulfilled and the Financial Asset is not defaulted, the asset transfers back to Stage 1. In case of a default, the Financial Asset is allocated to Stage 3.

### **Expected Lifetime model**

The expected lifetime of a Financial Asset is a key factor in determining the lifetime expected credit losses. Lifetime expected credit losses represent default events over the expected life of a Financial Asset. Takarékbank measures expected credit losses considering the risk of default over the maximum contractual period (including any borrower's extension options) over which it is exposed to credit risk.

Retail overdrafts, credit card facilities and certain corporate revolving facilities typically include both a loan and an undrawn commitment component. The expected lifetime of such on-demand facilities exceeds their contractual life as they are typically cancelled only when the Bank becomes aware of an increase in credit risk. The expected lifetime is estimated by taking into consideration historical information and the Bank's Credit Risk Management actions such as credit limit reductions and facility cancellation. These facilities can be incorporated in an individual review by Credit Risk Management.

### Forward-Looking Information

Under IFRS 9, the allowance for credit losses is based on reasonable and supportable forward looking information obtainable, which takes into consideration past events, current conditions and forecasts of future economic conditions.

To incorporate forward-looking information into allowance for credit losses, the Bank uses two key elements: As its base scenario, the Bank uses the macroeconomic forecasts provided by Hungarian National Bank. These forecasts cover a number of macroeconomic variables (e.g., GDP, unemployment rates, inflation) and reflect Regulator search's view as to the most likely development of those variables, typically over a two-year (three in the medium/large sized enterprise segments) period and updated quarterly.

This base scenario is then translated into a multiple scenario analysis by leveraging the stress test environment. This environment generates the impact of a multitude of economic scenarios and is used as basis for deriving multi-year PD curves for different rating and counterparty classes, which are applied in the calculation of expected credit losses and in the identification of significant deterioration in credit quality of Financial Assets.

The general use of forward-looking information, including macro-economic factors, as well as adjustments taking into account extraordinary factors, are monitored by the Bank's Risk Management.

### Assumptions and the Estimation Techniques

IFRS 9 does not distinguish between individually significant or not individually significant Financial Assets and as such the Bank calculates expected credit losses for each Financial Asset individually. Similarly, the determination of the need to transfer between stages is made on an individual asset basis.

## **ΧΤΔΚΔ**ΡΕΚΒΔΝΚ

Notes to the Separate Financial Statements

The Bank uses three main components to measure ECL. These are Probability of Default (PD), Loss Given Default (LGD) and Exposure at Default (EAD).

Incorporating forecasts of future economic conditions into the measurement of expected credit losses influences the allowance for credit losses for each stage. In order to calculate lifetime expected credit losses, the Bank's calculation includes the PDs that reflect economic forecasts.

The expected credit loss calculation for stage 3 distinguishes between transactions in homogeneous and non-homogenous portfolios, and purchased or originated credit-impaired transactions. For transactions that are in Stage 3 and in a homogeneous portfolio, a similar approach as for Stage 1 and 2 transactions is taken. Since a Stage 3 transaction is defaulted, the probability of default is equal to 100 %.

Below the estimation techniques for the input factors are described in more detail.

The one-year PD for counterparties is derived from our internal PD model. The Bank assigns a PD to each relevant counterparty credit exposure for our exposure.

The counterparty ratings assigned are derived based on internally developed rating models which specify consistent and distinct customer-relevant criteria and assign a rating grade based on a specific set of criteria as given for a certain customer. The set of criteria is generated from information sets relevant for the respective customer segments including general customer behaviour, financial and external data. The methods in use range from statistical scoring models to expert-based models taking into account the relevant available quantitative and qualitative information. Expert-based models are usually applied for counterparties in the exposure classes "Central governments and central banks", "Institutions" and "Corporates" with the exception of those "Corporates" segments. For the latter as well as for the retail segment statistical scoring or hybrid models combining both approaches are commonly used. Quantitative rating methodologies are developed based on applicable statistical modelling techniques, such as logistic regression.

One-year PDs are extended to multi-year PD curves using conditional transition matrices. The first step in the estimation process is the calculation of through-the-cycle (TTC) matrices, which are derived from a multi-year rating history. For the next two years, economic forecasts are available. These forecasts are used to establish "point-in time" (PIT) PDs based on TTC matrices.

LGD is defined as the likely loss intensity in case of a counterparty default. It provides an estimation of the exposure that cannot be recovered in a default event and therefore captures the severity of a loss. Conceptually, LGD estimates are independent of a customer's probability of default. The LGD models ensure that the main drivers for losses (i.e., different levels and quality of collateralization and customer or product types or seniority of facility) are reflected in specific LGD factors. In our LGD models we assign collateral type specific LGD parameters to the collateralized exposure.

The EAD over the lifetime of a Financial Asset is modelled taking into account expected repayment profiles. We apply specific Credit Conversion Factors (CCFs) in order to calculate an EAD value. Conceptually, the EAD is defined as the expected amount of the credit exposure to a counterparty at the time of its default. In instances where a transaction involves an unused limit, a percentage share of this unused limit is added to the outstanding amount in order to appropriately reflect the expected outstanding amount in case of a counterparty default.

### ESG

Until the end of reporting period ESG aspects have not been taken into consideration in the risk models. After the merger is completed the Bank will collect and oraganise the ESG data and will examine the possibilities to use it in the models.

### Macroscenario

The macroeconomic scenarios will be updated and used in the bank processes the same time the new inflation report from the National Bank of Hungary is recieved. Based on the forcasts the Bank will use the currenct macroeconimical PD forcast models to calculate the new parameters required for macroeconomic adjustments (Macro overlay factor – MOF) on a segment level. Using these new parameters the IFRS PD (without macro correction) values will be adjusted to reflect the expectations of the macroeconomic scenarios. The weighting of the macroeconomic scenarios is calculated in accoredance with the recommendations of the (internal use only) management letter from the National Bank of Hungary. At the end of the year 2022 the weights used are the following: 25% - stress scenario, 70% - base scenario, 5% - optimistic scenario. The resulting IFRS PD values adjusted to the new macroeconomic environment and expectations will be implemented after the approval of the Methodology Committee. The Banks macroeconomic models will be validated with every update both with statistical methods and business side validation - thus ensuring the applicability of the model.

### Impact of the pandemic on credit risk management

In accordance with the MNB's expectations, and in line with the Magyar Bankholding's uniform impairment calculation methodology the staging logic for customers still in and out of moratorium has been standardised by adding the following to the normal processes:

- for retail customers in moratorium 1-2, not affected by moratorium 3 and/or moratorium 4, or who have exited from moratorium 1-2-3-4 and no other Stage 3 indicator, then Stage 2 classification is justified for at least 6 months after the end of the moratorium,
- for retail customers entering moratorium 3 or 4, a Stage 3 classification is justified for the entire period of the moratorium if a significant deterioration in the income situation is justified on the basis of the client's declaration,
- for corporate customers in moratorium 1-2 that have been reclassified to Stage 2 and is not affected by moratorium 3 and or moratorium 4, or have exited moratorium 1-2-3-4 and no other Stage 3 indicator is present, then Stage 2 classification is justified for at least 24 months after the end of the moratorium,
- for corporate customers entering moratorium 3 or moratorium 4, a Stage 3 classification is justified for the entire duration of the moratorium, from which can only be deviated with a detailed, objective justification supported by evidence, but only up to maximum of stage 2.
- customers who entered into "agricultural moratorium" have to be classified minimum as Stage 2, but if the customer previously spent at least 9 months in moratorium has to be classified as stage 3. They can be classified in Stage 1 only on the basis of individual monitoring after the declaration has been made and taken into account.

Notes to the Separate Financial Statements

ΓΛΚΛΡΕΚ

Individual deviations are possible from the application of Stage 3 and Stage 2 triggers, which must be supported by detailed justification based on objective evidence in all cases.

For customers exiting the moratorium or customers on a contractual repayment schedule who never taking advantage of moratorium, the measurement of traditional credit behaviour will continue to be implemented. For retail customers, the Bank has reverted to the normal lifetime ECL/Expected Credit Loss calculation.

In case of corporate customers, the Bank will continue to determine the level of impairment based on the rating and the monitoring result.

In addition to the above, the Bank has updated the macro parameters for the entire portfolio, using the latest parameters available in the MNB Inflation Report. The updated risk parameters have also been implemented in the lifetime ECL calculation.

Given that no new information has emerged on the payment ability of customers during the moratorium period and that the repayments of customers affected by the interest rate cap are lower than the contractual installments, it is necessary to take into account the uncertainties about the ability and willingness of debtors to pay. In addition, MNB expects that the risk arising from modelling uncertainty needs to be mitigated.

In determining the management overlays, the Bank has taken into account the following criteria:

- the proportion by which the income of customers entering the moratorium4 has decreased compared to 18.03.2020,
- in case of customers who entered into "agricultural moratorium", the models are not aware of the agricultural moratorium and therefore the willingness and ability to pay may contain a hidden high probability of default,
- the application of transitional staging rules alone does not always translate into a full increase in lifetime credit loss, even if macro parameters are updated.

The breakdown of the management overlay on 30 April 2023 is as follows:

- overlay for income reduction: HUF 2,149 million
- overlay for agricultural moratorium: HUF 2,804 million
- overlay for corporate customers with specific ratings: HUF 848 million

In summary, the Bank's current modelling methodology, using the above information, provides the opportunity to develop risk profiles that are well-defined from a client management perspective. The management overlays have been created due to the uncertainties arising from the current economic situation, the expectations of the regulatory environment and the future volatility of the economic situation.

### IFRS 9 credit risk tables are presented below.

### Credit risk exposure 30 April 2023

	Stage 1	Stage 2	Stage 3	POCI	
30 April 2023	12-month Expected Credit Loss (ECL)	Lifetime Expected Credit Loss (ECL)	Lifetime Expected Credit Loss (ECL)	Purchased or origi- nated credit-impaired financial asset	Total

### 30.4.3 Client effected by payment relief program

Due to the first moratorium on repayment set out in Act LVIII of 2020 on transitional rules and epidemiological preparedness related to the cessation of emergency, it is not necessary to pay installments for all corporate and retail loan agreements from 19 March 2020. The next piece of legislation is Act CVII of 2020 on transitional measures to stabilize the situation of certain priority social groups and enterprises in financial difficulties, supplementing it Act 637/2020 (XII.22.), (second moratorium) entered into force on 1 January 2021, according to which the repayment moratorium can be used until 30 June 2021. This legislation was extended until 31 July 2022, and then, according to a further statement, until 31 December 2022.

Unpaid interest accrued during the moratorium, together with the installment due for the remaining term, shall be paid in equal annual installments during the term of the moratorium after the expiration of the moratorium on payment. The monthly installment cannot increase due to unpaid interest and principal. The term is extended accordingly.

Based on Government Decree No. 782/2021 (XII.24.) (second modification No. 390/2022 (X.14.) Government Decre ) on different application in the state of emergency of Act CLXII of 2009 on Consumer Credit in the case of a mortgage contract tied to a reference interest rate, if the repricing date is between 1 January 2022 and 30 June 2023 the applicable reference interest rate must not be higher than the reference interest rate the applicable reference interest rate must not be higher than the reference interest rate valid on 27 October 2021.

The modification loss due to the program was calculated based on the expected cash flow, which ones are estimated under this legislations.

Takarék Bank modified the impairment methodology in accordance with the legislation and recommendations after the onset of the emergency. Credit risk monitoring is a key element in the methodology for measuring the significant increase in credit risk since its initial publication. During the pandemic period, the Bank placed even more emphasis on this activity. In the individual monitoring processes, a stricter procedure was applied, and new methodologies were introduced to identify companies in a deteriorating risk situation. In addition, the Bank has recalculated the parameters of the previously applied IFRS, taking into account the expected macroeconomic effects. This ensured that appropriate loss levels were established for the different credit risk categories.

In the first four months of 2023, no further payment facilitation programs were provided by law, so due to comparative data, salary facilitation programs for 2022 were presented.

### 30.4.3.1 Clients affected by payment relief program 2022

## 30.4.3.1.1 Clients affected by interest rate cap program 2022 (1 July 2022 - 31 December 2022)

Based on Government Decree No. 782/2021 (XII.24.) (first modification <u>No. 215/2022 (VI.17.)</u> <u>Government Decree</u>) on different application in the state of emergency of Act CLXII of 2009 on Consumer Credit in the case of a mortgage contract tied to a reference interest rate, if the repricing date is before or between <u>1 January 2022 and 31 December 2022</u> the applicable reference

### Notes to the Separate Financial Statements

## *30.4.3.1.3* **Client affected by payment relief program 2022 (based on statement about repayment moratorium)**

Those financially disadvantaged clients who made a separate declaration until 31 October 2021 (filling a statement about repayment moratorium) can participate in the moratorium until 30 June 2022. The modification loss under this legislation was calculated based on the expected payment schedules as of 31 October 2021. In 2022, this option was extended for one month, the Government Decree No. 216/2022 allowed the moratorium participant to further extend it until December 31, 2022 (filling statement again). The recorded adjustment loss was HUF 226 million for this transaction.

31.4.3.1.4 Clients effected by interest rate cap program 2022 415/2022 (X.26 Government Decree)

Based on Government Decree 2022 (X.26.) which is about considering the emergency, in the interest of moderate the negative economic effects related to micro, small and medium-sized enterprises, in the case of borrowers tied to a reference interest rate, if the repricing date is before or between 15 November 2022 and 30 Jun 2023 the applicable reference interest rate must not be higher than the reference interest rate the applicable reference interest rate must not be higher than the reference interest rate valid on 28 June 2022.

### Notes to the Separate Financial Statements

### 30.4.4. Restructured loans

As a restructured claim, Takarékbank records a claim containing a discount for which the original contract giving rise to the claim was amending in order to avoid non-payment because the debtor could not meet his repayment obligation under the original contractual terms or could not comply with it in the absence of the concession.

Cases of contract change that is considered a discount

a) A contract amendment which constitutes a concession may relate, inter alia:

- deferring repayments (interest and principal payments) for a temporary period (grace period),
- payment of instalments,
- to change the rate of interest, re-price it (e.g. in the form of an interest discount),
- capitalisation of interest,
- to change the currency,
- to extend the duration of the loan,
- to reschedule repayments,
- to reduce the amount of collateral, collateral required, to exchange it with other collateral, with collateral, to forset cover (for margin release),
- to establish new contractual terms and conditions, to terminate part of the original terms.

b) On the basis of an amendment to the contract which constitutes a concession, an additional agreement or a new contract may be concluded between the parties or between the parties and the related undertaking of the original creditor, which relates to a new loan for the purpose of repaying the debt (principal or interest owed) due to the cancelled or unresisted original contract, or to an additional commitment to avoid an increase in risk and mitigate losses, in which case claims incurred by Takarékbank as a result of this additional stop or related new contract are also considered to be restructuring claims.

The Savings Bank treats the following cases as non-performing restructuring:

- a. the amended contract was considered non-performing prior to the amendment or, in the absence of the modification, the original contract would be deemed to be non-performing,
- b. the contract amendment includes partial or total debt waiver,
- c. at the same time as or close to the discount granted in respect of other debt, the debtor has made interest payments or principal repayments in respect of his loan to Savings Bank, which is covered by the non-performing exposure or, in the absence of a discount, which constitutes a loan,
- d. a change in the contract involving repayment by validating the collateral, if the modification includes a discount.

Change of monitoring grades/cure

- The total recovery period for restructured performing transactions is 730 days (there should be no significant delay of more than 30 days during this period), after successful recovery it can be put into normal or enhanced monitoring client management.
- The recovery period for non-performing restructured or default restructured transactions is 365 days (there can be no significant delay during this period) after successful recovery-weeks of preventive/intensive customer treatment.

### Restructured loan book broken down by type of loan

30 April 2023	Gross value	Impairment	Carrying amount	Number of loans
Retail exposure	13,737	1,509	15,246	3,451
Corporate exposure	708	143	851	47
Municipal exposure	-	-	-	1
Total	14,445	1,652	16,097	3,499

31 December 2022	Gross value	Impairment	Carrying amount	Number of loans
Retail exposure	14,116	(1,540)	12,576	3,634
Corporate exposure	616	(122)	494	39
Municipal exposure	-	-	-	1
Total	14,732	(1,662)	13,070	3,674

30.4.4.1 Collaterals for lending risk applied by Takarékbank:

The credit risk collateral of the Savings Bank, as applied to its existing exposures in the course of the risk-taking process:

### Real estate

The Bank accepts as collateral mortgages, independent or separated liens established on such real estate that is registered in Hungary and have long live stable value.

Real estate is valued by independent appraisers who are not involved in decision-making regarding the loan and who establish the collateral value conservatively.

### State guarantee and GHG Ltd. or AVGHA guarantee

All instances of State guarantee and other guarantee accepted by Takarékbank involve joint and several liabilities set forth by law. The rules governing the guarantee are laid down in statutory provisions.

### Deposit

Deposit can take the form of cash, bank deposit or securities.

### Other

In addition to the above the Banks also accept assigned claims, lien on claims, otherwise its credit risk has been decreased with assets that covered loans taking into collaterals.

The table below shows the structure of the collaterals:

	30 April 2023	31 December 2022
Mortgage	1,748,006	1,755,214
Deposit	64,073	73,367
Guarantee	911,947	889,807
Other collaterals, fuses	140,938	140,857
Total	2,864,964	2,859,245

The above detailed collaterals cover fully the amount of the loans. Among the collaterals the value of mortgage represents the collateral value allocated to the mortgage at disbursement (market value less discount factor) in case of Customer loans. All other items are valued at their own value (for example the assignment is valued at the amount which was assigned). The category of other collaterals contains the insurances.

The table below shows the maximum credit risk exposure:

	30 April 2023	31 December 2022
Other demand deposit	419 971	211,787
Financial assets at fair value through other compre-		
hensive income	160,829	146,909
Financial instruments held for non-trading purposes valued at fair value against the mandatory origin	255,887	235,549
Retail loans	430,350	432,462
Corporate loans	1,254,438	1,296,269
Local government loans	8,958	7,010
Due from banks	304,956	601,336
Advances	68,706	54,228
Off-balance sheet commitments	371,483	358,568
Total gross credit risk exposure	3,275,578	3,344,118

### 30.5 Market risk

Market risks are including the interest rate risk and equity risk in the trading book (position risk), furthermore foreign exchange rate risk from the complete banking activity. Takarékbank keeps its risks low with the help of an appropriate limit system and controls built into the process.

### 30.6 Interest risk

Interest risk derives from interest changes, which affect the value of financial instruments. A bank is also exposed to interest risk when the amounts of assets, liabilities and off-balance sheet instruments maturing or re-priced in a particular period are not in harmony. Takarékbank assess interest risk on a continuous basis with the help of Gap-analysis and sensitivity analysis. Besides the effect of the unbeneficial interest scenarios is monitored continuously with stress testing: how can change the Bank's interest income and expense, or the long-term economic capital value. The Bank manages market risk mainly by natural hedging through the eligible content of securities and derivative portfolio.

	Sensitivity of inte- rest income 2023	Sensitivity of inte- rest income 2022	Sensitivity of interest income 04/30/2023 +10 bp	Sensitivity of interest income 04/30/2023 +25 bp
HUF	(26)	(79)	(264)	(661)
EUR	2	(5)	18	45
USD	-	-	1	2

### Interest risk exposure – sensitivity analysis (figures in HUF million)

## **«ΤΔΚΔ**ΡΕΚΒΔΝΚ

### Notes to the Separate Financial Statements

The sensitivity analysis is performed according to the standard method of using 1 base point increase in interest rates, the excursion is symmetric meaning 1 base point decrease in interest rates would result in the same figures with opposite sign.

Sensitivity of net income is the estimated effect of one base point increase in interest rates to net interest income realized in advance over a period of one year, based on floating rate financial assets and liabilities or those financial assets and liabilities to be re-priced next year carried as of the last day of the given year. It means that if interest increase by one basis point from the close of business 30 April 2023 net interest income would decrease by HUF 26 million in case of HUF, it would decrease by HUF 2 million in case of EUR.

### 30.7 Exchange rate risk management

The business policy of Takarékbank is to keep exchange rate risk at a low level, it may hold an open foreign exchange position up to the limit specified in the banking book

The Bank strives to immediately hedge the exchange risks related to its core business as allowed by market circumstances. Takarékbank applies VAR calculations and stress tests on the measurement of the foreign exchange exposures.

FX	Effect on earnings be- fore income tax (30 April 2023)	Effect on capital (30 April 2023)	Effect on earnings before income tax (31 December 2022)	Effect on capital (31 Decem- ber 2022)
EUR	1,694	1,694	1,737	1,737
USD	233	233	239	239
CHF	1,268	1,268	1,300	1,300
Other	490	490	520	520

### FX risk (in the case of 1% increase in exchange rate) HUF thousand

The sensitivity analysis is performed according to the standard method of using 1% increase in foreign exchange rates, the excursion is symmetric meaning 1% decrease in foreign exchange rates would result in the same figures with opposite sign.

In addition to the 1 % increase in the exchange rate due to the Bank's foreign exchange positions, the estimated pre-tax profit and equity may increase by approximately HUF 1,694,000 for EUR items, HUF 1,268,000 for CHF, HUF 233,000 for USD and HUF 490,000 for other currencies.

30 April 2023	HUF	EUR	CHF	Other	Total
Total assets and derivatives	3,057,519	274,043	4,025	8,548	3,344,135
Total liabilities and derivati- ves	(2,685,978)	(363,571)	(3,820)	(28,741)	(3,082,111)
Shareholders' equity	(262,024)	-	-	-	(262,024)
Off-balance sheet items	126,712	90,603	-	20,361	237,676
Position	236,229	1,075	205	168	237,676

Separate FX financial position of the bank in terms of main currencies:

Total assets and derivatives	3,155,725	350,735	2,037	3,189	3,511,686
Total liabilities and deriva- tives	(2,863,694)	(398,320)	(4,042)	(18,791)	(3,284,847)
Shareholders' equity	(226,839)	-	-	-	(226,839)
Off-balance sheet items	308,893	44,761	1,860	19,911	375,425
Position	374,085	(2,824)	(145)	4,309	375,425

### 30.8 Liquidity and maturity risk

The liquidity is the ability of the institute to fund its asset increasing and to serve its payment obligations entirely as they fall due without having unplanned liquidation losses.

Liquidity risk is associated with maturity transfers for profitability, long-term placements of short-term funds, environmental impacts and the behaviour of other market participants. The most common method of measuring and analysing liquidity risk is based on cash flow analysis. In the liquidity risk analysis, Takarékbank analyses the funding needs arising from the balance of outflows and inflows into maturity bands and compares the accumulated funding gap measured over different time horizons with the level of balancing capacities. Takarékbank tends to perform the analysis not only on the total cash movements converted into HUF, but also on the most important foreign currencies for the institution.

Takarékbank characterizes liquidity risks with several indicators and limits, the most important of which are based on regulatory indicators (DMM, JMM, LCR, NSFR, required reserve ratio) and various liquidity stress tests. In addition, Takarékbank operates an early warning system to detect liquidity disturbances in a timely manner.

### 30.9 Management of operational risk

The Takarékbank manages operational risks primarily by improving internal policies, procedures, adequate training of employees involved in work processes and the further development of built-in control mechanisms. Takarékbank collects and analyses operational risk loss data and key risk indicators (KRI) that are reported on a monthly basis.

The Savings Bank carried out an operational risk self-assessment of key activities and identified rare events with heavy losses in the event of them, the impact of which is assessed by a scenario analysis.

In line with supervisory requirements, Takarékbank has compiled an inventory of the models used to assess the model risks and an inventory of the products to identify the risks inherent in the products.

#### 30.10 Treatment of risk concentration

The Bank is significantly exposed to the status of real estate market regarding the high proportion of real estate in securities. This concentration risk is mitigated by applying conservative method in collateral values and cover rate and also by diversifying their product portfolio from collateral perspective (meaning to increase the proportion of other than real estate securities) seeks to atomize risks and enforce a wide range of collateral.

### 31 CALCULATION OF REGULATORY CAPITAL, CAPITAL ADEQUACY

On 1 April 2022, Takarékbank as a company to be included in the consolidation as a subsidiary of MKB Bank left the mandatory institution protection organisation of integrated credit institutions, the Integration Organisation in possession of the necessary preliminary approvals and taking advantage of the opportunity granted by the law.

The regulatory capital is shown in the table below, which includes the following elements: subscribed capital + capital reserve + general reserve + retained earnings - intangible assets- non-temporary deferred tax + - other adjustments + Tier 2 capital.

	30 April 2023	31 December 2022
Own funds	260,336	271,213
TIER 1 Capital	238,332	249,210
Common Equity TIER 1 Capital	238,332	249,210
Additional TIER 2 Capital	22,003	22,003
Risk weighted assets (RWA)	933,567	968,956
Operational risk (OR)	269,762	269,762
Market risk positions (MR)	-	-
Total risk-weighted assets	1,203,328	1,238,718
Tier 1 ratio	19.81%	20.12%
Capital adequacy ratio	21.63%	21.89%

## 32 RELATED PARTY TRANSACTION

For the purpose of the financial statements, MKB Bank Plc.. identified related parties based on definition of IAS 24 including all the enterprises that directly or indirectly through one or more intermediaries are controlled by the reporting enterprise (this includes parents and subsidiaries) and key management personnel, including the member of the Board and Supervisory Board. For the purposes of this Report, related parties also include shareholders whose holding in the Bank exceeds 10%. Related parties have the power of control over or have a significant influence in, decisions relating to the finances and operation of another enterprise. The Group enters into transactions with related parties under market conditions.

The list of the related parties, - including the parent companies and main subsidiaries of the Takarek Bank Plc. - as of 30 April 2023 is the following. The following table shows the Bank "Related company" from the point of view of MKB Bank Plc..

### 34 EQUITY CORRELATION TABLE

Based on paragraph 114/B of Act on Accounting, Equity Correlation Table is prepared and disclosed as a part of the Notes for the reporting date by the Bank.

Equity correlation table shall contain the opening and closing balances of the shareholder's equity in accordance with IFRS, furthermore deducted from this the opening and closing balances of the specified equity elements. Equity correlation table shall contain also untied retained earnings available for the payment of dividends, covering retained earnings from the last financial year for which accounts have been adopted comprising net pro-fit for the last financial year, reduced by the cumulative income tax accounted for under IAS 12 - Income Taxes. Furthermore, the equity correlation table contains the reconciliation of the value of Share capital registered on the Registry Court and the value of Share capital in accordance with IFRS adopted by EU.

30 April 2023	Share Capital	Unpaid capital which has been called up	Capital reserve	General reserve	Retained earnings and other reserves	Revaluation re- serves	Tied-up re-serve	Profit for the year	Total equity
Components of Shareholder's equity in accor- dance with IFRS adopted by EU	186,960	-	34,947	-	7,971		-	32,146	262,024
Accumulated other comprehensive income	-	-	-	-	6,423	(6,423)	-	-	-

Net profit for the year	32,146	25,481
Untied retained earnings available for the payment of dividends	40,777	11,856

## 35 POST BALANCE SHEET EVENTS

#### Legislative changes

Amendment of Government Decree No 782/2021 (XII. 24.) on the different application of Act CLXII of 2009 on credit to consumers in emergency situations Interest rate cap extended until 31 December 2023. The Group has started to quantify the financial impact of the extension for 2023, but these have not yet been finalised.

#### **INDEPENDENT AUDITOR'S REPORT** (Free translation)

#### To the shareholders of MBH Bank Nyrt. (as the legal successor of Takarékbank Zrt.)

#### Report on the audit of the separate financial statements

#### Opinion

We have audited the separate financial statements of Takarékbank Zrt. (the "Company") which comprise the separate statement of financial position for the financial year ended on 30 April 2023 (in which total assets equal to total liabilities and equity are MHUF 3,344,134), the separate statement of profit or loss, the separate statement of other comprehensive income (in which the total comprehensive income for the year is MHUF 35,186 profit), the separate statement of changes in equity, the separate statement of cash flows for the financial year then ended and the notes to the separate financial statements comprising significant accounting policies and other explanatory information.

In our opinion, the separate financial statements give a true and fair view of the separate financial position of the Company as at 30 April 2023, and of its separate financial performance and its separate cash flows for the financial year then ended in accordance with International Financial Reporting Standards ("IFRS") as adopted by the EU and they have been prepared, in all material respects, in accordance with the supplementary requirements of Act C of 2000 on Accounting ("Accounting Act") relevant for the annual financial statements prepared in accordance with IFRS as adopted by the EU.

#### **Basis for opinion**

We conducted our audit in accordance with Hungarian National Standards on Auditing ("HNSA") and with applicable laws and regulations in force in Hungary. Our responsibilities under those standards are further described in the "Auditor's responsibilities for the audit of the separate financial statements" section of our report.

We are independent of the Company in accordance with the applicable laws of Hungary, with the Hungarian Chamber of Auditors' Rules on ethics and professional conduct of auditors and on disciplinary process and, for matters not regulated in the Rules, with the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standards Board for Accountants (IESBA Code) and we also comply with further ethical requirements set out in these.

We have not provided any non-audit services to the Company in the period from 1 January 2023 to 30 April 2023.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### **Emphasis of matter**

We draw attention to the point 1 of the Notes, where it is presented that the resolution No. H-EN-I-57/2023. issued by the National Bank of Hungary ("NBH") allowed Takarékbank Zrt. to merge into MKB Bank Nyrt on 30 April 2023. After the merger the new name of the MKB Bank Nyrt. became MBH Bank Nyrt.

Our opinion is not modified in respect of this matter.

#### Our audit approach

#### Overview

Overall materiality	Overall materiality applied was MHUF 2,600
Key Audit Matters	<ul> <li>Expected credit loss allowance on loans and advances to customers</li> <li>Financing transactions with related parties</li> </ul>

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the separate financial statements. In particular, we considered where management made subjective judgements; for example, in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all of our audits, we also addressed the risk of management override of internal controls, including among other matters, consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the separate financial statements as a whole, taking into account the structure of the Company, the accounting processes and controls, and the industry in which the Company operates.

#### Materiality

The scope of our audit was influenced by our application of materiality. An audit is designed to obtain reasonable assurance whether the separate financial statements are free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the separate financial statements.

Based on our professional judgement, we determined certain quantitative thresholds for materiality, including the overall materiality for the separate financial statements as a whole as set out in the table below. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements, both individually and in aggregate on the separate financial statements as a whole.

Materiality	MHUF 2,600
Determination	1% of the separate equity

Rationale for the materiality benchmark applied	We chose separate equity as the benchmark because, in our view, it is a balanced benchmark which reflects the interests of the shareholders and of the regulator and is a generally accepted benchmark.
	We chose 1% as quantitative materiality threshold.

#### Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the separate financial statements of the current period. These matters were addressed in the context of our audit of the separate financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

#### Key audit matter

## Expected credit loss allowance on loans and advances to customers

The net balance of loans and advances to customers at amortised cost was MHUF 1,681,198 as at 30 April 2023, representing 50% of total assets. Credit loss allowance recognised in the balance sheet amounted to MHUF 83,828.

Management disclosed related assumptions, balances and estimates in section 3.10 of the notes to the separate financial statements on accounting policy, as well as in notes 18. and 30.

Credit loss allowance recognised on expected credit losses is determined on the basis of subjective criteria and management is required to apply significant judgement when calculating individual and collective expected credit loss allowances especially when considering the current uncertain economic environment.

The first step in the expected credit loss calculation is to identify whether there was significant increase in credit risk. The selected indicators will determine whether a 12-month or a lifetime expected credit loss is calculated.

In the calculation of individual expected credit loss, the most significant uncertainty is involved in the estimation of expected future cash flows, and in probability weighting of cash-flow scenarios, where cash flows include recoveries How our audit addressed the key audit matter

We gained an understanding of the lending process from disbursement to monitoring and to the calculation of impairment, identified the main control points, and tested their operational effectiveness, including management's approval.

Thereby the focus was on adaptations of methods and processes introduced to capture the increased uncertainties of the present and future environment in expected credit losses.

We performed credit review for individually significant loans on a sample basis. We checked the stage classification of the loans based on credit application and monitoring documents as well as customer-related financial and non-financial information.

For a sample of individually impaired loans, we checked whether assumptions, estimations and scenario weightings applied in calculations of the recoverable amount are reasonable and whether the calculations are correct.

For collective loss allowances we assessed whether the methodology applied by the Group was compliant with *IFRS 9 Financial Instruments* with the support of our internal modelling experts. We recalculated the selected model parameters and the expected credit loss allowances.

both from collections of contractual cash flows and from collaterals.

The Company applies impairment models to calculate collective credit loss allowances. These models quantify the probability of default, exposure at default and the loss given default as the primary parameters in the estimation of the recoverable amount, taking into account forward looking information – in line with the requirements of *IFRS 9 Financial Instruments*.

The modelling methodologies are developed using historical experience, which - in uncertain economic conditions that currently vary across customer segments and industry sectors - can result in limitations in their reliability to appropriately estimate expected credit loss.

A further limitation is caused by the fact, that, to reduce the economic consequences of the pandemic and the uncertain COVID-19 economic environment the Hungarian government maintained various loan support programs introduced first in 2020, including moratoria on loan repayment transactions. Although a significant part of these programs expired on 31 December 2022, these complicate a timely reflection of a potential deterioration of the loan portfolio and resulted in artificially low observed default rates.

To address these limitations, management applied quantitative and qualitative adjustments to expected credit loss that include the following:

- Additional criteria to assess significant increase in credit risk, partly relating to those staying in the moratoria
- Additional expert judgement based adjustment of the estimation method of credit risk parameters

We paid considerable attention to this area during our audit due to the significance of the amounts involved and because of the subjective nature of the judgments and assumptions that management is required to make, particularly due the high level of uncertainty that can be We checked input data for the expected credit loss allowance calculation (both historical and measurement data), indicators used to determine whether there was significant increase in credit risk and analysed the development of credit losses.

To address increased estimation uncertainty, we evaluated the adequacy of credit risk parameters and models taking into consideration possible distortions of currently observed data due to state payment support programs. We also critically assessed the plausibility of expectations and estimates, that have been introduced due to aforementioned distortions, to identify significant increases in credit risk of single customers or customer groups.

We read section 3.10 and points 18. and 30. of the notes to the separate financial statements to assess whether disclosures are in line are in line with IFRS 9 *Financial Instruments* and *IFRS 7 Financial Instruments: Disclosures* standards.

experienced in the current economic environment.

## Financing transactions with related parties

The Company, in the course of its banking operations, has significant financing transactions with related parties including entities belonging to the shareholders (other than state owned enterprises) that have significant influence over the parent entity and other related parties. Related party transactions are disclosed in Note 32 to the separate financial statements.

We identified related party financing transactions as a key audit matter because of risks with respect to completeness of identification of related parties and disclosures made in the separate financial statements.

We understood the process of identifying and disclosing related party transactions.

We obtained company registry records and other publicly available information and compared to the listing of related parties maintained by the Company to check completeness of related parties identified. We agreed, on a sample basis, the amounts disclosed to underlying documentation and read relevant agreements

We tested, on a sample basis, the financing arrangements between the related parties along with supporting documents to evaluate the management's assertions that the transactions were at arm's length and in the ordinary course of business.

We inspected relevant ledgers, agreements and other information that may indicate the existence of related party financing relationships or transactions.

We checked the relevant disclosures in the notes and assessed whether they are in line with IAS 24 *Related Party Disclosures* standard.

#### Other information: the separate business report

Other information comprises the separate business report of the Company. Management is responsible for the preparation of the separate business report in accordance with the provisions of the Accounting Act and other relevant regulations. Our opinion on the separate financial statements does not cover the separate business report.

In connection with our audit of the separate financial statements, our responsibility is to read the separate business report and, in doing so, consider whether the separate business report is materially inconsistent with the separate financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If based on our work performed we conclude that the separate business report is materially misstated we are required to report this fact and the nature of the misstatement.

Based on the Accounting Act, it is also our responsibility when reading the separate business report to consider whether the separate business report has been prepared in accordance with the provisions of

the Accounting Act and other relevant regulations, if any, and to express an opinion on this and on whether the separate business report is consistent with the separate financial statements.

As the Company is a public interest entity and the conditions in Paragraph a) and b) of Subsection (1) of Section 95/C of the Accounting Act are met at the balance sheet date, the Company shall publish a non-financial statement required by 95/C in its separate business report. In this respect, we shall state whether the separate business report includes the non-financial statement required by 95/C of the Accounting Act.

In our opinion, the 2023 separate business report of the Company is consistent with the 2023 separate financial statements in all material respects; and the separate business report has been prepared in accordance with the provisions of the Accounting Act. As there is no other regulation prescribing further requirements for the separate business report, we do not express an opinion in this respect.

We are not aware of any other material inconsistency or material misstatement in the separate business report and therefore we have nothing to report in this respect.

The separate business report includes the non-financial statement required by Section 95/C of the Accounting Act.

## Responsibilities of management and those charged with governance for the separate financial statements

Management is responsible for the preparation of the separate financial statements that give a true and fair view in accordance with IFRS as adopted by the EU and to prepare the separate financial statements in accordance with the supplementary requirements of the Accounting Act relevant for the annual financial statements prepared in accordance with IFRS as adopted by the EU, and for such internal control as management determines is necessary to enable the preparation of separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the separate financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

#### Auditor's responsibilities for the audit of the separate financial statements

Our objectives are to obtain reasonable assurance about whether the separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HNSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these separate financial statements.

As part of an audit in accordance with HNSAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the separate financial statements, including the disclosures, and whether the separate financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the separate financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

#### **Report on other legal and regulatory requirements**

#### Appointment

We were first appointed as auditors of the Company on 26 April 2022. Our appointment has been approved by shareholder resolution representing a total period of uninterrupted engagement appointment of 2 years.

Budapest, 6 July 2023

Árpád Balázs Partner Statutory auditor Licence number: 006931 PricewaterhouseCoopers Könyvvizsgáló Kft. 1055 Budapest, Bajcsy-Zsilinszky út 78. Licence Number: 001464

Translation note:

This English version of our report is a translation from the original version prepared in Hungarian on the separate financial statements prepared in Hungarian. All possible care has been taken to ensure that the translation is an accurate representation of the original. However, in all matters of interpretation of information, views or opinions, the original language version of our report takes precedence over this English translation.

This report translated into English has been prepared solely for the information of the Board members of the Banks and must not be distributed to any other party.

### INDEPENDENT AUDITOR'S REPORT

# To the attention of the shareholders of MBH Bank Nyrt. and Takarékbank Zrt. involved in the merger

### Report on the final merger balance sheet and inventory

### Opinion

We have audited the final merger balance sheets and inventories (hereinafter jointly referred to as: 'final merger balance sheet' or 'final merger balance sheets') prepared as at 30 April 2023 in connection with the registered merger of the companies named below, in the course of which we have audited:

(a)the final before merger balance sheet and inventory of **MBH Bank Nyrt.** (previously referred to as MKB Bank Nyrt., name changed on 1 May 2023) as the acquiring company continuing its operation in an unchanged form after the merger ('acquiring company'), in which the total assets and liabilities amount to MHUF 7,265,168, the subscribed capital amounts to MHUF 321,699 and the shareholders' equity is MHUF 794,745;

(b) the final merger balance sheet and inventory of **Takarékbank Zrt.** as the company ceasing its activity due to the merger into the acquiring company ('the merging company'), in which the total assets and liabilities amount to MHUF 3,344,134, the subscribed capital amounts to MHUF 186,960 and the shareholders' equity is MHUF 262,024; and

(c) the final after merger balance sheet and inventory of **MBH Bank Nyrt**. (previously referred to as MKB Bank Nyrt., name changed on 1 May 2023) as the company continuing its operation in an unchanged form after the merger ('successor company'), showing the assets and liabilities after the merger, in which the matching total of assets and liabilities amount to MHUF 10,313,104, the subscribed capital amounts to MHUF 322,530 and the shareholders' equity is MHUF 837,733.

The companies involved in the merger are hereinafter jointly referred to as: 'Merging Companies'.

In our opinion, the accompanying 30 April 2023 final merger balance sheets and inventories of MBH Bank Nyrt., as acquiring company, Takarékbank Zrt., as merging company, and MBH Bank Nyrt., as successor company continuing its operation in an unchanged form after the merger are prepared in all material respects in accordance with the provisions of Sections 136-141 of the Act C of 2000 on Accounting (hereinafter: 'Accounting Act') in force in Hungary.

### **Basis for the Opinion**

We have conducted our audit in accordance with the Hungarian National Standards of Auditing and the applicable laws and regulations pertaining to auditing and effective in Hungary. Our responsibilities under those standards are further described in the "Auditor's responsibilities for the audit of the final merger balance sheets and inventories" section of our report.

We are independent of the Merging Companies in accordance with the applicable laws of Hungary, with the Hungarian Chamber of Auditors' Rules on ethics and professional conduct of auditors and on disciplinary process and, as well as with respect to issues not covered by these Rules, with the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standards Board for Accountants (the IESBA Code) and we also comply with further ethical requirements set out in these.

We believe that we have obtained sufficient and appropriate audit evidence to provide a basis for our opinion.

## mazars

### Other matters

### Limitation of use

Our report is issued in accordance with the provisions of Section (2a) of § 11 of Act CLXXVI of 2013 on the Reorganisation, Merger and Demerger of Certain Legal Entities (hereinafter: 'Transformation Act') in force in Hungary and with the provisions of Section 9 of § 136 of the Accounting Act and is prepared for the shareholders of the Merging Companies and shall not be used for any other purposes than those prescribed by the above regulations.

# Interim balance sheet and 'end-of-activity' financial statement on which the final merger balance sheets and inventories are based

PricewaterhouseCoopers Auditing Ltd. issued unqualified auditor's reports on 6 July 2023 on the 'endof-activity' financial statement of Takarékbank Zrt. and interim balance sheet of MBH Bank Nyrt. as at 30 April 2023, prepared in accordance with Section 114/A of the Accounting Act.

# Responsibilities of management and those charged with governance for the final merger balance sheets and inventories

Management is responsible for the preparation of the final merger balance sheets and inventories in accordance with the provisions of Sections 136-141 of the Accounting Act, and for such internal control that the management deems necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

When preparing the final merger balance sheets and inventories, management is responsible for assessing the successor company's ability to continue as a going concern, and informing us about matters related to going concern as well as management is responsible for the preparation of the final merger balance sheets and inventories based on the going concern principle. Management has to apply the going concern basis of accounting unless other relevant rules prevent its application or if any factor or circumstance prevails, which contradicts the continuation of business activities.

Those charged with governance are responsible for overseeing the financial reporting process of the company under their control.

### Auditor's responsibilities for the audit of the final merger balance sheets and inventories

During the audit, our objectives are to obtain reasonable assurance about whether the final merger balance sheets and inventories are prepared in accordance with the provisions of Sections 136-141 of the Accounting Act and that as a whole they are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Hungarian National Standards of Auditing will always detect an otherwise existing material misstatement. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these final merger balance sheets and inventories.

As part of an audit in accordance with the Hungarian National Standards of Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit.

We also:

 Identify and assess the risks of material misstatement of the final merger balance sheets and inventories, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for

one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Merging Companies' internal control.
- Evaluate the appropriateness of accounting policies applied and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting in relation to preparation of the final merger balance sheets. Investigations concerning the enforcement of the going concern principle was performed for the successor company and extended to planned effective date of the merger. If we conclude that management's use of the going concern basis of accounting was inappropriate in relation to preparation of the final merger balance sheets, we are required to issue a counter-opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. As a result of unforeseen future events or conditions, the successor company may not be able to continue the business.
- Evaluate the overall presentation, structure and content of the final merger balance sheets, and assess whether the final merger balance sheets represent the underlying transactions and events in accordance with the provisions of Sections 136-141 of the Accounting Act.
- We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings.
